Increased bicycle helmet use in Sweden: needs and possibilities Sixten Nolén, 2017-08-21

Background: From the perspective of what is called vision zero in Sweden, fatalities and injuries among bicyclists are unacceptable. Despite that, bicyclists constitutes approximately one third of all road user inpatients in Swedish hospitals, which is about the same proportion seen for drivers and passengers of motor vehicles. There are too many bicycle-related head injuries, but the risk of such traumas could be reduced considerably by the use of helmets. Bicycle helmet wearing can be increased by voluntary means, for instance by long-term community-based helmet promotion programs. However, the best effect has been achieved by combining promotion with a compulsory helmet law for all bicyclists, as has been done in Australia, New Zealand, and North America.

Aim: The general aim of the research underlying this dissertation was to provide further information about the need for increased bicycle helmet use in Sweden, and to determine what measures can lead to more widespread helmet wearing. The four papers included addressed two main questions: (1) What is the need for increased helmet wearing among different categories of bicyclists in Sweden? (2) Is

a non-compulsory local bicycle helmet law a realistic alternative to a mandatory helmet law for all bicyclists? Materials and methods: Observational studies of helmet use by bicyclists in Sweden were conducted once a year (average $n = 37,031/\text{year}$) during the period 1988-2002 (paper I). The general trend in observed helmet wearing in different categories of bicyclists was analyzed by linear regression, and the results were used to predict future trends in helmet wearing. Three studies (papers II-IV) were also performed to evaluate a non-compulsory local bicycle helmet law in Motala municipality during the study period 1995 to 1998 (papers II-IV). This law was introduced in 1996 and applies specifically to school children (ages 6-12 years), although the intention is to increase helmet use among all bicyclists. Adoption of the law was accompanied by helmet promotion activities. In one of the studies in the evaluation, written material and in-depth interviews ($n=8$) were analyzed qualitatively to describe the process and structure of development of the Motala helmet law. The other two studies used a quasi-experimental design to assess the impact of the helmet law: one comprised annual observations of helmet wearing among bicyclists in Motala (average $n=2,458/\text{year}$) and control areas (average $n=17,818/\text{year}$); and the other included questionnaire data

on attitudes, beliefs, and self-reported behavior of school children in Motala (n=1,277) and control areas (n=2,198). The average response rate was 72.8%. Results and discussion: There was a significant upward trend in helmet use in all categories of bicyclists from 1988 to 2002. Helmet wearing increased from 20% to 35% among children(? 10 years) riding bikes in their leisure time, from 5% to 33% among school children, and from 2% to 14% in adults. Total average helmet use rose from 4% to 17%. However, during the last five years of the study period (1998-2002), there was no upward trend in helmet wearing for any of the categories of bicyclists. If the historic trend in helmet use continues, the average wearing rate will be about 30% by the year 2010. The Motala helmet law was dogged by several problems, mainly during the initiation phase, and some of them led to poor rooting of the law in the schools and indistinct roles and responsibilities of the municipal actors. Despite that, the law initially led to a significant increase in helmet wearing among the primary target group (school children), from a pre-law level of 65% to about 76% six months post-law, whereas thereafter the wearing rate gradually decreased and was at the pre-law level 2 ½ years after the law was adopted. Nonetheless, a weak but significant effect on adult bicyclists

remained: the pre-law level of about 2% rose to about 8% at the end of the study period. Only about 10% of bicyclists on bike paths in Motala wore helmets 2 ½ years post-law. The questionnaire study showed one significant effect on school children in Motala two years post-law, namely, a stronger intention to ride bicycles if a national compulsory helmet law was introduced. There was, however, no significant long-term influence on children's attitudes or beliefs about helmet wearing, which agrees with the results of the observational study. General conclusions: It is indeed necessary to increase bicycle helmet wearing in Sweden. Both the current average rate of helmet use and the rate predicted for the near future are far from the goal of 80% that was officially proposed by several years ago. Previous research has shown that, to achieve substantial and sustained bicycle helmet use, it is necessary to use helmet promotion in combination with a national helmet law that is compulsory and applies to all bicyclists. The present evaluation of the non-compulsory local helmet law in Motala indicated that this type of initiative is not a powerful alternative to a mandatory national helmet law. Nevertheless, much has been learned from the initiation and implementation of this local action.

Helmets and Body Armor in Modern Warfare Bashford

Dean, 1920 Published shortly World War I, this book presents the virtues and failings of helmets and body armor in warfare of the time. To this end, it brings together materials collected from all accessible sources; it shows the kinds of armor which each nation used in World War I, their strengths, and weaknesses. This publication approaches then-contemporary armor in a historical context, weighing aesthetic and practical concerns and comparing armor to well-known pieces in the Met's collection.

