Compendium on Light Speed Travel James Essig,2017-05-26

Some theoreticians contemplate and formulate the physics of tachyons, which are hypothetical particles, that would always travel faster than light but which could never slow down to the speed of light just as they anticipate sublight speed massive particles never being able to achieve light speed. So my theoretical work on the physics and kinematics of light-speed massive systems sets me apart from general trends in the theoretical field of relativistic astronautics. This book is a continuation of how and why we may be able to, at some future time, travel at the speed of light.

Weep Not for Your Children Lisa Isherwood, Rosemary Radford
Ruether, 2016-06-16 Violence remains endemic in today's society.
Religious morality and social prejudice can lead to many acts of
violence going unnoticed. 'Weep Not for Your Children' presents a

selection of essays that examine the ways in which religion and violence interconnect. The presence of violence in the origins of cultural and religious norms is examined. The essays cover a wide range of examples of violence: from the Holocaust to domestic violence and from the violence created by economic systems to that created by the construction of gender itself. 'Weep Not for Your Children' challenges and provokes the reader to think beyond traditional associations of good and evil.

From Deluge to Discourse Deborah Lynn Porter, 1996-07-03

Starting with a reevaluation of the critical scholarship done on the Chinese text, the Mu T'ien-tzu chuan, the author challenges the view of the text as a product of historical composition. Porter then argues that the discursive structures of flood myths, elements of which appear in the Mu T'ien-tzu chuan, have their origins in an attempt to mediate linguistically the frightening consequences of the falsification of cosmological truths. The heuristic potential of the psychoanalytical theory of the symbol is used to explain the specific cosmogonic intentions underlying the genesis of myth, as well as broader manifestations of historical, social, and cultural behavior, most particularly literary works like the Mu T'ien-tzu chuan. The author explains how mythic symbols invested with

cosmogonic and regenerative significance are appropriated in the literary resolution of a socio-political trauma analogous to those mediated by flood myths. Finally, she argues that not simply the Mu T'ien-tzu chuan but Chinese fictional discourse in general is most appropriately understood as a wholly symbolic form.

A Guide to the Phenomenology of Religion James L.

Cox,2006-06-15 The phenomenological method in the study of religions has provided the linchpin supporting the argument that Religious Studies constitutes an academic discipline in its own right and thus that it is irreducible either to theology or to the social sciences. This book examines the figures whom the author regards as having been most influential in creating a phenomenology of religion. Background factors drawn from philosophy, theology and the social sciences are traced before examining the thinking of scholars within the Dutch, British and North American 'schools' of religious phenomenology.

Mirror of His Beauty Peter Schäfer,2004-10-17 In this

beautifully realized study, Peter Schäfer investigates the origins of a female manifestation of God in Jewish mysticism. The search itself is a fascinating exploration of the idea of a feminine divinity. And Schäfer's surprising but persuasive conclusions yield deeper

understanding of the complex but frequently intimate relationship between Christianity and Judaism--and of the development of religious concepts more generally. Toward the end of the twelfth century, a small book titled the Bahir (Light) appeared in Provence. The first document of Judaism's emerging kabbalistic movement, it introduced a completely new view of God, one that included a divine potency that was essentially female. This female divinity was portrayed both as a mediator between Jews and God and as part of the Godhead itself. Examining Judaic history from the biblical Wisdom tradition to the Middle Ages, Schäfer finds some precedents for the Kabbalah's feminine divinity. But he cannot account for her forceful appearance in twelfth-century southern France without reference to the immediate Christian environment, particularly the flourishing veneration of the Virgin Mary. Indeed, twelfth-century Jews and Christians were simultaneously rediscovering the feminine as an aspect of the Godhead after having abandoned it in favor of either an abstract, disembodied God or an exclusively male one. In proposing that the medieval cult of Mary--rather than eastern Gnosticism--is the appropriate framework for understanding the feminine elements in Jewish mysticism, *Mirror of His Beauty* represents a sea change in

Kabbalah and Jewish-Christian cultural studies. It shifts our attention from the Byzantine East to the Latin Christian West. And in contrast to histories that treat the development of Judaism and Christianity in isolation, it leads us to a fuller understanding of Jews and Christians living in proximity, aware of each other.

