As games grow ever-more ubiquitous in our culture and communities, they have become popular staples in public library collections and are increasing in prominence in academic ones. Many librarians, especially those who are not themselves gamers or are only acquainted with a handful of games, are ill-prepared to successfully advise patrons who use games. This book provides the tools to help adult and youth services librarians to better understand the gaming landscape and better serve gamers in discovery of new games—whether they are new to gaming or seasoned players—through advisory services. This book maps all types of games—board, roleplaying, digital, and virtual reality—providing all the information needed to understand and appropriately recommend games to library users. Organized by game type, hundreds of descriptions offer not only bibliographic information (title, publication date, series, and format/platform), but genre classifications, target age ranges for players, notes on gameplay and user behavior type, and short descriptions of the game's basic premise and appeals.

Contemporary Research on Intertextuality in Video Games Duret, Christophe, Pons, Christian-Marie, 2016-06-16 Culture is dependent upon intertextuality to fuel the consumption and production of new media. The notion of intertextuality has gone through many iterations, but what remains constant is its stalwart application to bring to light what audiences value through the marriages of disparate ideology and references. Videogames, in particular, have a longstanding tradition of weaving texts together in multimedia formats that interact directly with players. *Contemporary Research on Intertextuality in Video Games* brings together game scholars to analyze the impact of video games through the lenses of transmediality, intermediality, hypertextuality, architextuality, and paratextuality. Unique in its endeavor, this publication discusses the vast web of interconnected texts that feed into digital games and their players. This book is essential reading for game theorists, designers, sociologists, and researchers in the fields of communication sciences, literature, and media studies.
