Bill Vlasic, Bradley A. Stertz

Taken for a Ride Bill Vlasic, Bradley A. Stertz, 2009-10-13 In May 1998, a stunning \$36 billion merger was announced by Chrysler, the all-American automaker, and Daimler-Benz, the German manufacturer of Mercedes-Benz luxury sedans. This corporate marriage promised to rock the global auto industry, but when the dust settled, Daimler had bought Chrysler, and an American icon had lost its independence. Taken for a Ride follows the twists and turns on the road to DaimlerChrysler and is a cautionary tale of the risks and rewards of going global. "A book in the manner of Barbarians at the Gate-a spellbinding tale, juicy gossip and all, of how business is really done among the world's top companies...full of fresh facts and insights on one of the most heavily covered business stories of the 1990s...it is as fun to read as it is informative." -New York Times Book Review

Daimler & Benz: The Complete History Dennis Adler, 2006-05-02 From the earliest workshop days to the grandest marque in the automotive world, the story of one of the most important enterprises of the twentieth century comes alive in this complete history. The rich history of Daimler-Benz (now DaimlerChrysler) has its roots in the early experimentation with the use of the internal combustion engine by three men: Carl Benz, Gottlieb Daimler, and William Maybach. Benz, working alone, and Daimler and Maybach, working together, the two shops separated by a mere sixty miles, in the late 1880s simultaneously laid the foundation of what would become the German automotive industry. At first there was competition between Benz & Cie. and Daimler Motoren Gesellschaft, as they engineered and styled the earliest motorwagens and began to develop markets for their products. These early efforts led to the establishment of an entire industry by the start of World War I. But the war and its aftermath

devastated these two companies, as it did the German economy overall. By the early 1920s it became apparent that the only way to survival was a merger, and thus, on June 29, 1926, the stockholders of both companies gave approval to the new company, Daimler-Benz, which led directly to the birth of one of the world's best-known brands: Mercedes-Benz. In the hands of noted automotive photographer, author, and editor Dennis Adler, the history of the marque and the company unfolds through the decades, as Mercedes-Benz advances in fame, from the racing glory years to the present, becoming the standard that all automakers strive to meet. With archival (many never before published) and the author's own photographs, the beauty and power of the automobile comes alive, from the earliest models to the first crop of twenty-first-century Mercedes-Benzenes. It is a story of excellence that is in many ways unmatched in the history of any industry. Today, as a global leader in design, safety, and overall excellence, Mercedes-Benz continues to lead the way.

Daimler V8 S.P. 250 Brian Long, 2008-01-15 Today very much part of the classic car scene around the world, the Daimler SP250 sports car has a fascinating and eventful history. The idea of staid and traditional Daimler building an open sports car is surprising enough in itself: that the car should be fiberglass-bodied, V8 engined and have a daring futuristic appearance stretches credibility to the limit...but that's exactly what the company did produce between 1959 and 1964. A bold new design, the "Dart" as it was originally to be called, should have been struggling Daimler's savior and a springboard to a range of new models, including saloons and coupes. Things didn't quite work out that way and Daimler was acquired by Jaguar, which led to the SP250's Edward Turner-designed V8 engine being used in a Daimler-

badged version of the Jaguar MkII saloon. Here is the full story of the SP250 including concept, development and production history. Also covered are related models, specials, buying and restoration, chassis numbers, production numbers, color schemes, clubs and specialists. Altogether a source book of essential information for SP250 and Daimler enthusiasts.

The Invention of the Automobile - (Karl Benz and Gottlieb Daimler) St. John C. Nixon, 2016-02-15 “ ... My excuse for writing this book is a desire to ventilate certain facts in relation to the early work of Karl Benz and Gottlieb Daimler of which the public is largely ignorant. Among those who have taken the trouble to investigate the early days of the motor movement, there is a certain amount of controversy as to who invented the motor vehicle, although this question has not, at the moment, extended to the general public. Inevitably it will do so, if the prevailing interest increases, in which event, it is hoped that this book will prove useful, for all the dates and facts, etc., have been fully authenticated. There are, however, several to whom I must express my sincere gratitude for the assistance they have given me. Herr Rudolf Caracciola, the winner, during the 1935 season of motor racing, of the Grand Prix of France, Belgium, Switzerland, Spain, and Tripoli, to say nothing of other triumphs, and therefore the Champion of Europe, has most kindly written a preface after reading through the manuscript. The Daimler-Benz Aktiengesellschaft of Germany has been indefatigable in providing me with material in regard to certain facts connected with the early experiments of both Benz and Daimler. Mr. Frederick R. Simms, too, has spared no effort to help me with some of the inner details of Daimler's engineering career.” (St. John C. Nixon - September, 1936)

Daimler AG Felix-Sebastian Ament,2021-04-21 Seminar paper from the year 2021 in the subject Business economics - General, grade: 1,0, The FOM University of Applied Sciences, Hamburg, course: Risk Management, language: English, abstract: This paper aims to present Risk Management with its systematic approach and to explain it using Daimler AG as an example. At the end of this paper, the question of how Daimler AG deals with risks of various kinds and what criticism can be derived from this should be answered. First chapter 2 will present the basics for the creation of a theoretical foundation. Specific definitions will be introduced and the processes of Risk Management about its operational and strategic objectives will be disclosed. Chapter 3 also uses a practical example to demonstrate implementation at Daimler AG, which provides an analytical view and a final view of the sum of the findings. At the same time, the typical characteristics of the automotive industry are shown and the resulting risks for Daimler AG are worked out. Finally, an approach to improve the communication of risk management is presented. This approach enables a more advanced presentation of opportunities and risks in combination with allocated strengths and weaknesses. At the end of the work, we find a conclusion with the demands that will result from these elaborated findings.