The Nine Freedoms George King, 2014-03-29 The Nine Freedoms is not just another book—it is a Mission of Truth given to mortal man so that he may climb the nine steps to—Living Immortality. It is the first Metaphysical text book which clearly outlines the exact path through Evolution which man must take in order to become God-man. This book will give all who read it the major steps towards attainment of the wonderful state of Cosmic Consciousness, then later explain how to pass through the most elevated state possible to man upon Earth, that of—Ascension. Yet, The Nine Freedoms does not stop here! It goes even further than the Bible, the Baghavad-Gita, or the Buddhist conception of Nirvana. For within these pages, the sacred wisdom, kept from man since his inception upon Earth, is now given, revealing the way in which he will eventually attain the glorious state of—Interplanetary Existence. The book consists of a mystical text of profound philosophical and occult significance and a searching

commentary on the most important parts of this text. The soul of this book is the Text, which was delivered as 9 consecutive Transmissions by a prominent Master of unquestionable Cosmic Status. The body of this book is made up of the commentary written as a series of carefully thought out essays which reveal the profound Truths contained within the words of the unique Text. As the body of man is a physical reflection of his soul, so are the commentaries a reflection and readily understandable simplification of the all-embracing jewels of Wisdom which form the Mystical Text. As the pages of The Nine Freedoms are turned, the reader becomes aware that he is being taken on the longest, the most dramatic, most important journey of all—the voyage across the nine seas of his Evolution. Here, for the first time in history, the passage through the classrooms of Earth to glorious worlds of lasting achievement beyond—is laid out in intimate detail. The same profound effect which was experienced by those serious, Metaphysical student already exposed to a series of lectures on The Nine Freedoms, will be enjoyed by every reader, especially as no one will read this book by chance. The individual Karmic pattern of every student of this text book has determined that he shall be given the Divine opportunity of an Initiation into Truths never before

revealed to mankind.

Sea Fortune Burkhardt Wolf,2020-10-12 Sea fortune has always been an issue of good faith and good navigation. While in antiquity, fortuna gubernatrix was praised for shielding the seaborne trade, in the Renaissance fortuna symbolized the conquest of chance and danger. Under such auspices, while relying on risk technologies modern seafaring has never lost its adventurous dimension. Understanding their origin remains a challenge for the history of science and the history of literature.

A Psychohistory of Metaphors Brian J. McVeigh, 2016-04-04

How have figures of speech configured new concepts of time, space, and mind throughout history? Brian J. McVeigh answers this question in *A Psychohistory of Metaphors: Envisioning Time, Space, and Self through the Centuries* by exploring “meta-framing:” our ever-increasing capability to “step back” from the environment, search out its familiar features to explain the unfamiliar, and generate “as if” forms of knowledge and metaphors of location and vision. This book demonstrates how analogizing and abstracting have altered spatio-visual perceptions, expanding our introspective capabilities and allowing us to adapt to changing social circumstances.

The Reader Must Understand Kent E. Brower, Mark W.

Elliott, 2013-11-05 *The reader must understand* is a more forceful translation of the words usually rendered let the reader understand in Mark 13:14. Translated this way, this volume's title stresses the importance of eschatology for Bible readers and theologians. Eschatology, the study of the last things, is central to New Testament studies and, indeed, is not without importance for the

Old Testament. The Bible's eschatology and its place in Christian theology must therefore be taken very seriously. The essays in this volume, most of which were presented at the Tyndale Fellowship Triennial Conference 1997, offer new and important ideas and analysis. They cover five main areas--biblical theology, Old Testament, New Testament, Christian doctrine, and practical theology--and significant contributions are made in each area

The Mayan Factor José Argüelles, 1987-04-01 Visionary historian Arguelles unravels the harmonic code of the ancient Maya providing valuable keys to understanding the next twenty years of human evolution.

Machines for Making Gods Jon Bialecki, 2022-03-01 The Mormon faith may seem so different from aspirations to transcend the human through technological means that it is hard to imagine how these two concerns could even exist alongside one another, let alone serve together as the joint impetus for a social movement. *Machines for Making Gods* investigates the tensions between science and religion through which an imaginative group of young Mormons and ex-Mormons have found new ways of understanding the world. The Mormon Transhumanist Association (MTA) believes that God intended humanity to achieve Mormonism's promise of

