Review of Department of Defense Test Protocols for Combat Helmets National Research Council, Division on Engineering and Physical Sciences, Board on Army Science and Technology, Committee on Review of Test Protocols Used by the DoD to Test Combat Helmets, 2014-03-31 Combat helmets have evolved considerably over the years from those used in World War I to today's Advanced Combat Helmet. One of the key advances was the development of aramid fibers in the 1960s, which led to today's Kevlar-based helmets. The Department of Defense is continuing to invest in research to improve helmet performance, through better design and materials as well as better manufacturing processes. Review of the Department of Defense Test Protocols for Combat Helmets considers the technical issues relating to test protocols for military combat helmets. At the request of the DOD Director of Operational Test and Evaluation, this report evaluates the adequacy of the Advanced Combat Helmet test protocol for both first article testing and lot acceptance testing, including its use of the metrics of probability of no penetration and the upper tolerance limit (used to evaluate backface deformation). The report evaluates appropriate use of statistical techniques in gathering data; adequacy of current helmet testing procedures; procedures for the conduct of additional analysis of penetration and backface deformation data; and scope of characterization testing relative to the benefit of the information obtained.

Wehrmacht Combat Helmets 1933-45 Brian C Bell, 2012-12-20 The German Stahlhelm is perhaps the most recognizable image of World War II. Manufactured in its millions, it was used or copied by many countries. It is still one of the most collected relics of the war; but despite its relative availability, prices have reached levels that challenge collectors to protect themselves by acquiring in-depth knowledge. This book, by a collector of 30 years' standing, offers a detailed masterclass in the patterns, component parts and finishes of the combat helmets used by the German Army, Navy and Air Force. It is illustrated with a superb selection of rare period photos, colour photos of collected examples, and striking colour paintings.

U.S. Combat Helmets of the 20th Century Mark A. Reynosa, 1997 This book represents nearly a decade of research into the history of U.S. production combat helmets. Covered are the standard ground helmets, parachutist helmets and helmet covers. Every major production helmet version is presented in full color photographs, including detail shots and production markings. AUTHOR:

Shattered Minds Robert H. Bauman, Dina Rasor, 2019-03-01 Shattered Minds is the first book to investigate how American military bureaucracies have let our troops down by failing to upgrade one of the most important pieces of personal safety equipment: the combat helmet. Two longtime employees of North Dakota defense contractor Sioux Manufacturing discovered that the required density of the Kevlar material woven into the netting of combat helmets was being shorted. After bringing their discovery to the attention of management, their boss, rather than cleaning up the illegal practice, accused them of having an adulterous affair. Both employees were fired, leading to a lawsuit and a court judgment in their favor that eventually brought the company's bad-faith practices to light. Around the same time, a separate whistleblower, a retired Navy doctor, was pulled into a bizarre struggle with Army and Marine bureaucracies when he discovered from his Marine grandson that the protective webbing inside the military helmets was inadequate. Why was the military so resistant to upgrading the most essential piece of gear to protect soldiers from traumatic brain injury? Interweaving these two whistleblower stories, Robert H. Bauman and Dina Rasor explain why the military, despite news coverage and congressional hearings on the faulty helmet, continued to do the indefensible. They also suggest how the public, the press, and military institutions can remedy the problem to give U.S. troops effective helmets when serving to protect their country.

Blunt Impact Performance Characteristics of the Advanced Combat Helmet and the Paratrooper and Infantry Personnel Armor System for Ground Troops Helmet, 2005 Protective helmets are typically required to absorb energy in order to reduce head injury risk during blunt impact events. The energy-absorbing mechanism must be robust enough to reduce the impact energy to a low-injury probability level throughout a realistic range of impact velocities and environmental temperatures, regardless of the helmet impact site. The Advanced Combat Helmet (ACH) is configured with fitting pads that possess the capability to attenuate limited blunt head impact forces. Prior combat helmets were not required by their governing specifications to provide any tested levels of blunt impact protection. To obtain further information, a series of blunt impact tests were conducted with the ACH and the paratrooper and infantry versions of the PASGT helmet. The helmets were tested at two impact velocities, three environmental temperatures, and seven impact sites with two successive impacts. The performance of each was characterized by the transmitted acceleration measured within a standard head form and compared against the recommended threshold for mean and maximum acceleration.

Enhancing Injury Protection Capabilities of Army Combat Helmets, 2006 Traditionally, combat helmet design has focused on improving ballistic protection, but there has been recent interest in providing better protection from blunt impacts as well. In the military environment, many factors can produce blunt force head injury, including ground vehicle or aircraft mishaps, falls, etc. This paper outlines recent accomplishments of the combat helmet program at the U.S. Army Aeromedical Research Laboratory (USAARL) that have contributed measurably to enhanced Soldier survival in current combat operations.

