Robin Higham

Flying American Combat Aircraft of World War II Robin Higham, Abigail T. Siddall, Carol Williams, 2004-02-01 Riveting, first-person accounts that put the reader in the cockpit. Dozens of photographs of the planes and the pilots that flew and fought in the skies from Tokyo to Berlin. Find out what it was like to fly some of the all-time classic aircraft of World War II, including the P-51 Mustang, B-17 Flying Fortress, P-47 Thunderbolt, P-38 Lightning, P-40 Kittyhawk, and many more!

Combat Aircraft of the United States Air Force Michael Green, 2016-07-30 When the United States Army Signal Corps created the Aeronautical Division in August 1907, it had a mission to take charge of all matters pertaining to military ballooning, air machines, and all kindred matters. That small inconsequential portion of the US Army would grow progressively over the many decades to become a separate service named the US Air Force in 1947 following the Second World War. Overnight, it became the world's most powerful military establishment, able to deliver conventional and nuclear ordnance anywhere around the globe. Today's cutting-edge example of this power-projection is the supersonic, bat-winged B-2 Spirit stealth bomber, which can fly at an altitude of 50,000 feet, and is built of carbon-graphite composite materials. The B-2 Spirit is a far cry from the early days of the service when it relied on fragile prop-driven wood and fabric aerial platforms, such as the Wright Type B, which could barely reach an altitude of 100 feet. In between have been such iconic Second World War aircraft as the P-51 Mustang and P-47 Thunderbolt fighters and bombers such as the B-25 Mitchell, B-17 Flying Fortress and B-29 Super Fortress which dropped the first A-Bomb in 1945. The Cold War demanded ever more powerful aircraft, such as the B-58 Hustler and B-52 Stratofortress, and fighters including the F-86 Sabre, F-104 Starfighter and F-4 Phantom. All these aircraft and more are vividly illustrated and described in detail in this superb Images of War publication.

Flying American Combat Aircraft Robin Higham, 2005 Riveting accounts from the pilots who flew such planes as the F-15, B-52, C-130, and many more. Dozens of in-the-cockpit photos. This sequel to *Flying American Combat Aircraft of World War II* spans the Cold War, taking a look at the planes that defined the era and fought in places like Korea and Vietnam. Covering all manner of aircraft—including fighters, bombers, and transports—seasoned pilots tell what it was really like to be in the cockpit of some of the world's classic planes.

Flying Combat Aircraft of the USAF-USAF Robin Higham, Abigail T. Siddall, 1978

MiG-17 and MiG-19 Units of the Vietnam War István Toperczer, 2012-11-20 The erstwhile enemy of the USAF and US Navy during the nine years of American involvement in the Vietnam War, the Vietnamese Peoples' Air Force (VPAF) quickly grew from an ill-organised rabble of poorly trained pilots flying antiquated communist aircraft into a highly effective fighting force that more than held its own over the skies of North Vietnam. Flying Soviet fighters like the MiG-17, and -19, the VPAF produced over a dozen aces, whilst the Americans managed just two pilots and three navigators in the same period.

F-111 & EF-111 Units in Combat Peter E. Davies, 2014-02-20 The General Dynamics F-111 was one of the most technically innovative designs among military aircraft, introducing the variable-sweep wing, terrain-following radar, military-rated afterburning turbofan engines and a self-contained escape module among other features. Designed as a cost-saving, multi-role interceptor, naval fighter and strike bomber, its evolution prioritised the latter role and it became the USAF's most effective long-range strike aircraft during three decades of service. Rushed into combat in Vietnam before some of its structural issues were fully understood, the type suffered several early losses and gained an unfairly negative reputation that dogged it for the rest of its career, and restricted funding for more advanced versions of the design. However, in Operation Linebacker in 1972 the F-111 flew 4000

nocturnal under-the-radar missions, delivering, with unprecedented accuracy, many decisive blows that would have resulted in heavy losses for any other attack aircraft.

