Peter C. Smith

The Worlds of Japanese Popular Culture Dolores P. Martinez, 1998-10-13 Dolores Martinez heads an international team of scholars in this lively discussion of Japanese popular culture. The book's contributors include Japanese as well as British, Icelandic and North American writers, offering a diversity of views of what Japanese popular culture is, and how it is best approached and understood. They bring an anthropological perspective to a broad range of topics, including sumo, karaoke, manga, vampires, women's magazines, soccer and morning television. Through these topics - many of which have never previously been addressed by scholars - the contributors also explore several deeper themes: the construction of gender in Japan; the impact of globalisation and modern consumerism; and the rapidly shifting boundaries of Japanese culture and identity. This innovative study will appeal to those interested in Japanese culture, sociology and cultural anthropology.

The Naval Siege of Japan 1945 Brian Lane Herder, 2020-04-30 The final months of Allied naval bombardments on the Home Islands during World War II have, for whatever reason, frequently been overlooked by historians. Yet the Allies' final naval campaign against Japan involved the largest and arguably most successful wartime naval fleet ever assembled, and was the climax to the greatest naval war in history. Though suffering grievous losses during its early attacks, by July 1945 the United States Third Fleet wielded 1,400 aircraft just off the coast of Japan, while Task Force 37, the British Pacific Fleet's carrier and battleship striking force, was the most powerful single formation ever assembled by the Royal Navy. In the final months of the war the Third Fleet's 20 American and British aircraft carriers would hurl over 10,000 aerial sorties against the Home Islands, whilst another ten Allied battleships would inflict numerous morale-destroying shellings on Japanese coastal cities. In this illustrated study, historian Brian Lane Herder draws on primary sources and expert analysis to

chronicle the full story of the Allies' Navy Siege of Japan from February 1945 to the very last days of World War II.

Nakajima Ki-49 'Helen' Units George Eleftheriou,2023-05-25 A fully illustrated study of the Nakajima Ki49 'Helen', the twin-engined bomber of the Pacific War, from Japanese aviation expert George Eleftheriou. The Nakajima Ki-49 Donryu ('Dragon Eater'), codenamed 'Helen' by the Allies, was a twin-engined Japanese bomber designed to undertake daylight attacks without the protection of escort fighters. Consequently, while it was officially known as the Army Type 100 Heavy Bomber, its formidable defensive armament and armour were so heavy that they restricted the Ki-49 to payloads comparable to those of smaller medium bombers. While only five heavy bomber sentai (regiments) were equipped with the 'Helen', the over 800 Ki-49s built between 1941 and 1944 saw extensive action in Burma, Papua New Guinea, the Philippines, northern India and north Australia. In an act of desperation, a small number of 'Helens' were even employed, unsuccessfully, as kamikaze aircraft against US Navy warships operating off the Philippines and Okinawa. In this fascinating book, George Eleftheriou provides a comprehensive account of the units that saw action flying the 'Helen', based on original Japanese sources. Also featuring high-quality photographs never published before, specially commissioned colour profile artwork, official unit histories and veteran accounts, this title is a must-have for Japanese aircraft enthusiasts.

Historical Dictionary of the Russo-Japanese War Rotem Kowner,2017-04-06 The Russo-Japanese War was fought for 19 months (8 February 1904– 5 September 1905) between the empires of Japan and the Russia over the southern part of Manchuria and the Korean Peninsula. While essentially a

colonial conflict, the war became a major engagement both in scale and innovation unseen until then. In recent years there has been a growing awareness that this event marks a historical juncture far more important than it was usually taken to be. This second edition of the Historical Dictionary of the Russo-Japanese War offers a major revision of the highly praised first edition, which, by all accounts, has been the standard work on this conflict in any language during the last decade. The book contains a chronology, an introduction, appendixes, and an extensive bibliography. Moreover, the dictionary section has some 800 new or fully revised cross-referenced entries on the battles, weaponry, and major personalities of the war, as well as various international events and conflicts, agreements, schemes, and projects that led to the war. This book is an excellent resource for students, researchers, and anyone wanting to know more about the Russo-Japanese War.

A Blue Sea of Blood Donald M. Kehn, 2009-01-15 On the morning of March 1, 1942, the WWI-era destroyer USS Edsall—under orders to deliver some forty Army Air Force fighter crews to the beleaguered island of Java—split off from the USS Whipple and the tanker Pecos and was never seen again by Allied forces. Despite the later discovery of bodies identified as Edsall crew members near a remote airfield on the coast of Celebes, what happened to the ship remains a matter of mystery and, perhaps, deliberate obfuscation. This book explores the many puzzling facets of the Edsall's disappearance in order to finally tell the full story of the fate of the vessel and her crew. Based on

exhaustive research of the historical record—including newly deciphered Japanese documents and previously unrevealed material from the crew's family members—*A Blue Sea of Blood* offers a painstaking reconstruction of the ship's history. The book investigates not only the Edsall's mysterious final action, but also her wide-ranging pre-war career and the curious uses to which her story was put—generally under false pretenses—first by the pre-war US Navy and then by the Japanese wartime propaganda machine. And finally, military historian Donald Kehn considers the circumstances surrounding the curious obscurity of the Edsall's heroic service and final battle in American histories. Redressing six decades of official indifference, Kehn's account recovers a significant chapter missing from the history of World War II—and tells a long-overdue story of courage and tragic loss.

