Curtiss 75 "Hawk". Seweryn Fleischer,2000

P-36 Hawk Aces of World War 2 Lionel Persyn,Kari Stenman,Andrew

Thomas,2012-12-20 The Curtiss P-36 was considered a revolution in performance design in comparison to other US fighters. Yet by the time of the Japanese attack on Pearl Harbor the P-40 was increasingly supplanting the P-36, which the US then exported to France under the guise of the Hawk 75. Flown by the French, captured by the Germans, sold to the Finns, transferred to India and Africa, and even incorporated into the RAF, the Hawk 75 saw service in every theatre of operations and in a variety of combat environments. This book depicts the fascinating life of a plane that fought on both sides in the war, with colour artwork, photographs and first-hand accounts.

CURTISS MOHAWK Phil H. Listemann, 2016-11-11 The Curtiss Hawk 75 was the export version of the USAAC Curtiss P-36 that became, from 1936 onwards, the standard American single-seat fighter and represented a big step forward for the USAAC. The French were the first to express interest in this fighter and ordered large quantities before and during the first months of WW2. When the French ask for an armistice, all of the contracts were taken over by the British and the balance of the Curtiss H-75 still to be delivered were shipped out to the UK where they became the Mohawk. The RAF also took charge of more Mohawks coming from various sources and in all over 200 Mohawks were included in the RAF inventory. Some were handed over to the SAAF where they served in East Africa, while most would be sent to the Far East where they served until the end of 1943. The full story of the Mohawk in the RAF and in the SAAF is here told in 50 pages illustrated with 55 photos

and 7 colour profiles.

Curtiss Army Hawks in Action Larry Davis, Joe Sewell, 1992

French Aces of World War 2 Barry Ketley, 1999-09-15 French pilots endured fighting both with and against the Allies during World War 2. Possessing obsolescent aircraft at the outbreak of the war, the Armée de l'Air was decimated in the wake of the Blitzkrieg; however, a number of fighter units still achieved creditable scores flying Curtiss Hawks, Morane MS.406s and Dewoitine D.520s. Following the capitulation of France at the end of June 1940, many aces continued to fly with the now Vichy French Squadrons that were stationed in North Africa, and a number of these pilots subsequently saw action against their former Allies there. Numerous French pilots also escaped to Britain, and a handful achieved notable success with the RAF flying Hurricanes, Spitfires and Tempests. In Russia, the formation of the French-manned 'Normandie-Niemen' regiment in 1943 also saw nearly 40 pilots achieve ace status flying Yak fighters on the Eastern Front.

The Curtiss P-36/P40 Series in USAAC/USAAF Service H. C. Bridgwater, Jon (Jon Paul) Freeman, 2001

Curtiss Fighter Aircraft Francis H. Dean, 2006-11 Making use of primary Curtiss documents, as well as the combined resources of the world's leading historians of the subject, the authors have skillfully resolved myths and woven a comprehensive study of the often very confusing story of these classic airplanes. Making use of previously unpublished documents and photographs, this massive, life-long work will stand as a legacy to the memory of those wonderful shapes, the men and women who built them, flew them and took them to war, and the lasting contributions they have made, collectively, to aviation

history and the defense of democracy.

The German Aces Speak Colin D. Heaton, Anne-Marie Lewis, Brig. Gen. Robin Olds, USAF (Ret.), Oberleutnant Kurt Schulze, 2011-11-15
DIVDIVFor the first time, four German WWII pilots share their side of the story./divDIV/divDIVFew perspectives epitomize the sheer drama and sacrifice of combat more perfectly than those of the fighter pilots of World War II. As romanticized as any soldier in history, the WWII fighter pilot was viewed as larger than life: a dashing soul waging war amongst the clouds. In the sixty-five-plus years since the Allied victory, stories of these pilots' heroics have never been in short supply. But what about their adversaries—the highly skilled German aviators who pushed the Allies to the very brink of defeat?/divDIV/divDIVOf all of the Luftwaffe's fighter aces, the stories of Walter Krupinski, Adolf Galland, Eduard Neumann, and Wolfgang Falck shine particularly bright. In The German Aces Speak, for the first time in any book, these four prominent and influential Luftwaffe fighter pilots reminisce candidly about their service in World War II. Personally interviewed by author and military historian Colin Heaton, they bring the past to life as they tell their stories about the war, their battles, their lives, and, perhaps most importantly, how they felt about serving under the Nazi leadership of Hermann Göring and Adolf Hitler. From thrilling air battles to conflicts on the ground with their own commanders, the aces' memories disclose a side of World War II that has gone largely unseen by the American public: the experience of the German pilot./div/div

Mohawks Over Burma Gerry Beauchamp, 1985

Enemy at the Gates Justo Miranda, 2019-12-08
When the Nazis started to threaten the world with their efficient machine of propaganda, the main concern of European

governments was the overwhelming reaction of panic that the expected bombing of the Luftwaffe might cause within the civil population. During the Munich Agreement in 1938, the democracies were defended by old biplanes and a bunch of modern fighters: 50 Hurricanes, 20 Morane-405 and 5 Fokker D.XXI. France and Great Britain took up the production of USA airplanes and cancelled exports to small countries, which were forced to design and build their own PANIC FIGHTERS with the intelligence and skill that desperation provides. When nothing seemed able to contain the German advance, France, Great Britain and the USSR developed several programs of emergency fighters, as did Australia, to face the Japanese expansion. At the time the course of events switched, it was the Axis powers that had to create their own PANIC FIGHTERS, some of them suicidal. The present book includes several last resource designs of fighters that are practically unknown and that were developed in times of tribulation by Australia, Belgium, Bulgaria, Canada, Czechoslovakia, Denmark, Estonia, Finland, France, Germany, Great Britain, Hungary, Japan, Yugoslavia, Latvia, Netherland, Poland, Romania, Sweden and Switzerland.

