**USS Enterprise (CVN-65)** Mark L. Evans, 2022-06-30 This is the thrilling story of USS Enterprise (CVN-65), the world's first nuclear-powered aircraft carrier. Her story spans 51 years (1961-2012) of active service from the brink of nuclear war during the Cuban Missile Crisis to the first global cruise by nuclear-powered ships, to the first strikes during the Vietnam War, battles against the Iranians and Iraqis in the 1980s and 1990s, a pivotal role during 9/11 and the Global War on Terrorism, and hunting pirates off the Horn of Africa. More than just an operational history of Enterprise, this book recounts the experiences of the men and women who served on board-- the pilots who flew from the flight deck, the men who fought to save the ship during a fire in 1969, the sailors who brought retribution against Al-Qaeda terrorists--with detailed descriptions of sorties through flak-filled skies and harrowing escapes from capture behind enemy lines. This book is dedicated to the men and women who have served on board Big E, and to those who paid the ultimate price for freedom.

**A Survival Analysis of the Tanks and Voids on USS John F. Kennedy (CV 67) and USS Enterprise (CVN 65)** Charles R. Cordon, 1997-03-01 The maintenance of an aircraft carrier's tanks and voids has a direct impact on ship operability and service life. The scheduling of inspections and repair work for these tanks and voids poses a significant problem for the carrier maintenance community. This thesis contributes to refining strategy in the repair planning process by providing the framework for building comprehensive tank and void database files. To demonstrate this, repair history files are constructed for USS John F. Kennedy (CV 67) and USS Enterprise (CVN 65). These files consolidate tank and void repair documentation from the myriad of carrier maintenance agencies and comprise the most complete database for these ships. A similar database can be developed for all the carriers by duplicating this effort. A life cycle analysis of the data reveals that paint coating failure rates are more similar among tanks and voids on the same ship rather than among tanks of the same functional type. A case study for CV-67 examines model accuracy and predicts the expected number of coating failures at a future maintenance period. The lessons learned in this thesis directly supports a follow on study of the JP-5 tanks on the Nimitz class aircraft carriers.

*The US Navy Today* Thomas York, 1986 A lavishly illustrated book about the navy, its history and structure.

*On Wide Seas* Claude Berube, 2021-12-14 A detailed account of how the US Navy modernized itself between the War of 1812 and the Civil War, through strategic approaches to its personnel, operations, technologies, and policies, among them an emerging officer corps, which sought to professionalize its own ranks, modernize the platforms on which it sailed, and define its own role within national affairs and in the broader global maritime commons--

**Topgun** Dan Pedersen, 2019-03-05 NATIONAL BESTSELLER If you loved the movie, you will love the real story in the book. -- Fox & Friends On the 50th anniversary of the creation of the Topgun Navy Fighter School, its founder shares the remarkable inside story of how he and eight other risk-takers revolutionized the art of aerial combat. When American fighter jets were being downed at an unprecedented rate during the Vietnam War, the U.S. Navy turned to a young lieutenant commander, Dan Pedersen, to figure out a way to reverse their dark fortune. On a shoestring budget and with little support, Pedersen picked eight of the finest pilots to help train a new generation to bend jets like the F-4 Phantom to their will and learn how to dogfight all over again. What resulted was nothing short of a revolution -- one that took young American pilots from the crucible of combat training in the California desert to the blistering skies of Vietnam, in the process raising America's Navy combat kill ratio from two enemy planes downed for every American plane lost to more than 22 to 1. Topgun emerged not only as an icon of America's military dominance immortalized by Hollywood but as a vital institution that would shape the nation's military strategy for generations to come. Pedersen takes readers on a colorful and thrilling ride -- from Miramar to Area 51 to the decks of aircraft carriers in war and peace--through a historic moment in air warfare. He helped establish a legacy that was built by him and his Original Eight -- the best of the best -- and carried on for six decades by some of America's greatest leaders. Topgun is a heartfelt and personal testimony to patriotism, sacrifice, and American innovation and daring.

**On Yankee Station** John B. Nichols, 2013-03-11 Combining vivid personal narrative with historical and operational analyses, this book takes a candid look at U.S. naval airpower in the Vietnam War. Coauthors John Nichols, a fighter pilot in the war, and Barrett Tillman, an award-winning aviation historian, make full use of their extensive knowledge of the subject to detail the ways in which airpower was employed in the years prior to the fall of Saigon. Confronting the conventional belief that airpower failed in Vietnam, they show that when applied correctly, airpower was effective, but because it was often misunderstood and misapplied, the end results were

catastrophic. Their book offers a compelling view of what it was like to fly from Yankee Station between 1964 and 1973 and important lessons for future conflicts. At the same time, it adds important facts to the permanent war record. Following an analysis of the state of carrier aviation in 1964 and a definition of the rules of engagement, it describes the tactics used in strike warfare, the airborne and surface threats, electronic countermeasures, and search and rescue. It also examines the influence of political decisions on the conduct of the war and the changing nature of the Communist opposition. Appendixes provide useful statistical data on carrier deployments, combat sorties, and aircraft losses.

Patch Guide Michael L. Roberts, 1992-06-01 Attack aircraft carriers, battleships, destroyers, frigates, light and heavy cruisers, and patrol crafts. 1,300 different ships and submarines from WWII, Korea, Vietnam, and the Gulf War have their crests displayed in brilliant full color. This book is an encyclopedia, preserving the emblems that reflect the pride of the crews belonging to the best ships in the U.S. Navy.