theosis through imminent technological advances. Drawing on a nineteenth-century Mormon tradition of religious speculation to reimagine Mormon eschatological hopes as near-future technological possibilities, they envision such current and possible advances as cryonic preservation, computer simulation, and quantum archeology as paving the way for the resurrection of the dead, the creation of worlds without end, and promise of undergoing theosis—of becoming a god. Addressing the role of speculation in the anthropology of religion, *Machines for Making Gods* undoes debates about secular transhumanism's relation to religion by highlighting the differences an explicitly religious transhumanism makes. Charting the conflicts and resonances between secular transhumanism and Mormonism, Bialecki shows how religious speculation has opened up imaginative horizons to give birth to new forms of Mormonism, including a particular progressive branch of the faith and even such formations as queer polygamy. The book also reveals how the MTA's speculative account of God and technology together has helped to forestall some of the social pressure that comes with apostasy in much of the Mormon Intermountain West. A fascinating ethnography of a group with much to say about crucial junctures of modern culture,

Machines for Making Gods illustrates how the scientific imagination can be better understood when viewed through anthropological accounts of myth.

Echoland Gerald Gillespie, 2006 This book follows several major European literary «echoes» still reverberating since the mysterious emergence of such archetypal figures as Faust, Hamlet, Quixote, and Don Juan alongside lingering ancient and medieval protagonists in the Renaissance. Four centuries of attempts to redefine «modern» identity are traced against the evolution of a new genre of totalizing encyclopaedic literature, the «humoristic» tradition which re-weaves the positive and negative strands of the European, and today also New World, «grand narrative.» The book's method, inspired by Joyce, is to «listen» to recurrent motifs in the cultural flow from Humanism to Postmodernism for clues to an identity transcending the personal.

I Rant, Therefore I Am Dennis Miller, 2001-06-05 Once again there's good news for those of us who rage at the evening news, shake our heads at Washington's business-as-usual, or watch as politicians carom helplessly between political crises and sex scandals: Dennis Miller is back with his third installment of hilarious observations, *I Rant, Therefore I Am*. Dennis Miller first gained

national acclaim as the wise-guy anchor of Weekend Update on Saturday Night Live. When HBO premiered his weekly talk show in April 1994, both critics and fans enthusiastically agreed: Dennis Miller Live was the most refreshing talk show on television. The accolades have continued to pour in. In September 1994, Dennis and his staff won an Emmy Award for writing and have been regularly nominated since. When he takes the stage, the audience demands, The rants, the rants, the rants, and once again, Dennis Miller delivers the goods. Fans of his smart, quirky, irreverent style of humor are in for another treat-this set of rants is even funnier than the last two rounds. Dennis Miller keeps on ranting in I Rant, Therefore I Am, and speaks his mind on topics like: MODELS-How ironic that the most exquisite-looking people in the world should end up choosing the profession that requires them to spend all day by the phone waiting for the most hideous people to call them. COLLEGE-I don't think you should have to pay back college loans unless you get a job in your field. Put some pressure on the school. If I can't pay my bills, I'm not paying yours. CONSUMERS-You know how to tell when you've got a shopping problem? When the lights in the department store momentarily dim after they slide your credit card through the thing. FAITH-I envy people who can

just let go and totally commit. I, on the other hand, can't even hear the title of the show 'Touched by an Angel' without thinking that a professional baseball player is being sued for sexual harassment. ASTRONAUTS-Anybody who would strap themselves onto a giant deodorant spray can, set off a series of explosions under their ass until they've been blasted into the icy vacuum of deep space, and then step outside to take a walk must have more balls than a twenty-four-hour Tokyo driving range.

Capitalism and Christianity, American Style William E.

Connolly,2008-04-09 Prominent political theorist considers the intertwined relationship between capitalism and Christianity and its effects on contemporary U.S. politics.

Search for Gods V. Vycinas,2012-12-06 In the unequalled and majestic contemporary technological phase of our cultural development, where democratic liberties and the means of well being are accessible to everyone; man is unsatisfied, insecure, rebellious, confused and lost. More than ever before he seems to lack the sureness of his way in life. The abundance of theories, doctrines and various philosophical, social or religious systems and moral teachings fails to provide the individual today with any clarity whatsoever. Lacking this, he turns to peripheral events, to

sensational occurrences; he turns his attention to more and to glaring new models of technological products. more new things, mostly Acquiring a great multitude of these and various other things, he seems to stress his own importance, thus making an inquiry in its fundamental validity superfluous. In this way he escapes the search of his very own mission; he betrays the superior powers which demand from him his existential contribution in finding his ideals and outlining the way of his life.