USAF F-4 Phantom II MiG Killers 1965-68 Peter E. Davies, 2012-11-20 The USAF introduced the F-4C Phantom II into the Vietnam war in April 1965 from Ubon RTAB, Thailand. The F-4C/D soon became the Air Force's principal fighter over the North, destroying 85 MiGs by the close of 1968. This book describes how the USAF turned a gunless naval interceptor into an opponent to the more nimble VPAF MiGs. It explains how the Air Force gradually followed US Navy initiatives in the use of the F-4's missile armament but employed very different tactics and aircrew training. The roles of key personalities such as Col. Robin Olden are discussed, together with armament and markings, crews and engagements.

Military Aircraft of the World Gordon SWANBOROUGH, 1973

B-24 Liberator Units of the Pacific War Robert F Dorr, 2012-12-20 Ever present in the Pacific from Pearl Harbor to VJ-Day, the B-24 Liberator proved to be the staple heavy bomber of the campaign. From its ignominious beginnings in the Allied rout in the Philippines and the Dutch East Indies, the bomber weathered the Japanese storm with a handful of bomb groups, which played a crucial role in checking the enemy's progress firstly in New Guinea, and then actively participating in the 'island hopping' campaign through the south-west Pacific.

US Navy F-4 Phantom II MiG Killers 1965-70 Brad Elward, Peter E. Davies, 2012-11-20 For every American fighter pilot involved in the Vietnam War, the ultimate goal was to 'kill a MiG'. In eight years of conflict 43 Vietnamese Peoples Air Force aircraft were claimed by US Navy and US Marine Corps Phantom II crews, and one single ace crew produced. Navy Phantom IIs scored the first kills of the Vietnam War, in April 1965, as well as scoring the last in January 1973. This volume charts the successes of the navy fighter crews as they encountered 'MiGs, Missiles and AAA' over the jungles of North Vietnam.

USAF McDonnell Douglas F-4 Phantom II Peter E. Davies, 2013-04-20 In many respects the most successful, versatile and widely-used combat aircraft of the post-war era the F-4 Phantom II was quickly adopted by the USAF after its spectacular US Navy introduction. Its introduction to USAF squadrons happened just in time for the Vietnam conflict where USAF F-4Cs took over MiG-fighting duties from the F-100 Super Sabre. Although the F-4 was never intended as a dog-fighter to tangle with light, nimble, gun-armed MiGs it was responsible for destroying 109 MiGs in aerial combat. At the end of their careers many of the survivors from the 3,380 'land-based' Phantoms were converted into target drones for training purposes. New aircraft were also built for West Germany, Iran and Israel. The USAF's experience with the Phantom showed clearly that the air-to-air fighter was still a necessity and its decision to fund its successor, the McDonnell-Douglas F-15 Eagle (as well as the F-16 Fighting Falcon and F-22A Raptor) was heavily influenced by the lessons of US and other Phantom pilots in combat.

Israeli F-15 Eagle Units in Combat Shlomo Aloni, 2013-01-20 Post-Yom Kippur War, Israel purchased the F-15 Eagle, the then world's best air-to-air fighter, in an effort to prevent another surprise attack from the air. For the first time in its history the IDF/AF operated a fighter that was a full generation ahead of opposing interceptors in the region. The first 'kill' F-15 Baz (Buzzard) arrived in Israel in 1976 and soon proved its worth in combat. Israeli Baz pilots were credited with 12.5 kills between 1979 and 1981, with 33 victories following during the June 1982 Lebanon War. Despite substantial combat, no Israeli F-15 has ever been lost to enemy action. In the 1990s the US government supplied the IDF/AF with the F-15I Ra'am (Thunder) to fulfill the long-range surface-to-surface missile mission post-Desert Storm. From A to I, the extremely capable, and combat-tested, Israeli F-15 force will continue to deter potential enemies well into the foreseeable future. This book examines the history and development of these units.

