**Electro-Acupuncture for Dentistry, Paperback** John Char,1980-03-01 Electroacupuncture is an advanced form of traditional acupuncture which shares many similarities to its historical cousin. As with traditional acupuncture, needles are inserted on specific points along the body. These needles are then energized using small amounts of controlled electrical currents; voltage applied can be fine tuned and calibrated in order to best address a patient's specific health issues. Originally published in 1980, *Electro-Acupuncture for Dentistry* (also titled *EAV Special*) has become the classic manual for holistic health practitioners, doctors, and dentists integrating electroacupuncture into their practices to help their patients. Author Dr. John K. Char, world renowned as a pioneer in the holistic healing arts, was one of the few dentists in the State of Hawaii to fully integrate alternative and homeopathic medicine in an everyday dental practice. Whether you are an interested layperson, dentist, or holistic health practitioner, this book discusses how to use EAV techniques to help patients with dental pain, discomfort, swelling, and much more. Dr. Char is a homeopathic physician, dentist, licensed massage therapist, and doctor of natural science. He mentored in Germany with the late Dr. Reinhold Voll and has trained hundreds of integrative health practitioners from around the world. Dr. Char is the head of the Dr. John K. Char Holistic Wellness Center of Hawaii. He can be reached online at [www.drjohnchar.com](http://www.drjohnchar.com).

**Functionality of Proteins in Food** Joseph F. Zayas,2012-12-06 The book is devoted to expanding current views on the phenomena of protein functionality in food systems. Protein functionalities in foods have been the object of extensive research over the last thirty to forty years and significant progress has been made in understanding the mechanism and factors influencing the functionality of proteins. The functionality of proteins is one of the fastest developing fields in the studies of protein utilization in foods. Currently, a broad spectrum of data related to protein functionality in food systems has been collected, however, much more needs to be known. In this volume, the most important functional properties of food proteins are presented: Protein solubility, water holding capacity and fat binding, emulsifying, foaming, and gelling properties as affected by protein source, environmental factors (pH, temperature, ionic strength) and protein concentration; Relationships between protein conformation, physicochemical properties, and functional properties; Protein functional properties as influenced by various food processing conditions, particularly heat treatment, dehydration, freezing and storage when frozen, extraction and other processes; Effects of protein modification on the enhancement of protein functionality; Utilization of various proteins in improving functional properties in food systems. Those aspects of protein functionality are presented which the author believes to be interesting and most important for protein utilization in food systems. The book is recommended to students and food scientists engaged in food protein research and food industry research, and development scientists. **The Grammar of Causation and Interpersonal Manipulation** Masayoshi Shibatani,2002 This volume presents fifteen original papers dealing with various aspects of causative constructions ranging from morphology to semantics with emphasis on language data from Central and South America. Informed by a better understanding of how different constructions are positioned both synchronically (e.g., on a semantic map) and diachronically (e.g., through grammaticalization processes), the volume affords a comprehensive up-to-date perspective on the perennial issues in the grammar of causation such as the distribution of competing causative morphemes, the meaning distinctions among them, and the overall form-meaning correlation. Morphosyntactic interactions of causatives with other phenomena such as incorporation and applicativization receive focused attention as such basic issues as the semantic distinction between direct and indirect causation and the typology of causative constructions.

**E. J. Hughes: Canadian War Artist** Robert Amos,2022-10-25 A penetrating study based on unique archival material and a deep analysis into

hundreds of wartime works of art. —Tim Cook, author of *The Fight for History: 75 Years of Forgetting, Remembering, and Remaking of Canada's Second World War*

The third volume of this award-winning series showcases paintings and drawings E. J. Hughes created during the artist's war service in Ottawa, England, Wales, and Alaska. In this, the third volume of an award-winning series on artist E. J. Hughes (1913–2007), Robert Amos turns his focus to Hughes's service in the Second World War. The narrative begins with Hughes's cadet days with the Seaforth Highlanders in Vancouver, followed by his enlistment at the Work Point Barracks in Esquimalt in 1939. Named the first "service artist" in 1941, he spent two winters in Ottawa before being posted to London where he was attached to different regiments in England and Wales. His paintings of camp life and convoys reflect his keen attention to the details of vehicles, artillery, and uniforms. In 1943 on the Alaskan island of Kiska, he transformed sub-zero weather and howling gales into a powerful document of this remote theatre of war. He returned to Ottawa where he worked until 1946—Canada's first, last, and longest-serving War Artist of the Second World War. He was also the most prolific. The book features seventy artworks from the Canadian War Museum's holdings, expanded with many personal photos and sketches from the artist's papers. The narrative situates Hughes's wartime work within the broader context of his life and his development as an artist. With the care and knowledge of a fellow artist, Amos draws the reader into this important chapter in the life of E. J. Hughes and Canadian art.

*Shelldrake* Harold A. Skaarup, 2012-02-22 *Shelldrake* is an informative and detailed synopsis of the carefully preserved and restored guns and artillery on display in Canada. The Royal Regiment of Canadian Artillery is represented by a long and distinguished line of gunners with historical ties back to the days before Canada's Confederation. The honour of defending Canada while standing ready to support operations overseas in peace and war continues to this day. In doing so, it is necessary to remember that the weapons of war are an integral part of what keeps this nation safe, although the examples that have been used to make it so are few and far between. The descriptions of Canadian artillery and the places of honour where they can be viewed highlights the importance of the equipment that brought our nation forward at key turning points in history when our guns were in use as tools of war at home and overseas. This guide book will show the interested reader where to find examples of the historical guns preserved in Canada, and perhaps serve as a window on how Canada's military contribution to security in the world has evolved.