Curtiss P-40 Carl Molesworth, 2013-05-21 This volume details the design, development, and operational history of the Curtiss P-40, the primary American fighter when the country entered World War II.

Combat Squadrons of the Air Force; World War II. Maurer Maurer, 1969 This collection of squadron histories has been prepared by the USAF Historical Division to complement the Division's book, Air Force Combat Units of World War II. The 1,226 units covered by this volume are the combat (tactical) squadrons that were active between 7 December 1941 and 2 September 1945. Each squadron is traced from its beginning through

5 March 1963, the fiftieth anniversary of the organization of the 1st Aero (later Bombardment) Squadron, the first Army unit to be equipped with aircraft for tactical operations. For each squadron there is a statement of the official lineage and data on the unit's assignments, stations, aircraft and missiles, operations, service streamers, campaign participation, decorations, and emblem.

Birdmen Lawrence Goldstone, 2014-05-06 From acclaimed historian Lawrence Goldstone comes a thrilling narrative of courage, determination, and competition: the story of the intense rivalry that fueled the rise of American aviation. The feud between this nation's great air pioneers, the Wright brothers and Glenn Curtiss, was a collision of unyielding and profoundly American personalities. On one side, a pair of tenacious siblings who together had solved the centuries-old riddle of powered, heavier-than-air flight. On the other, an audacious motorcycle racer whose innovative aircraft became synonymous in the public mind with death-defying stunts. For more than a decade, they battled each other in court, at air shows, and in the newspapers. The outcome of this contest of wills would shape the course of aviation history—and take a fearsome toll on the men involved. Birdmen sets the engrossing story of the Wrights' war with Curtiss against the thrilling backdrop of the early years of manned flight, and is rich with period detail and larger-than-life personalities: Thomas Scott Baldwin, or "Cap't Tom" as he styled himself, who invented the parachute and almost convinced the world that balloons were the future of aviation; John Moisant, the dapper daredevil who took to the skies after three failed attempts to overthrow the government of El Salvador, then quickly emerged as a celebrity flyer; and Harriet Quimby, the statuesque silent-film beauty who became the first woman to fly across

the English Channel. And then there is Lincoln Beachey, perhaps the greatest aviator who ever lived, who dazzled crowds with an array of trademark twists and dives—and best embodied the romance with death that fueled so many of aviation’s earliest heroes. A dramatic story of unimaginable bravery in the air and brutal competition on the ground, *Birdmen* is at once a thrill ride through flight’s wild early years and a surprising look at the personal clash that fueled America’s race to the skies. Praise for *Birdmen* “A meticulously researched account of the first few hectic, tangled years of aviation and the curious characters who pursued it . . . a worthy companion to Richard Holmes’s marvelous history of ballooning, *Falling Upwards*.”—*Time* “The daredevil scientists and engineers who forged the field of aeronautics spring vividly to life in Lawrence Goldstone’s history.”—*Nature* “The history of the development of an integral part of the modern world and a fascinating portrayal of how a group of men and women achieved a dream that had captivated humanity for centuries.”—*The Christian Science Monitor* “Captivating and wonderfully presented . . . a fine book about these rival pioneers.”—*The Wall Street Journal* “[A] vivid story of invention, vendettas, derring-do, media hype and patent fights [with] modern resonance.”—*Financial Times* “A powerful story that contrasts soaring hopes with the anchors of ego and courtroom.”—*Kirkus Reviews* “A riveting narrative about the pioneering era of aeronautics in America and beyond . . . Goldstone raises questions of enduring importance regarding innovation and the indefinite exertion of control over ideas that go public.”—*Publishers Weekly* (starred review)

French Aircraft 1939-1942: Dewoitine to Potez André Jouineau, Dominique Breffort, 2005-04 Thanks to this second volume, every single one of France's combat aircraft

(fighters, bombers and recce aircraft) in the early years of W.W.II is now offered to the international audience, including the lesser known types. Each type is featured with an historical text, period photographs and color profiles.

The Curtiss Hawks Page Shamburger, Joe Christy, 1972

56th Fighter Group Roger Freeman, 2012-09-20 One of the first Thunderbolt groups to see action in the European Theatre of Operations (ETO) with the US Army Air Forces, the 56th Fighter Group (FG) was also the only fighter unit within the Eighth Air Force to remain equipped with the mighty P-47 until war's end. Led by the inspirational 'Hub' Zemke, this group was responsible for devising many of the bomber escort tactics employed by VIII Fighter Command between 1943 and 1945. By VE-Day the 56th FG had shot down 100 more enemy aircraft than any other group in the Eighth Air Force, its pilots being credited with 677 kills during 447 missions. The exploits of this elite fighter unit are detailed in this volume together with photographs, their aircraft profiles and insignia.
