André Lefebvre, and the Cars He Created at Voisin and Citroën Gijsbert-Paul Berk,2011-11-01 Together with his colleagues at Citroën, Andre Lefebvre created the Traction Avant (1934), the TUB (1939) – Citroën's first front wheel drive utility van that was succeeded by the H and HY vans (1947) – the Deux Chevaux (1948), and, last but not least, the DS (1955). From 1923 to 1931 Lefebvre also designed several highly original and outstanding competition cars and record-breaking automobiles for Voisin. He even drove some these cars in races and record attempts. It is obvious that during his 16 years with Gabriel Voisin he was very much influenced by the ideas of this illustrious aviation pioneer and car manufacturer. The experience gained during that period gave him the self-confidence to persuade his successive bosses at Citroën that his unorthodox approach to automobile design was what the company needed; first he convinced André Citroën, later Pierre Michelin, then Pierre-Jules Boulanger, and finally Robert Puiseux and Pierre Bercot. His oeuvre for Citroën alone earns him a place of honour among the great automobile designers of the past century. The fact that most present-day cars still carry the DNA of his design philosophy makes him stand out above other automotive pioneers and innovators. That is why it is amazing that so little is known about this fascinating and brilliant engineer. This book was written in order to remedy that, and to pay tribute to André Lefebvre: the passionate pioneer who left car enthusiasts around the world such an important heritage.

Citroen Lance Cole,2014-03-31 In this new view of the Citroen story, automotive/aviation writer and design specialist Lance Cole investigates not just the details of the cars of Citroen, but the aeronautical and cultural origins that lay behind Citroen's form and function. The book digs deep into the ethos of Automobiles Citroen to create a narrative on one of the greatest car manufacturers in history. Using interviews, translations, archive documents and specially-commissioned photographs, the Citroen journey is cast in a fresh perspective. It explains in detail the influences upon Citroen design: Voisin, Lefebvre, Bertoni, Boulanger, Mages, Opron and recent Citroen designers such as Coco, Blakeslee and Soubirou. As well as all the men of the great period of 1920s-1970s expansion, it also cites less well-known names of Citroen's French engineering, design, and influence such as Cayla, Gerin, Giret, Harmand, Dargent and others, to give a full picture of Citroen heritage. The book provides in-depth analysis of all major Citroen models with an engineering and design focus and profiles key individuals and cars up to the present day and Citroen's 'DS'-branded resurgence. It features many newly commissioned photographs, rare archive drawings and interviews with Citroen owners. Researched amongst leading Citroen experts and restorers, Lance Cole provides a fresh perspective on the Citroen car manufacturer, its design language and the legacy of its extraordinary engineering which will be of great interest to all Citroen and motoring enthusiasts. Superbly illustrated with 329 colour photographs, many newly commissioned along with rare archive drawings.

Designing Motion Markus Caspers,2016-09-26 The chaise-longue by Le Corbusier, the radio by Rams, the chair by Eames – designers make things into cult objects and become icons themselves. But who knows which coupé was designed by Frua, which limousine by Engel, which station wagon by Opron? For a long time, car design was considered to be anonymous, the designers stood in the shadow of the perception of the design, even though their designs can be found on the roads in millions. This richly illustrated book captures the origin of a profession and maps the development of car design based on a comprehensive introduction and the career biographies of over 200 selected designers who contributed to the design of cars and many different associated products in the USA, Europe, and Japan between 1900 and 2000.

Electric Trucks Kevin Desmond,2019-12-04 Welcomed at end of the 19th century as the solution to the severe problem of horse manure in city streets, electric trucks soon became the norm for short-haul commercial deliveries. Though reliable, they were gradually replaced by gasoline-powered trucks for long-haul deliveries--although a fleet of electric milk trucks survived in Great Britain into the 1960s. Industrial electric vehicles never disappeared from factories and ports. During the past decade, with the availability of the lithium-ion battery, the electric truck is back on the road for all payloads and all distances. The fourth in a series covering the history and future of electric transport, this book chronicles the work of the innovative engineers who perfected e-trucks large and small.