Wehrmacht Combat Helmets 1933–45 Brian C Bell, 2012-12-20

The German Stahlhelm is perhaps the most recognizable image of World War II. Manufactured in its millions, it was used or copied by many countries. It is still one of the most collected relics of the war; but despite its relative availability, prices have reached levels that challenge collectors to protect themselves by acquiring in-depth knowledge. This book, by a collector of 30 years' standing, offers a detailed masterclass in the patterns, component parts and finishes of the combat helmets used by the German Army, Navy and Air Force. It is illustrated with a superb selection of rare period photos,

colour photos of collected examples, and striking colour paintings.

Should Henry Wear a Helmet? Rebecca Rissman,2013

Examines the benefits of making safe decisions.

Lavi John W. Golan,2016 The Lavi fighter program, the largest weapons-development effort ever undertaken by the State of Israel, envisioned a new generation of high-performance aircraft. In a controversial strategy, Israel Aircraft Industries intended to develop and manufacture the fighters in Israel with American financial support. The sophisticated planes, developed in the mid-1980s, were unique in design and intended to make up the majority of the Israeli air force. Though considerable prestige and money were at stake, developmental costs increased and doubts arose as to whether the Lavi could indeed be the warplane it was meant to be. Eventually the program became a microcosm for the ambitions, fears, and internal divisions that shaped both the U.S.-Israeli relationship and Israeli society itself. But the fighter never made it to operational service, and until now, the full breadth and significance of the Lavi story have never been examined and presented. *Lavi: The United States, Israel, and a Controversial Fighter Jet* traces the evolution of the Lavi fighter from its genesis in the 1970s to its scrapping in August 1987. John W. Golan

examines the roles of Israeli military icons and political leaders such as Ezer Weizman, Ariel Sharon, Menachem Begin, and Yitzhak Rabin in the program and in relation to their counterparts in the United States. On the American side, Golan traces the evolution of government policy toward the program, detailing the complex picture of the U.S. foreign policy apparatus and of U.S.-Israeli relations in general—from President Reagan’s public endorsement of the program on the White House lawn to Defense Secretary Caspar Weinberger’s unremitting attempts to cancel it in succeeding years.

Modern Sports Helmets James A. Newman, 2007 This wonderful new survey follows the evolution of the sports helmet from early military and aviation uses, through early motorcycle and auto racing, and to modern helmets used in a wide variety of sports today. The science of helmet design and manufacture is covered before moving into the art of the helmet. Helmets for six major sports are extensively covered: auto and motorcycle racing, bicycling, equestrian activities, skiing, football, and ice hockey. Some lesser known sports and their helmets are also included to give a fascinating and complete panorama of the field. The design innovations, both for safety and appearance, the colors, and the

fascinating history will engage the reader, while nearly 600 color images will please even the most particular sports fan. For designers, players, scientists, and historians this book is a true delight.

Jason's Helmet Linda Barron Heinrich, 2009-09-02 During World War II, six American soldiers, including Somerset, PA native First Lieutenant Jason H. Barron, died under fire while helping liberate the French town of Lougé-sur-Maire. Sixty-five years later, a resident of Lougé-sur-Maire contacted Emerson S. Barron, informing him that the town had discovered his brother's helmet, and requesting that he travel to France to reclaim it. In *Jason's Helmet*, Barron's niece, Linda Barron Heinrich, writes about the lives and deaths of the six soldiers, and about her experience in France amongst the townspeople honoring their sacrifice.

Helmet Head Mike Baron, 2014-03-08 A police officer goes up against a legendary monster in this thriller from an author who is like “Quentin Tarantino on paper” (New York Times–bestselling author Kevin J. Anderson). He was just a rumor to the rough and dangerous “one-percenters”—a monstrous motorcyclist dressed all in black who rode the back roads of Little Egypt cutting off the heads of other bikers with a samurai sword. But on one terrible

stormy night, Deputy Pete Fagan discovers that Helmet Head is all too real—and consumed with a fury that won't be satisfied until his demonic sword drinks its fill.

Vlasis,2020-09-02 Book Delisted

Helmet for My Pillow Robert Leckie,2011-10-05 Here is one of the most riveting first-person accounts ever to come out of World War II. Robert Leckie enlisted in the United States Marine Corps in January 1942, shortly after the Japanese attack on Pearl Harbor. In *Helmet for My Pillow* we follow his odyssey, from basic training on Parris Island, South Carolina, all the way to the raging battles in the Pacific, where some of the war's fiercest fighting took place. Recounting his service with the 1st Marine Division and the brutal action on Guadalcanal, New Britain, and Peleliu, Leckie spares no detail of the horrors and sacrifices of war, painting an unvarnished portrait of how real warriors are made, fight, and often die in the defense of their country. From the live-for-today rowdiness of marines on leave to the terrors of jungle warfare against an enemy determined to fight to the last man, Leckie describes what war is really like when victory can only be measured inch by bloody inch. Woven throughout are Leckie's hard-won, eloquent, and thoroughly

unsentimental meditations on the meaning of war and why we fight. Unparalleled in its immediacy and accuracy, *Helmet for My Pillow* will leave no reader untouched. This is a book that brings you as close to the mud, the blood, and the experience of war as it is safe to come. Now producers Tom Hanks, Steven Spielberg, and Gary Goetzman, the men behind *Band of Brothers*, have adapted material from *Helmet for My Pillow* for HBO's epic miniseries *The Pacific*, which will thrill and edify a whole new generation. From the Trade Paperback edition.

