**Monarchs of the Fields** Faye Reineberg Holt,1999 The introduction of the mechanical combine to the Canadian prairies in the late 1930s changed the face of farming forever. Large threshing crews were replaced by a single machine capable of harvesting entire fields quickly and efficiently. By using the combine, farmers gained more control over the harvest of their crops. Its efficiency led to larger farms, smaller farm families, less reliance on a neighbour's help, and freedom from weeks of back-breaking and dirty work. *Monarchs of the Fields* looks at history, processes, and changes effected by this innovation in harvest techniques. Archival photographs of the people and the machines involved make this a special tribute to an important era in farm history.

*Red Combines 1915-2015 (Special Edition)* Lee Klancher, Gerry Salzman, 2015-09-01 The first axial flow combine transformed the industry and was hailed as the most significant piece of farm equipment built in the 20th century. The axial flow used advanced technology to process crops faster and more efficiently than anything else on the market. The axial flow started with research done by a rogue Swedish engineer in the 1950s, was continued in secret by a group of dedicated engineers from East Moline, Illinois, who did their work in a top-secret garage that only a select few were allowed to enter. The book tells the story of how extensive research and development allowed IH to build a new machine that took the market by storm. Done with dozens of interviews of engineers, salespeople, and customers, the book captures the behind the scenes drama and the cloak and dagger encounters with rival companies personnel and machines. The dramatic text is accompanied by more than 300 archival images, concept drawings, sketches, and new photography of the machines and men at work today.