F3D/EF-10 Skyknight Units of the Korean and Vietnam Wars Joe Copalman, 2022-01-20 The Douglas F3D Skyknight was an early but effective attempt at combining new technologies together in a lethal package capable of shipboard operation. Whereas most fighters relied on speed and maneuverability, the portly, straight-winged F3D relied on three radars, four 20mm cannon, and -

most importantly – darkness. Having first flown in March 1948, the Skyknight's first taste of war came in September 1952, when Marine Night Fighter Squadron 513 [VMF(N)-513] deployed to Korea. The most important job assigned to VMF(N)-513 was the escorting of USAF B-29 bombers over northern Korea. Whereas Chinese and North Korean MiG-15s relied on ground-controlled intercept radar for steering guidance into firing positions, the F3D, with its own onboard radars, was autonomously lethal – it could detect, track and target MiGs all on its own. Skyknight crews ended the Korean War with six nocturnal kills in exchange for one combat loss. After the war, 35 Skyknights were converted into electronic warfare (EW) aircraft. As US air operations over North Vietnam intensified in early 1965, the need for a tactical EW jet to provide electronic countermeasures (ECM) protection to accompany strike packages north became apparent. For all of its early effectiveness over North Vietnam, the proliferation of radar-guided guns and missiles began to erode the advantage created by EF-10 escort support, which flew its last combat mission in October 1969. This highly illustrated volume explores the F3D Skyknights and their deployment during the Korean and Vietnam wars, using first-hand accounts from aircrew, original photographs and 30 profile artworks to explore their key roles as an escort aircraft and electronic warfare aircraft.

One Desert Jet Turner Earl Heron, 2002 Feel what it's like to prepare fighter jets, smell the jet fuel, and taste the fighter environment. *One Desert Jet* Turner is an aviation book introduction to USAF fighter jet culture written by a F-4/F-16 fighter mechanic who shares all. This aviation career book provides information from the same perspective about the USAF Thunderbirds, and accident investigation as observed by the author at Nellis AFB, near both Las Vegas, NV and Area 51. Earl Heron also details the sensational transition from F-16 mechanic to C-130 flight engineer. *One Desert Jet* Turner is illustrated, but unlike many books about fighters that are primarily pictorial, this work concentrates on the realities behind the images.

F-104 Starfighter Units in Combat Peter E. Davies, 2014-11-20 This title covers the technical characteristics of the F-104 Starfighter, one of the most widely-used and popular aircraft in history. Although built in small numbers for the USAF, the F-104C fought and survived for almost three years in Vietnam. There, it was engaged in some of the war's most famous battles including the legendary operation Bolo, where seven North Vietnamese MiGs were destroyed without the loss of a single US fighter. This small, tough and very fast fighter, dubbed 'The Missile with a Man in It', was called upon to do things it was not specifically designed for, and did them admirably. Featuring illustrations and photographs detailing the variety of nose-paint schemes and weapons configurations, this comprehensive appraisal of the F-104 Starfighter is ideal for modelling and aviation enthusiasts alike.

B-1B Lancer Units in Combat Thomas Withington, 2012-11-20 The development of the B-1B Lancer bomber was difficult to say the least. Originally conceived to fulfill a USAF requirement for an Advanced Manned Strategic Aircraft, the original B-1A concept aircraft was accused of being a white elephant, capable of performing nothing which could not be achieved at less financial and human expense than an intercontinental ballistic missile. Cancelled by the Carter administration and finally commissioned by President Reagan as the modified B-1B, the Lancer began its duties as a nuclear-armed bomber in the mid-1980s. The end of the Cold War intervened and the jet was removed from its nuclear missions as a result of arms control legislation. However, the 1990s saw the metamorphosis of the Lancer into a potent conventional weapons carrier which has seen action in Iraq, the Balkans and Afghanistan. The Lancer has proved its critics wrong in demonstrating its use as a highly flexible and hard-working bomber, able to undertake diverse missions ranging from CAS to the targeting of weapons-of-mass-destruction installations.