**Letters to Evelyn** John Selman, 2014-04-02 I've just written my memoir and I'm inviting anyone mature enough to read it. After what I've been through with my biological father, I've had to sail an aircraft carrier, fly planes, march across distances, drive cars, run off, walk fast, and run away more than 130,000 miles from him. It has been a long time apart from everything that I wanted to be known for and my fingers are feeling like piano keys struck by Mozart because of how important some of these thoughts are. These recorded memories are more than forgettable. I've been suffering a shellacking from genetically unrelated family that has caused me to be thought of by people as a humiliated victim, an outsider, a sickly mental health patient, a schizophrenic. So, I had to put my thoughts down on paper. I have a message to share, which is that every intelligent being has prime theological value of divinity. I have written it down and fortunately, these earthly philosophies and survival techniques always belonged to you, the reader holding my novella. Letters to Evelyn by John Selman, is now being kept on a motion picture studio index, and I'm more than lucky and very much ingloriously thankful to have been a recipient of an invitation from a producer who's worked with Arnold Schwarzenegger for a film to be processed. I'm finally finished with my work assembling these memories after 10 years of writing it, with much enthusiasm yet apprehensively. I was a navy pilot who followed my dreams of serving the United States in any way I could. In my tertiary education, I was the top student scholastically in my NROTC class. And with my German language and Literature degree and 2 academic minors, I chose to fly airplanes and helicopters for the navy. My flight time has been spent in 10 different types of aircraft and I presently have 1 world record flying them, and I have a Northeast human endurance record from the time I spent visiting with my biological father and his former wife. My world record is for the steepest, highest Sarajevo Approach with the lowest recovery in a T-34C. I flew from 6000 feet down to five feet above the treetops onto Eglin AFB with a sustained and extended eighty-three degree nose down attitude on the dive and with maximum allowable aeronautical gravity uniformly almost exceeded on the wings and tail on the recovery. My U.S. Northeast record is for the longest time spent with no sleep, greater than 12 days once being poisoned with food after psychological threats against me. Notwithstanding these setbacks, I still graduated from University education, and still had managed to fly navy planes. These clear recollections are perfectly assembled into one volume that I will be using in a court of law against criminals.

**WESTPAC: A Sailor's Story** Joe Brulotte, 2024-01-05 About the Book After 47 years of service, the veteran aircraft carrier USS Midway is now permanently moored as a museum in San Diego, California. Just a few yards from the ship stands the Kissing Sailor statue. If he had been a former enlisted Midway sailor, he would have probably kissed a girl in every port. While countless books tell the stories of high-ranking naval officers, such as Captain John Paul Jones, Admiral David Farragut, and Admiral Chester Nimitz, this book tells the story of the Navy as seen through the eyes of an enlisted sailor who served on the Midway during the Cold War. Armed with a swab and a bucket, he bumbled and stumbled his way on the ship in search of knowledge and adventure on the high seas and lands of the Far East, with the hopes that he wouldn't fall overboard before he got to the next exciting port. About the Author Joe Brulotte served as an Aerographer's Mate on the USS Midway (CV-41) for two years. He began the study of weather at the age of 15, worked as a weather specialist in the U.S. Navy for eight years, and has continued the study of meteorology and weather over the past fifty years. He holds a degree in science and mathematics, as well as a Master's Degree in U.S. Military History.

*US Cold War Aircraft Carriers* Brad Elward, 2014-03-18 Supercarriers became the ultimate in aircraft carrier design after World War II. Naval aviation allows fleets to project mobile power across vast distances, and these floating cities epitomize this mission design. The Forrestal class (Forrestal, CV-59; Saratoga, CV-60; Ranger, CV-61 and Independence, CV-62) was the first completed class of US Navy supercarriers, so-named for their 25 percent size increase over the World War II-era carriers such as the Midway class, and the strength of their air wings (80-100 aircraft, compared to 65-75 for the Midway, and fewer than 50 for the Essex class). Design-wise, the Forrestals were a huge improvement over their predecessors, being more stable and comfortable, while maintaining advancements such as the armored flight decks that had been introduced with the Midway. The Kitty Hawk class was an improvement on the Forrestal-class designs, and four were built in the 1960s - Kitty Hawk (CV-63), Constellation (CV-64), America (CV-66) and John F. Kennedy (CV-67). These were even longer than the Forrestals, and fitted with advanced defensive weapons systems and an improved elevator layout. John F. Kennedy, while originally intended as one of the Kitty Hawk class, received so many modifications during construction that she essentially formed her own class, and was originally planned to become the US Navy's first nuclear-powered carrier. This plan never came to fruition, however, and that honor was left to her successor, USS Enterprise (CVN-65). The only ship of her class, Enterprise holds several other distinctions - the longest naval vessel in the world, the second-oldest commissioned vessel in the US Navy (after the USS Constitution), and, when retired in 2013, will have served 51 years - far longer than any other US carrier. All nine of the carriers covered by this volume are icons, and hold a much-respected place in US naval history. They are also some of the more well-known vessels outside of the military, for their long service histories, as well as for some of the more unfortunate events that seem to follow them - from Kitty Hawk's infamous 1972 grilled cheese race riot, to the fires that ravaged Forrestal in 1967 and Enterprise in 1969. Though swiftly superseded, first by each other, then by the Nimitz class, these vessels were the US Navy's backbone during the Cold War.