Darwin 1942 Bob Alford, 2017-02-23 Following the devastating raids on Pearl Harbor on 7 December 1941, lightning advances by Japanese forces throughout the Pacific and the Far East, and a desperate battle by the Allied command in the Dutch East Indies, it became evident that an attack on Australia was more a matter of 'when' and not 'if'. On 19 February, just eleven weeks after the attacks on Pearl Harbor and two weeks after the fall of Singapore, the same Japanese battle group that had attacked Hawaii was ordered to attack the ill-prepared and under-defended Australian port of Darwin. Publishing 75 years after this little-known yet devastating attack, this fully illustrated study details what happened on that dramatic day in 1942 with the help of contemporary photographs, maps, and profiles of the commanders and machines involved in the assault.

Mitsubishi Zero Peter C. Smith, 2014-11-30 A history of the Japanese aircraft, "illustrated by well reproduced black and white photographs" details the plane's impressive WWII aviation record.

(Aviation News) The Mitsubishi Zero is one of the greatest fighter aircraft ever to have graced the skies. Symbolic of the might of Imperial Japan, she represented a peak of developmental prowess in the field of aviation during the early years of the Second World War. Engineered with maneuverability in mind, this lightweight, stripped-back aircraft had a performance that left her opponents totally outclassed. The dogfights this aircraft engaged in with the Chinese, British, Dutch and American warplanes in the 1941-42 period are the stuff of aviation legend. The Zero remained a potent threat until the end of the war, not least in her final role, that of a Kamikaze plane, in which she created as much havoc on the sea as she had done earlier in the air. Peter C. Smith takes the reader on a journey from inspired inception to the blazing termination of this unique aircraft, the first Naval fighter to be superior to land-based aircraft. Mitsubishi Zero describes in detail the many victories that punctuated the early days of the plane's operational career as well as the final days of the Second World War which witnessed her demise. Smith also lists the preserved Zero aircraft on display today. This is a fast-paced and fascinating history of a fighter aircraft like no other.

Nomonhan Alvin D. Coox, 1985 From May to September 1939 Japan and the Soviet Union fought a fierce, large-scale undeclared war on the Mongolian plains that ended with a decisive Soviet victory with two important results: Japan reoriented its strategic emphasis towards the south, leading to war with the United States, Britain, and the Netherlands; and Russia freed itself from the fear of fighting on two fronts, thus vitally affecting the course of the war with Germany.

P-47D Thunderbolt vs Ki-43-II Oscar Michael John Claringbould, 2020-07-23 Although New Guinea's Thunderbolt pilots faced several different types of enemy aircraft in capricious tropical conditions, by far their most common adversary was the Nakajima Ki-43-II Hayabusa, codenamed 'Oscar' by the

Allies. These two opposing fighters were the products of two radically different design philosophies. The Thunderbolt was heavy, fast and packed a massive punch thanks to its battery of eight 0.50-cal machine guns, while the 'Oscar' was the complete opposite in respect to fighter design philosophy - lightweight, nimble, manoeuvrable and lightly armed. It was, nonetheless, deadly in the hands of an experienced pilot. The Thunderbolt commenced operations in New Guinea with a series of bomber escort missions in mid-1943, and its firepower and superior speed soon saw Fifth Air Force fighter command deploying elite groups of P-47s to Wewak, on the northern coast. Flying from there, they would pick off unwary enemy aircraft during dedicated fighter patrols. The Thunderbolt pilots in New Guinea slowly wore down their Japanese counterparts by continual combat and deadly strafing attacks, but nevertheless, the Ki-43-II remained a worthy opponent deterrent up until Hollandia was abandoned by the IJAAF in April 1944. Fully illustrated throughout with artwork and rare photographs, this fascinating book examines these two vastly different fighters in the New Guinea theatre, and assesses the unique geographic conditions that shaped their deployment and effectiveness.

Japanese Army Air Force Aces 1937-45 Henry Sakaida, 2012-10-20 Little has been published in English on the Japanese Army Air Force (JAAF), let alone its most successful fighter pilots no less than 150 of them achieved ace status during eight years of near-constant war, and they are all listed in this volume. From the arid plains of the Mongolian border region to the lush jungles of New Guinea, the JAAF was more than a match for the many opponents it fought against for control of the skies. Indeed, even when the mighty Allied war machine proved almost overwhelming from early 1944 onwards, the elite fighter pilots of the various sentais within the JAAF fought on with near-fanatical loyalty in defence of the Home Islands. Aircraft of the Aces 13 and 22 are also available in a single

volume as 'Aces of the Rising Sun 1937-1945'.

East China Sea 1945 Brian Lane Herder,2022-04-28 This study describes the air-sea offensive supporting the ground-force invasions of Iwo Jima and Okinawa in February and April 1945, which led to the sinking of the Yamato and the onslaught of the Japanese kamikaze. During the Pacific War, the island invasions of Iwo Jima and Okinawa were the last two major ground campaigns. By the time these took place in early 1945, the US Navy had reached an exceptional level of coordination in its amphibious operations, and was able to overrun and subdue Japanese territories efficiently. Faced with the increasing might of these forces and to prevent further defeat, Imperial Japan deployed its kamikaze aircraft and attacked many US heavy aircraft carriers and destroyers; several were sunk, while others were knocked out of the war. This superbly illustrated book explores the air-sea aspects of the pivotal battles that took place, and includes the “death ride” of the Japanese battleship Yamato (the largest ever built), and the mass kamikaze attacks off Iwo Jima and Okinawa, as well as the Iwo Jima and Okinawa amphibious invasions and the naval and air bombardments of the two islands. It also considers the contribution of the USAAF and the British Pacific Fleet to the eventual victory of US air and ground forces.
