The Clash of Empires and the Rise of Kurdish Proto-Nationalism, 1905-1926 Mehrdad Kia, 2023-12-21 This book focuses on the rise of Kurdish nationalism in northwestern Iran in the context of the emergence of the Kurdish leader, Ismail Agha Simko, who organized a movement to establish a Kurdish state between 1918 and 1922. The rise of Simko is analyzed in the historical framework of the collapse of the Russian and Ottoman empires, as well as the disappearance of Iranian governmental authority in various provinces of the country during and after the end of the First World War. The book also investigates the impact of Iranian, Turkish, and Assyrian nationalisms on Simko and his movement. Drawing upon original documents, the author provides an in-depth analysis of the political, and socio-economic causes for the rise of proto-Kurdish nationalism in northwestern Iran during and after the Great War.

Holidays in Blue Eve Morton,2020-12-07 Sometimes it takes a little ice to discover a whole lot of heat. Cosmin Tessler is going home for Christmas. Eric Campbell is too. Neither expected a homecoming quite like this. When Cosmin Tessler's radio show is canceled and Eric Campbell's acting jobs dry up, they find themselves unexpectedly back in their old Toronto neighborhood...and back in each other's lives years after they'd gone their separate ways. With a series of failed relationships and one ill-advised marriage behind them, both believe their chance for love has come and gone. Luck, in the form of a massive ice storm, throws the former neighbors together again and they find themselves stranded, alone, for Christmas. Despite their difference in age, long-ago crushes and undeniable attraction prove too

much to resist. But when the ice melts, only time will tell if their burgeoning romance will become just another missed chance—or a love story whose time has finally come.

Classical and Quantum Aspects of Gravity in Relation to the Emergent Paradigm Sumanta Chakraborty,2017-08-01

This thesis explores the connection between gravity and thermodynamics and provides a unification scheme that opens up new directions of exploration. Further elaborating on the Hawking effect and the possibility of singularity avoidance, the author not only discusses the information loss paradox at a broader level but also provides a possible solution to it. As the final frontier, it describes some novel effects arising from the microscopic structure of spacetime. Taken as a whole, the thesis addresses three major research areas in gravitational physics: it starts with classical gravity, proceeds to the black hole information loss paradox, and closes with Planck scale physics. The thesis is written in a lucid and pedagogical style, with an introduction accessible to researchers from other branches of physics and a discussion presenting open questions and future directions, which will benefit and hopefully inspire next-generation researchers.

Abusing Over the Counter Drugs: Illicit Uses for Everyday Drugs Kim Etingoff,2014-09-02 The government has approved them. You don't need a prescription. You can get them at practically any supermarket. So obviously over-the-counter medications can't be dangerous, right? Wrong. When taken in ways other than directed, over-the-counter medications can be just as dangerous as many illegal drugs. And because there's a false sense of security about the medications—and because they are in almost everyone's home medicine cabinet—the abuse and misuse of over-the-counter medications are on the rise. **Abusing Over-the-Counter Drugs: Illicit Uses for Everyday Drugs** presents the facts about this alarming trend. You'll learn what drugs are most misused, the effects of misused over-the-counter medications, and what the government is doing to stem the problem. You will also find suggestions on how to get help to stop abusing over-the-counter medications.

Early Indicators of Cognitive Decline, Alzheimer's Disease, and Related Dementias Captured by Neurophysiological Tools Alexandra Wolf, Elena Salobrar-Garcia, D. S. V. Bandara, Karine Ravienna, 2024-04-19 Major neurocognitive disorders are one of the leading causes of disability and dependency among the elderly worldwide. Notably, their far-reaching impact extends beyond the estimated 50 million people currently living with a major neurocognitive disorder. As the conversion to Alzheimer's disease

(AD) progresses, patients' symptoms (e.g., memory loss, severe impairments in thinking and behavior) place a heavy toll on their caregivers, family, and friends, who face emotional frustration, coupled with great financial stress. Furthermore, in terms of global cost estimation, the World Health Organization predicted that by 2030, the treatment of patients with AD and other forms of acquired cognitive impairment will cost the healthcare system US\$1.7 trillion (or US\$2.8 trillion, if corrected for the increase in care costs).

Mathematical Problem Posing Florence Mihaela

Singer, Nerida F. Ellerton, Jinfa Cai, 2015-06-12 The mathematics education community continues to contribute research-based ideas for developing and improving problem posing as an inquiry-based instructional strategy for enhancing students' learning. A large number of studies have been conducted which have covered many research topics and methodological aspects of teaching and learning mathematics through problem posing. The Authors' groundwork has shown that many of these studies predict positive outcomes from implementing problem posing on: student knowledge, problem solving and posing skills, creativity and disposition toward mathematics. This book examines, in-depth, the contribution of a problem posing approach to teaching mathematics and discusses the impact of adopting this approach on the development of theoretical frameworks, teaching practices and research on mathematical problem posing over the last 50 years.
