### **Report on the Fokker Single-Seater Biplane D.VII: September 1918**reports on German Aircraft 6

Ministry of Munition Aircraft Productio,2014-03 The Fokker D.VII is widely regarded as the best German aircraft of the war. Its development was championed by Manfred von Richthofen. In January 1918, Richthofen tested the D.VII in the trials at Adlershof but never had an opportunity to fly it in combat. He was killed just days before it entered service. When introduced, the D.VII was not without problems. On occasion its wing ribs would fracture in a dive or high temperatures would cause the gas tank to explode. Even so, the D.VII proved to be durable and easy to fly. As noted by one authority, it had an apparent ability to to make a good pilot out of mediocre material.. When equipped with the BMW engine, the D.VII could out climb any Allied opponent it encountered in combat. Highly manoeuvrable at all speeds and altitudes, it proved to be more than a match for any of the British or French fighter planes of 1918.

*SPAD XIII vs Fokker D VII* Jon Guttman,2009-04-21 Having established its SPAD VII as the most effective French fighter of 1916, the Soci t  Pour l'Aviation at ses D riv s strove to improve the model with a 220hp Hispano Suiza 8B engine and two machine guns. Despite initial teething troubles with the new engine, by mid-1918 the SPAD XIII had taken its place as the principal fighter of both France and the US. Meanwhile, the German quest for a successor for their structurally flawed Albatros D V finally bore fruit with the Fokker D VII. Entering combat in May 1918, this plane earned a reputation as the most formidable fighter of the war, yet the SPAD XIII's greater speed, especially in a dive, and its outstanding

durability, proved a fearsome rival. This is the gripping story of two of the best fighters produced in World War I - the SPAD XIII and the Fokker D VII - as they dueled in the skies above the trenches in the closing months of the war. Never before published artwork, including fascinating cockpit illustrations, reveal several dramatic clashes between the two foes while diary entries and first-hand accounts from the pilots bring this classic World War I duel to life with intimate detail.

*Mathematics and Computation in Music* Octavio A. Agustín-Aquino, Emilio Lluís-Puebla, Mariana Montiel, 2017-11-17 This book constitutes the thoroughly refereed proceedings of the 6th International Conference on Mathematics and Computation in Music, MCM 2017, held in Mexico City, Mexico, in June 2017. The 26 full papers and 2 short papers presented were carefully reviewed and selected from 40 submissions. The papers feature research that combines mathematics or computation with music theory, music analysis, composition, and performance. They are organized in topical sections on algebraic models, computer assisted performance, Fourier analysis, Gesture Theory, Graph Theory and Combinatorics, Machine Learning, and Probability and Statistics in Musical Analysis and Composition.

**Bankruptcy and Insolvency Taxation** Grant W. Newton, Robert Liquerian, 2012-01-06 The thousands of mergers, acquisitions, and start-ups that have characterized the past years of business have created an increasing number of corporations in financial trouble: specifically, a shortage of venture capital or quick cash. Consequently, bankruptcy protection is now viewed as a strategic move to protect corporations from their creditors and allow them to reorganize. Fully revised and updated with new case studies and the latest coverage of regulations, *Bankruptcy and Insolvency Taxation*, Fourth Edition provides the answers to

the questions financial managers will have on the tax aspects of bankruptcy strategy.

**Aces of Jagdstaffel 17** Greg VanWyngarden,2013-11-20 Initially formed to assist in the defence of the city of Metz against French bombing raids, Royal Prussian Jagdstaffel 17 would go on to become one of the most distinguish German fighter units of World War 1. Its first victory was scored by the pilot whose story is inextricably interwoven with that of his unit – the 'Blue Max' recipient Julius Buckler. He was largely responsible for inspiring the unit's unique Esprit de Corps, expressed in its famous and unique 'battle-cry' of 'Malaula!' Indeed, in its final days the unit gained the nickname Zirkus Buckler, or the 'Buckler Circus'. Besides Buckler, Jasta 17 boasted such aces as Karl Strasser, Alfred Fleischer and Christian Donhauser. In addition, the roster included colourful characters like the successful Jewish airman Jakob Wolff, who at over 48 years of age was the oldest German fighter pilot of the war. The story of this illustrious unit is told with many first-hand accounts by Buckler, Fleischer and others, as well as dozens of rare archival photos of the unit's beautifully decorated fighter aircraft.

### **Manipulation in Translating British and American Press Articles in the People's Republic of Poland**

Edyta Żrałka,2019-08-15 This book examines the occurrence of manipulation in the translation of British and American press articles into Polish for Forum. Przegląd Prasy Światowej magazine in the People's Republic of Poland, under preventive censorship. The existence of source text (ST) manipulation in translation is discovered through comparative analyses of STs and target texts (TTs). The text analyses investigate topics, editorial features, translation techniques, and the presence of Newspeak characteristics.

This study shows the existence of methods manipulating the STs within all analytical areas chosen in order to create a positive view of the communist authorities' activities and promote an optimistic image of the political, economic and social situation in the country. It offers a wide range of theory and practice concerning the specialized language of politics and propaganda, translation theories, strategies and techniques, and represents a good source of knowledge and practice for both novice translators and professionals.

**Fokker D VII Aces of World War 1** Norman Franks,Greg VanWyngarden,2003-03-25 Designed in a great rush at the end of 1917 just in time to take part in the German standard fighter competition held in January/February 1918, the D VII easily walked away with first prize. As Germanys premier fighter unit, von Richthofens JG I (led by Hermann Göring in the wake of the 'Red Baron's' recent death) received the first examples of the D VII to reach the frontline in late April. Built to oppose the new generation of French SPAD XIII's and British SE 5's and Camel fighters, the D VII was arguably the best all-round fighting scout of the Great War.