Post-World War II M-1 Helmets Mark A. Reynosa, 1999 This book presents several years of research into the history of America's post-World War II M-1 Helmet. It provides the most comprehensive look into the research, development, and production of the M-1 Helmet during this often overlooked period. All aspects of the M-1 Helmet are covered, as well as associated research and development programs that impacted the helmet, such as the Nylon Helmet Program. The book provides a detailed look at helmet production, including the helmet body, cotton duck liner, Combat Helmet Liner, parachutist's helmets, and camouflage helmet covers. The production history of every major manufacture is also provided. Every production helmet is covered with full color photographs, including detail shots and production markings. Also included are contract sheets, a contract number reference, military specification drawings, and photos of helmet samples and helmet production. AUTHOR:

How Satisfied are Soldiers with Their Ballistic Helmets? A Comparison of Soldiers' Opinions about the Advanced Combat Helmet and the Personal Armor System for Ground Troops, 2008 Many factors are considered during ballistic helmet design, including comfort, weight, fit, and maintainability. These factors affect Soldiers' decisions about helmet use; therefore, rigorous research about Soldiers' real-life experiences with helmets is critical to assessing a helmet's overall protective efficacy. This study compared Soldiers' satisfaction and problem experience with the advanced combat helmet (ACH) and the personal armor system for ground troops (PASGT) helmet. Data were obtained from surveys of Soldiers at Fort Bragg, North Carolina. Ninety percent of ACH users were satisfied with their helmet, but only 9.5% of PASGT users were satisfied (p

Helmet for My Pillow Robert Leckie,2010-02-02 "A grand and epic prose poem . . . The purely human experience of war in the Pacific, written in the graceful imagery of a human being who—somehow—survived."—Tom Hanks See Robert Leckie's story in the HBO miniseries *The Pacific* Here is one of the most riveting first-person accounts ever to come out of World War II. Robert Leckie enlisted in the United States Marine Corps in January 1942, shortly after the Japanese attack on Pearl Harbor. In *Helmet for My Pillow* we follow his odyssey, from basic training on Parris Island, South Carolina, all the way to the raging battles in the Pacific, where some of the war's fiercest fighting took place. Recounting his service with the 1st Marine Division and the brutal action on Guadalcanal, New Britain, and Peleliu, Leckie spares no detail of the horrors and sacrifices of war, painting an unvarnished portrait of how real warriors are made, fight, and often die in the defense of their country. From the live-for-today rowdiness of marines on leave to the terrors of jungle warfare against an enemy determined to fight to the last man, Leckie describes what war is really like when victory can only be measured inch by bloody inch. Woven throughout are Leckie's hard-won, eloquent, and thoroughly unsentimental meditations on the meaning of war and why we fight. Unparalleled in its immediacy and accuracy, *Helmet for My Pillow* will leave no reader untouched. This is a book that brings you as close to the mud, the blood, and the experience of war as it is safe to come.

MKII helmets of the Second World War and their use in the Italian Campaign Daniele Piselli,2020-01-06 The collecting of MKII helmets from the second world war has seen a considerable increase in interest among collectors recently. The enthusiast approaching this sector of militaria collecting for the first time has very few tools available that can at least point him in the right direction. So, taking stock of the knowledge I have acquired and with the help of various collector friends, I thought it might be useful to publish this guide on MKII helmets in the second world war and their use during the Italian Campaign. There is certainly a lot more to discover but this is a starting point. A tip, before making a purchase, always ask the opinion of other collectors because a trained eye can definitely help you in this jungle of post war use, fakes, tampering... and beautiful helmets that still know how to tell their story. A big thank you goes to Francesco Braneschi, it is also thanks to him that this research came about, to his passion and to our constant exchanges of opinion on this sector of the militaria. In an attempt to understand something more I cannot fail to thank Marco Visani, super adviser with his infinite bibles. A thankyou also to those who contributed with their time, photographs, information, and much more: Alessandro Zentile, Antonio Bonanno, Aaron Delaney, Brendon Ellis, Cristian Rubiola, David Yeomans, Dennis van Vugt, Fabio Ortolani, Francesco Saverio Giovagnoli, Giovanni Righini , Ivo Beute, Leonardo Biserni, Mark Kozowy, Massimo Costa, Paolo Zamma, Peter Young, Steven Britton and the Boys of the Combat Road association. Thank you. And finally, thank you to Fabio Roncella for his essay on the battle of Montegabbione, our roots are in history. Buona lettura! Daniele Piselli