Trapeze Simon Mawer,2012-05-01 A propulsive novel of World War II espionage by the author of New York Times best seller The Glass Room. Barely out of school and doing her bit for the British war effort, Marian Sutro has one quality that makes her stand out—she is a native French speaker. It is this that attracts the attention

of the SOE, the Special Operations Executive, which trains agents to operate in occupied Europe. Drawn into this strange, secret world at the age of nineteen, she finds herself undergoing commando training, attending a “school for spies,” and ultimately, one autumn night, parachuting into France from an RAF bomber to join the WORDSMITH resistance network. But there’s more to Marian’s mission than meets the eye of her SOE controllers; her mission has been hijacked by another secret organization that wants her to go to Paris and persuade a friend—a research physicist—to join the Allied war effort. The outcome could affect the whole course of the war. A fascinating blend of fact and fiction, Trapeze is both an old-fashioned adventure story and a modern exploration of a young woman’s growth into adulthood. There is violence, and there is love. There is death and betrayal, deception and revelation. But above all there is Marian Sutro, an ordinary young woman who, like her real-life counterparts in the SOE, did the most extraordinary things at a time when the ordinary was not enough.

Citroën DS Malcolm Bobbitt,2016-07-15 An in-depth look at Citroen's idiosyncratic DS, for sixty years a design icon and one of the world's most controversial, radical, idiosyncratic and technically advanced motorcars. This popular book has now been re-issued in revised and updated paperback form.

Citroen DS Malcolm Bobbit,2005 The most radical of Citroen's idiosyncratic offerings, the DS was sensational when it was introduced in 1955. Twenty years and 1.45 million cars later it was still technically advanced to most other cars. Revolutionary in driving characteristics and comfort, it remains one of the most innovative cars of all time.

Citroën DS Lance Cole,2021-08-31 Launched in 1955 yet looking like a sci-fi design proposal for a future then undreamed of, Flaminio Bertoni's ellipsoid sculpture with wheels that was the Citroën DS stunned the world. There was a near riot at the 1955 Paris Motor Show launch of the car, orders flooded in for this, the new 'big Citroën' (a Voiture a Grande Diffusion or VGD) as the car that replaced the legendary Traction Avant range. The term 'DS' stems from two Citroën parts of nomenclature - the type of engine used as the 11D, (D) and the special hemispherical design of the cylinder head as 'Culasse Special' (S): DS out of 'Deesse' or Goddess, was a more popular myth of 'DS' origination, but an erroneous one. But it was not just the car's aerodynamically advanced body shape (Cd. 0.37) that framed the genius of the DS: hydro pneumatic self-levelling suspension, advanced plastics and synthetics for the construction of the roof and dashboard/fascia, and amazing road holding and cabin comfort were some of this car's highlights. Only the lack of an advanced new engine was deemed a missed opportunity. In fact Citroën had created a new engine for the car but lacked the resources to produce it in time for 1955. DS was a major moment in the history of car design, one so advanced that it would take other auto manufacturers years to embrace. Yet DS in its 'aero' design was the precursor to today’s low drag cars of curved form. Manufactured worldwide, used by presidents, leaders, diplomats, farmers and many types of people, the DS redefined Citroën, its engineering and design language, and its brand, for decades to come. Prone to rust, not the safest car in the world, and always lacking a smoother powerplant, the DS still became an icon of car design. Reshaped with a new nose and faired-in headlamps in 1967, DS remained in production until 1975. Across its life DS spawned an estate car variant as the 'Safari', a range of limousines, two-door convertibles, and even coach-built coupes and rally specials. This car was a product design that became an article of social science - it was that famous and it

defined a European design movement upon a global stage then packed with 'me too' copyist designs. The DS or 'Goddess' as it was tagged, was a tear-drop shaped act of French confidence in a world of the regurgitation of the known. Some argue that DS and its effect has never been surpassed. This new value-for-money book provides innovative access to the design, history, and modeling of the revolutionary DS - one of the true 'greats' of motoring history and, a contemporary classic car of huge popularity.