Protection Factors of the Airstream Helmet ,1981

It Started with a Helmet Gerald Sanford,Chris

Griffith,2021-06-23 This is the amazing, true story of Gerald Sanford, a former New York City police officer and FDNY firefighter who retired and moved to Naples, Florida. Retirement didn't take, and he found himself working at North Naples Fire Control and Rescue District, which is how he stumbled on an early 1900s antique fire helmet. He instantly knew the helmet was from New York City. By an amazing coincidence, Sanford presented the fire helmet back to the FDNY firehouse in the Bronx the day before the Sept. 11, 2001, terrorist attacks. With the city in ruins, Sanford volunteered to serve the FDNY in one of his former roles—press

secretary. In this memoir, he recalls volunteering after 9/11 as well as his earlier years working for the NYPD and FDNY, including his observations of political figures such as Mayor Ed Koch, Mayor David Dinkins, Mayor Rudy Giuliani, and others. Join Sanford as he shares an incredible story about Sept. 11 and how an antique leather helmet led two fire departments to forge a lasting bond.

Sustainable Phase Change and Polymeric Water Absorbent Materials Sinnappoo Kanesalingam,Rajkishore Nayak,2020-08-27 This book highlights novel applications of innovative fabrics in the design of an interlayer between the scalp and the helmet lining of motorcycle helmets to control the temperature inside the helmet. It examines various fibre microstructure configurations and fibre treatments in terms of their ability to assist in the dissipation of heat from the scalp. The findings presented here will be of considerable benefit to motorcyclists in South East Asia and other tropical regions.

Long-Duration Exposure Criteria for Head-Supported Mass

Barclay P. Butler, Nabih M. Alem, 1997 The modern crew station of Army helicopters uses the helmet as an integral component of the aircraft control systems. What was once viewed as a simple device for crash protection now supports devices including night vision goggles, chemical mask, head-up displays, and weapon aiming systems. These devices combine to increase the biomechanical stress in the neck. This study investigated the effects of increasing helmet torque on the motion of the helmeted head under the conditions of long duration whole body vibration exposure. Twelve U.S. Army volunteer aviators were exposed to 4 hours of whole body vibration, similar to that found in a UH-60 helicopter, while wearing four different helmets. Helmet torques, as calculated at the point where the head connects to the spine, ranged from a standard aviator helmet to a helmet with a chemical mask and a night vision goggle. Head motion was measured using a three dimensional active infrared marker system attached to a fixture held in the subject's teeth.

Early Iron Age Greek Warrior 1100–700 BC Raffaele

D'Amato,Andrea Salimbeti,2016-08-25 The period from 1200 BC onwards saw vast changes in every aspect of life on both the Greek mainland and islands as monarchies disappeared and were replaced by aristocratic rule and a new form of community developed: the city-state. Alongside these changes a new style of warfare developed which was to be the determining factor in land warfare in Greece until the defeat of the Greek city-state by the might of Macedonia at Chaeronea in 338 BC. This mode of warfare was based on a group of heavily armed infantrymen organized in a phalanx formation – the classic hoplite formation – and remained the system throughout the classical Greek period. This new title details this pivotal period that saw the transition from the Bronze Age warriors of Homer to the origins of the men who fought the Persian and Peloponnesian Wars.

Art of the Samurai 日本武蔵,Metropolitan Museum of Art (New York, N.Y.),2009 This extensively illustrated catalogue is published in conjunction with the first comprehensive exhibition devoted to the arts of the samurai, including the finest examples of swords - the spirit of the samurai - as well as sword mountings and fittings, armor and helmets, saddles, textiles, and paintings. The works in the catalogue, drawn from public and private collections in Japan,

include 34 officially designated National Treasures and 64 Important Cultural Properties, the largest number ever to be shown together at one time. Dating from the 5th to the early 20th century, these majestic objects offer a complete picture of samurai culture and its unique blend of the martial and the refined. Many of the greatest Japanese swordsmiths are represented in this volume, from early masters such as Yasuie (12th century) and Tomomitsu (14th century) to the Edo-period smiths Nagasone Kotetsu and Kiyomaro. The blades by these and other masters, cherished as much for their beauty as for their cutting efficiency, were equipped with elaborate hilts and scabbards prized for their exquisite craftsmanship and fine materials such as silk, rayskin, gold, lacquer, and certain alloys unique to Japan. Japanese armor is also fully surveyed, from the rarest iron armor of the Kofun period (5th century) to the inventive ceremonial helmets made toward the end of the age of the samurai. --Book Jacket.
