Quantum Systems: New Trends And Methods – Proceedings Of The International Workshop Young Suh Kim, Ilya Davydovich Feranchuk, L M Tomilchik, A Z Gazizov, 1997-04-11 The purpose of the workshop is to discuss both local and global geometrical and topological effects in quantum systems, in the context of the new methods of investigation. The main topics are: non-perturbative methods in quantum theory; geometrical and topological effects in quantum dynamics; group-theoretical and algebraic methods in the theory of quantum systems; quantum systems in external fields and curved spaces; new results: from subnuclear physics to cosmology.

Proceedings of the 31st International Conference on High Energy Physics ICHEP 2002 S. Bentvelsen, P. de Jong, J. Koch, E. Laenen, 2012-12-02 The first precision measurements on CP violation in the B system are reported. Both the BELLE and the BABAR collaboration presented, among others, results for $\sin 2\beta$ with much improved accuracy. Results from the Sudbury Neutrino Observatory, SNO, also deserve to be mentioned. The convincing evidence of solar neutrino oscillations had been presented by SNO prior to the conference; a full presentation was given at the conference. An incredibly precise measurement of the anomalous magnetic moment of the muon is reported, a fresh result from the Brookhaven National Laboratory. Apart from these distinct physics highlights, there are also the first results from the new Tevatron run and from the relativistic heavy ion collider RHIC. Theorists write of our ever better understanding of the Standard Model and of what might lie beyond. Risky as it is to highlight only a couple of exciting subjects, it is merely meant to whet the appetite for further reading.

Dark Side Of The Universe, The: Experimental Efforts And Theoretical Framework – Proceedings Of The Second Workshop Rita Bernabei, Antonella Incicchitti, 1996-10-22 The search for dark matter is one of the most relevant topics in astroparticle physics today. It involves many different experimental techniques that should collectively contribute significantly to the identification of the nature and characteristics of the dark matter constituents, offering at the same time much room for new technological developments. The theoretical framework is also essential, both for properly interpreting the different results and for suggesting the most interesting possible candidates and search strategies. This book compares the methods, the developments and the results.

Heavy Flavours and High-Energy Collisions in the 1-100 TeV Range A. Ali, L. Cifarelli, 2013-11-21 The present volume is based on the proceedings of the 6th and 7th INFN ELOISATRON project workshops, held at the Centro di Cultura Scientifica Et tore Majorana CCSEM, Erice-Trapani, Sicily, Italy, in the period June 10-27, 1988. The topics of the two workshops were, respectively:
- Heavy Flavours: Status and Perspectives, and - Novel Features of High

Energy Collisions in 1-100 TeV Region. They were attended by sixty-three physicists. The two workshops were followed by a meeting of the INFN ELOISATRON working group, also held at the CCSEM in the period October 7-15, 1988 in which twenty-five physicists participated. Since there was quite a bit of overlap among speakers, participants and the topics covered at the three meetings, we have decided to issue a joint proceeding, with the first part entitled: Heavy Flavour Physics, and the second: High Energy Physics with 1-100 Te V Proton Beams. Some of the reports included in this volume have been contributed by the INFN ELOISATRON working group members. The first part of these proceedings deals mostly with the presentation and interpretation of results in the so-called flavour physics sector. New results, which have become available in the last three years from experiments involving kaons, charmed and beauty hadrons, and searches for the still missing top quark at the present and forthcoming colliders are topics of major interest here. The contributions in this part are organized in three categories: Experimental Results, Theoretical Interpretation, and Future Directions.
