In fact, Gwenny Goblin, Che Centaur and Jenny Elf are just about the only creatures on Xanth who have been spared the sight of Mela Merwoman's undergarment--preoccupied as they are with helping Gwenny beat out her awful half-brother Gobble for chiefship of the goblin horde. But first they must master space and thyme . . . and find the fabulous egg that sits between the Roc and the hard place. Tiger Force Michael Sallah,Mitch Weiss,2006-05-15 At the outset of the Vietnam War, the Army created an experimental fighting unit that became known as Tiger Force. The Tigers were to be made up of the cream of the crop-the very best and bravest soldiers the American military could offer. They would be given a long leash, allowed to operate in the field with less supervision. Their mission was to seek out enemy compounds and hiding places so that bombing runs could be accurately targeted. They were to go where no troops had gone, to become one with the jungle, to leave themselves behind and get deep inside the enemy's mind. The experiment went terribly wrong. What happened during the seven months Tiger Force descended into the abyss is the stuff of nightmares. Their crimes were uncountable, their madness beyond imagination-so much so that for almost four decades, the story of Tiger Force was covered up under orders that stretched all the way to the White House. Records were scrubbed, documents were destroyed, men were told to say nothing. But one person didn't follow orders. The product of years of investigative reporting, interviews around the world, and the discovery of an astonishing array of classified information, Tiger Force is a masterpiece of journalism. Winners of the Pulitzer Prize for their Tiger Force reporting, Michael Sallah and Mitch Weiss have uncovered the last great secret of the Vietnam War.

Parasitology Alan Gunn,Sarah J. Pitt,2012-04-30 Parasitology: An Integrated Approach, provides a concise, student-friendly account of parasites and parasite relationships that is supported by case studies and suggestions for student projects. The book focuses strongly on parasite interactions with other pathogens and in particular parasite-HIV interactions, as well as looking at how host behaviour contributes to the spread of infections. There is a consideration of the positive aspects of parasite infections, how humans have used parasites for their own advantage and also how parasite infections affect the welfare of captive and domestic animals. The emphasis of Parasitology is on recent research throughout and each chapter ends with a brief discussion of future developments. This text is not simply an updated version of typical parasitology books but takes an integrated approach and explains how the study of parasites requires an understanding of a wide range of other topics from molecular biology and immunology to the interactions of parasites with both their hosts and other pathogens.

plot.-Saskatchewan Library Forum A New Dawn Rising is set in the fictional town of Laurel Creek, Georgia, just north of burgeoning Savannah in 1809. John Connolley, nearing thirty years old, yearns to own some land of his own but, though white, he was born into slavery. Raised like a son by his owner, Jacob Barlow, he soon learned he was property when Barlow thought he had tried to run. John was only fourteen years old. Now, fifteen years later, John faces the impossible task of raising enough money to live freely. Struggling with the humiliation of being rented out to rich ladies for their amusement, he loses the woman he loves. John hopes to be freed of the stigma of slavery and indeed hold the truths of the Declaration of Independence to be self-evident: that all men are created equal.

Taking Measure Scott Onstott, 2012-11-11 Taking Measure reveals patterns emergent in our universe from quantum to astronomic scales. Spatial and temporal codes appear in unexpected places, from our units of measure to the relationships between celestial bodies. Geometric and numeric encoding appears in architecture, in urban design, and in alignments across the Earth. Does this happen by pure coincidence, has it been done to preserve knowledge, or is it an ancient form of magic that continues to this day? Are the synchronicities we experience in our personal lives manifestations of these same patterns? This book takes a new look at familiar structures in the tangible world but also engages with the invisible world, including the question of consciousness.
