Cubed Erno Rubik,2020-09-15 The first book by the reclusive inventor of the world’s most iconic puzzle THE RUBIK’S CUBE. Erno Rubik inspires us with what he’s learned in a lifetime of creating, curiosity, and discovery. Erno Rubik was a child when he first became obsessed with puzzles of all kinds. “Puzzles,” he writes, “bring out important qualities in each of us: concentration, curiosity, a sense of play, the eagerness to discover a solution.” To Rubik puzzles aren’t just games—they’re creativity machines. He encourages us to embrace our inner curiosity and find the puzzles that surround us in our everyday lives. “If you are determined, you will solve them,” he writes. Rubik’s own puzzle, the Cube, went on to be solved by millions worldwide for over forty years, become one of the bestselling toys of all time, and to be featured as a global symbol of intelligence and ingenuity. In Cubed, Rubik covers more than just his journey to inventing his eponymous cube. He makes a case for always being an amateur—something he has always considered himself to be. He discusses the inevitability of problems during any act of invention. He reveals what it was like to experience the astonishing worldwide success of an object he made purely for his own play. And he offers what he thinks it means to be a true creator (hint: anyone can do it). Steeped in the wisdom and also the humility of a born inventor, Cubed offers a unique look at the imperfect science of creation.

Fast Forward Holly Willis,2016-08-16 Cinema, the primary vehicle for storytelling in the twentieth century, is being reconfigured by new media in the twenty-first. Terms such as worldbuilding, virtual reality, and transmedia introduce new methods for constructing a screenplay and experiencing and sharing a story. Similarly, 3D cinematography, hypercinema, and visual effects require different modes for composing an image, and virtual technology, motion capture, and previsualization completely rearrange the traditional flow of cinematic production. What does this mean for telling stories? Fast Forward answers this question by investigating a full range of contemporary creative practices dedicated to the future of mediated storytelling and by connecting with a new generation of filmmakers, screenwriters, technologists, media artists, and designers to discover how they work now, and toward what end. From Chris Milk and Aaron Koblin's exploration of VR spherical filmmaking to Rebeca Méndez's projection and installation work exploring climate change to the richly mediated interactive live performances of the collective Cloud Eye Control, this volume captures a moment of creative evolution and sets the stage for imagining the future of the cinematic arts.