**Dairy-Derived Ingredients** M Corredig, 2009-10-26 Advances in technologies for the extraction and modification of valuable milk components have opened up new opportunities for the food and nutraceutical industries. New applications for dairy ingredients are also being found. *Dairy-derived ingredients* reviews the latest research in these dynamic areas. Part one covers modern approaches to the separation of dairy components and manufacture of dairy ingredients. Part two focuses on the significant area of the biological functionality of dairy components and their nutraceutical applications, with chapters on milk oligosaccharides, lactoferrin and the role of dairy in food intake and metabolic regulation, among other topics. The final part of the book surveys the technological functionality of dairy components and their applications in food and non-food products. Dairy ingredients and food flavour, applications in emulsions, nanoemulsions and nanoencapsulation, and value-added ingredients from lactose are among the topics covered. With its distinguished editor and international team of contributors, *Dairy-derived ingredients* is an essential guide to new developments for the dairy and nutraceutical industries, as well as researchers in these fields. Summarises modern approaches to the separation of dairy components and the manufacture of dairy ingredients Assesses advances in both the biological and technological functionality of dairy components Examines the application of dairy components in both food and non-food products

**Smart and Sustainable Food Technologies** Shalini Sehgal, Barinderjit Singh, Vasudha Sharma, 2022-05-13 This book presents a comprehensive view of emerging smart technologies in various food processing sectors. Specifically, it covers smart technologies applied in food production, food manufacturing, food packaging, storage, distribution, and food supply chain. Contributing authors are the key scientists with diverse backgrounds in either industry or academia. The book contains four parts with four chapters each, presenting recent smart technologies developed in their respective areas. Part I primarily focuses on the recent smart food production innovations such as precision agriculture, vertical farming, automation, robotics, livestock technology, modern greenhouse practices, artificial intelligence, and block chain that dramatically increase the quality of raw materials for the food industry. Part II provides the current knowledge and developments related to the recent smart technologies in manufacturing pertaining to various food sectors, non-thermal food preservation technologies, and 3D printing, developed for the food manufacturing industries that improve the organoleptic and nutritional quality, enhance chemical and microbial safety, as well as cost-effectiveness and convenience of processed foods. Part III covers smart technologies to ensure food safety in the supply chain, with monitoring and surveillance of food contamination, use of IoT and blockchain for food traceability and neural network approach for risk assessment. Part IV provides expert opinions on using smart technologies for minimizing waste and maximizing co-product recovery in food processing; upcycling technologies in food and sustainable value stream mapping in the food industry. This book will be a useful resource to graduate/undergraduate students and researchers in advanced food technology, practicing technologists/engineers in the food and related industries, food packaging industry, entrepreneurs and other scientists and technologists in smart and sustainable processes who seek information on design and development of these processes.

*Quality of meat and fat in pigs as affected by genetics and nutrition* Caspar Wenk,José A. Fernandez,Monique Dupuis,2023-08-28 Pork is the most widely produced meat in the world. To cover the demands of a fast growing population, new scientific knowledge in genetics, physiology and nutrition is generated, which contributes in a general increase of production performance. Production systems can be improved by constructing models which help to optimise use of the means of production and intensify production. In some regions where production intensity is high, concerns about environmental pollution are increasingly becoming a limiting factor. Consumers, and with them the retailer organisations, are voicing serious concerns about the production systems and especially the use of feed additives.In the context of the above, the question of the quality of pork becomes a relevant issue. A general view can only be obtained by taking all factors into consideration.The diverse aspects of pork quality were covered in the session on Quality of Meat and Fat as Affected by Genetics and Nutrition at the 50th annual meeting of the EAAP in Zurich. This publication presents the review presentations which give an overview from the different perspectives of meat quality and it's use in human nutrition: genetics, physiology, animal nutrition, meat consumption and human health and consumer concerns. In addition, 38 short communications provide up-to-date knowledge on the subject of quality from a European perspective.

"Ironsides" Harold A. Skaarup,2011-08-12 Major Hal Skaarup has woven together an informative and detailed synopsis of the carefully preserved and restored armoured fighting vehicles on display in Canada. He highlights the importance of these upon key turning points in history when these AFVs were in use as tools of war at home and overseas. We often associate the evolution of military prowess with the advancement of sophisticated technology. Major Skaarup's descriptions of Canadian armour as it evolved to the level it has today reveals that military planners have had to be continuously creative in adapting to the changes in modern combat. They had to devise many intricate techniques, tactics and procedures to overcome the insurgents and opposition forces faced in Afghanistan and future overseas missions where Canadian armour will be brought into play. This guide book will show the interested reader where to find examples of the historical armour preserved in Canada, and perhaps serve as a window on how Canada's military contribution to safety and security in the world has evolved.

**Fat Digestion and Absorption** Armand B. Christophe,Stephanie DeVriese,2000 Provides researchers, medical personnel, nutrition students, and others with an up-to-date view of several aspects of fat digestion and absorption and describes potential and realized applications. Topics addressed include enzymatic aspects of fat digestion in the gastrointestinal tract; the uptake of fat digestion products in the brush border membrane, the intracellular transport, and incorporation of these substances in glycerolipids and chylomicrons, or their portal transport; methods used to evaluate fat absorption; the effects of the triglyceride structure on fat digestion and absorption; an overview of fat absorption and studies related to malabsorption due to pancreatic and bile acid deficiency states; the effects of simulated household heating on fat absorption; and the reduction of fat uptake, either by feeding unabsorbable food fats or by interference with the digestion process of usual food fats by pharmacological means.