**SPAD VII vs Albatros D III** Jon Guttman,2011-04-19 When originally conceived, the French SPAD VII and German Albatros D II represented steps away from an emphasis on maneuver in aerial combat in favor of speed and durability - factors that came into play in hit-and-run tactics. At the end of 1916, however, Albatros tried to have the best of both worlds by incorporating the sesquiplane wing of the nimble

Nieuport 17 into its D III. The result combined the better downward view and maneuverability of the Nieuport with the power and twin machine guns of the Albatros D II, but at a high price - a disturbing tendency for the single-spar lower wing to fail in a dive. While Albatros (and the Austrian Oeffag firm, which built the fighter under license) sought to alleviate that weakness with various reinforcing measures, the Germans developed tactics to maximize the D III's strengths and minimize its shortcomings. At the same time, the French worked to improve the SPAD VII with more power and a more reliable cooling system before moving on to the twin-gunned SPAD XIII. While all that was going on, the Albatros D III became a mainstay of the German and Austro-Hungarian air services in frequent encounters with SPAD VII's flown by French, Belgian, British, Italian and American airmen.

**Plane Spotter's Guide** Tony Holmes, 2012-06-20 A compact guide to 70 of the most iconic aircraft to have shaped warfare over the last 100 years. Aviation has revolutionised warfare over the last 100 years, and this new pocket guide gives the reader the essential details of 70 iconic aircraft, including the Sopwith Camel, the Spitfire, the Messerschmitt Bf 109, the P-51 Mustang and the F-4 Phantom. Drawing on Osprey's comprehensive aviation archive, Plane Spotter's Guide uses detailed profile artwork to illustrate and aid recognition, as well as specification boxes to provide all the technical details.

Weapons and Warfare [2 volumes] Spencer C. Tucker, 2020-03-26 This work covers major weapons throughout human history, beginning with clubs and maces; through crossbows, swords, and gunpowder; up to the hypersonic railgun, lasers, and robotic weapons under development today. Weapons and Warfare is designed to provide students with a comprehensive and highly informative overview of weapons and their impact on the course of human history. In addition to providing basic factual information, this encyclopedia will delve into the greater historical context and significance of each weapon. The chronological organization by time period will enable readers to fully understand the evolution of weapons throughout history. The work begins with a foreword by a top scholar and a detailed introductory essay by the editor that provides an illuminating historical overview of weapons. It then offers entries on more than 650 individual weapons systems. Each entry has sources for further reading. The weapons are presented alphabetically within six time periods, ranging from the prehistoric and ancient periods to the contemporary period. Each period has its own introduction that treats the major trends occurring in that era. In addition, 50 sidebars offer fascinating facts on various weapons. Numerous illustrations throughout the text are also included.

*The Neutrophil* Maurice B. Hallett, 1989-01-31 A synthesis and collation of the recent material regarding the role of the neutrophil in basic pathological processes is presented in this volume. The

mechanisms of chemotaxis, secretion, phagocytosis, intracellular killing, oxygen radical production and arachidonate production are comprehensively reviewed. Stimulus response coupling in the neutrophil, with chapters on intracellular  $\text{Ca}^{2+}$ , C-Kinase, phospholipid metabolism, microfilaments and membrane electrophysiology are extensively discussed. Each chapter provides a critical review by experts with over 1,000 cited references. Invaluable to graduate students and medical and scientific researchers, this book provides a unique, up-to-date account of cellular biochemistry and physiology of the neutrophil.

**C. A. Brannen Series** Jack S. Ballard, 2007 Capt. Field E. Kindley, with the famous Eddie Rickenbacker, was one of America's foremost World War I flying aces. Like Rickenbacker's, Kindley's story is one of fierce dogfights, daring aerial feats, and numerous brushes with death. Yet unlike Rickenbacker's, Kindley's story has not been fully told until now. Field Kindley gained experience with the RAF before providing leadership for the U.S. Air Service. Kindley was the fourth-ranking American air ace; his exploits earned him a Distinguished Service Cross with Oak Leaf Cluster from the United States and a Distinguished Flying Cross from the British government. In February 1920, during a practice drill Kindley led, some enlisted men unwittingly entered the bombing target area. Buzzing the troops to warn them off the field, Kindley somehow lost control of his plane and died in the ensuing crash. Using arduously gathered primary materials and accounts of Great War aces, Jack Ballard tells the story of this little-known hero from the glory days of aerial warfare. Through this tale, an era and a daring flyer live again.

*International Warbirds* John C. Fredriksen, 2001-08-01 In depth descriptions and photographs of the aircraft of 21 nations presented with a unique human dimension that goes behind the machines to the

people involved. Invaluable for specialists, accessible to enthusiasts, *International Warbirds: An Illustrated Guide to World Military Aircraft, 1914–2000* puts the most legendary fighter aircraft of the 20th century developed outside the United States on vivid display. It offers 336 illustrated biographies of the most significant warplanes used in squadron service from World War I to the Balkan conflict, including numerous models from Great Britain, France, Russia, and Japan, as well as notable machines from Israel, Canada, China, India, Brazil, and other nations. Entries span the history and scope of military aircraft from bombers and fighters to transports, trainers, reconnaissance craft, sea planes, and helicopters, with each capsule history combining nuts-and-bolts technical data with the story of that model's evolution and use. Together, these portraits offer an exciting, well-researched tribute to visionary designers and builders as well as courageous pilots and crews across the globe, and tell a vivid tale of how air power became such a decisive factor in modern warfare.
