**A History of the Mediterranean Air War, 1940–1945** Christopher Shores,Giovanni Massimello,Russell Guest,Frank Olynyk,Winfried Bock,2016-08-05 The third volume in the epic military aviation series focuses on the Allied invasion of North Africa during World War II. This work of WWII history takes us to November 1942 to explain the background of the first major Anglo-American venture: Operation Torch, the invasion of French North Africa. Describing the fratricidal combat that followed the initial landings in Morocco and Algeria, it then considers the unsuccessful efforts to reach northern Tunisia before the Germans and Italians could get there to forestall the possibility of an attack from the west on the rear of the Afrika Korps forces, then beginning their retreat from El Alamein. The six months of hard fighting that followed, as the Allies built up the strength of their joint air forces and gradually wrested control of the skies from the Axis, are recounted in detail. The continuing story of the Western Desert Air Force is told, as it advanced from the east to join hands with the units in the west. Also covered are the arrivals over the front of American pilots and crew, the P-38 Lightning, the Spitfire IX, and the B-17 Flying Fortress—and of the much-feared Focke-Wulf Fw 190. The aerial activities over Tunisia became one of the focal turning points of World War II, yet are frequently overlooked by historians. Here, the air-sea activities, the reconnaissance flights, and the growing day and night bomber offensives are examined in detail.

Fredriksen,2001-08-01 In depth descriptions and photographs of the aircraft of 21 nations presented with a unique human dimension that goes behind the machines to the people involved. Invaluable for specialists, accessible to enthusiasts, *International Warbirds: An Illustrated Guide to World Military Aircraft, 1914–2000* puts the most legendary fighter aircraft of the 20th century developed outside the United States on vivid display. It offers 336 illustrated biographies of the most significant warplanes used in squadron service from World War I to the Balkan conflict, including numerous models from Great Britain, France, Russia, and Japan, as well as notable machines from Israel, Canada, China, India, Brazil, and other nations. Entries span the history and scope of military aircraft from bombers and fighters to transports, trainers, reconnaissance craft, sea planes, and helicopters, with each capsule history combining nuts-and-bolts technical data with the story of that model's evolution and use. Together, these portraits offer an exciting, well-researched tribute to visionary designers and builders as well as courageous pilots and crews across the globe, and tell a vivid tale of how air power became such a decisive factor in modern warfare.

**Weapons and Warfare [2 volumes]** Spencer C. Tucker,2020-03-26 This work covers major weapons throughout human history, beginning with clubs and maces; through crossbows, swords, and gunpowder; up to the hypersonic railgun, lasers, and robotic weapons under development today. *Weapons and Warfare* is designed to provide students with a comprehensive and highly informative overview of weapons and their impact on the course of human history. In addition to providing basic factual information, this encyclopedia will delve into the greater historical context and significance of each weapon. The chronological organization by time period will enable readers to fully understand the evolution of weapons throughout history. The work begins with a foreword by a top scholar and a detailed introductory essay by the editor that provides an illuminating historical overview of weapons. It then offers entries on more than 650 individual weapons systems. Each entry has sources for further reading. The weapons are presented alphabetically within six time periods, ranging from the prehistoric and ancient periods to the contemporary period. Each period has its own introduction that treats the major trends occurring in that era. In addition, 50 sidebars offer fascinating facts on various weapons. Numerous illustrations throughout the text are also included.

Wings of War Wwii: Dewoitine D.520 (Le Gloan) Fantasy Flight Games,2011-01-11 Take your Wings of War game into the third dimension! Each historically-accurate, fully-painted miniature represents an aircraft from Wings of War: The Dawn of World War II. All miniatures come complete with maneuver deck and variable-altitude stand. This second series of Wings of War WWII miniatures includes twelve expertly-painted fighters (four planes in three different painting schemes each). Although the French fighter Dewoitine D.520 saw limited combat, it was one of the few aircraft capable of matching the fearsome Messerschmitt. Series II includes three such fighters, piloted by the French pilots Robert Thollon (Forces Francaises de L'Interieur) and Pierre Le Gloan (Armee de l'Air de l'Armistice) and by the Italian Virginio Stella (Regia Aeronautica).