The book examines how the opportunities offered by the Nazi rearmament in the 1930s led to rapid expansion and a surge in profits.

Daimler-Chrysler Merger Case Nicolas Martelin,2009-08-27

Research Paper (undergraduate) from the year 2008 in the subject Business economics - Business Management, Corporate Governance, grade: A-, International School of Management Dortmund , language: English, abstract: Back in 1998, Daimler-Benz, the German manufacturer of luxury automobiles, had only captured less than one percent of the American market (Daimler-Benz AG, Standard & Poor's Stock Reports. New York: Standard & Poor's, Inc., July 21, 1997). Meanwhile, the American Chrysler Corporation was willing to extend its international reach, especially in Europe. Given the circumstances, both companies came to the conclusion that a merger would make sense. On May 7th, 1998, the merger was officially announced as the largest trans-Atlantic merger ever. However, this buyout - which could have led to the creation of the greatest car manufacturer in the world - had failed in less than ten years. On May 14, 2007, the DaimlerChrysler company was already a thing of the past. Almost two years after the sale of Chrysler, a question remains: Why the merger failed? If we compare a merger to a marriage, we

would say that they married the wrong persons. But how managers and executives from the two companies has gotten it so wrong?

The Impact of Cultural Differences on the Daimler Chrysler Merger Svenja Stellmann, 2010-12-07 Research Paper (undergraduate) from the year 2010 in the subject Organisation and administration - Miscellaneous, grade: 1,7, Northumbria University, language: English, abstract: The Merger of DaimlerChrysler in 1998 is regarded to be the biggest merger in the automotive industry. In academic literature there is consensus about the fact that cultural issues had a major impact on the merger's failure. Bearing in mind the importance of organisational culture on the success of M&A, this study aims to provide an in-depth analysis of the famous DaimlerChrysler merger. The researcher will reveal the organisations' cultural issues which arose during and after the merger and she will explain the impact of these issues on different organisational levels. The analysis will be conducted with the help of the theoretical frameworks of Schein (1984) and Hofstede (2001). Findings show that cultural differences have had an impact throughout all organisational levels. Due to this finding it is concluded that the merger was about to fail from the beginning on.

Business valuation of the enterprise Daimler AG Christin Wessels, 2018-09-24 Seminar paper from the year 2016 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 2,0, University of applied sciences Dortmund, language: English, abstract: The valuation of businesses is since decades a theme, which is still up to date and growing. The reason for the high interest regarding the theme is quite simple: If an enterprise is valued, there is a high amount of money involved. Business values are daily business, at the same time

they have a high amount of complexity and issues, the raters are confronted with. The reason for a business value could be different, starting with management successions and ending with the buy out of an enterprise. The value of an enterprise is subjective and contents conflicts of interests. On one hand there is the current owner. For him the enterprise has an added value because of the personal background. On the other hand, there is the further buyer of the company, who wants to pay a lower price for the company to minimize the liabilities. Because of this the value of a business depends on the target and the reason of the valuation, reflecting the motto “The Price is what you pay. Value is what you get.” The value of the business can be calculated by different ways. In the last years, the amount of valuation methods increased. Currently there are many valuations available, which end in different results. But how is the value of an enterprise defined and calculated? Why is the value of a business needed? And what are the differences between the methods? These questions will be answered in the present assignment. The Objective is to show with the help of the concrete example Daimler AG the process of a business valuation including the calculation of the value of the enterprise. To achieve this objective, the methodology of the present assignment is described in the following chapter first, before the theory of business valuations will be explained. The reasons for a valuation are described and the methods with a focus on Discounted cash flow methods (DCF) and multiples methods are stated. After presenting the company Daimler the methods are applied of Daimler in the fourth chapter, the business value will be calculated with the different methods. The results will be discussed in chapter five, before finally a conclusion and outlook will be given.

Analyzing and Comparing of Visions of BMW, AUDI and Daimler- Chrysler Silke Gießler,2004-12-18 Seminar paper from the year 2004 in the subject Business economics - General, grade: 1,7, Oulu University of Applied Sciences (Business School), course: International Business Strategy, language: English, abstract: The BMW Group concentrates on selected premium segments in the automobile market. This means that it is the only multibrand automobile manufacturer in the world that is not active in the mass market, i.e. the volume segments of the automobile market. The aim of the premium brand strategy is to achieve higher revenues per vehicle, on the basis of a high-value product substance and an unmistakable brand profile. The BMW Group pursues this premium brand strategy with the BMW

and MINI brands, and, since 1st January 2003, with Rolls-Royce. This means that it will cover the premium segments from the small car to the absolute luxury category. The premium brand is thus creating the preconditions for further profitable growth for the BMW Group. The Company expects that in the next ten years, the premium segments of the automobile market will grow worldwide by around 50%. In contrast, the mass volume segments will increase by just 25% or so during the same period. The BMW Group is aiming to achieve profitable growth in the future too, and in that order of priority - profitable followed by growth. Beside their premium brand strategy, BMW wants to offer sportiveness and status. Compared to other car brands, BMW does not want to announce that they want to be an leader in technology or a global player. The slogan “BMW.Sheer driving pleasure” wants to show their concentration in a well developed and fun orientated car. That they indeed often develop at the latest state- of –art technology is not standing in the foreground. This is very tricky. The customers feeling that he and his fun is the most important thing for BMW gives him a feeling for being important. Being close to the customers fun is the message. And the customer knows quite well that the technique is also in the car.

Corporate Social Responsibility and its Implementation in the Daimler AG Thilo Ketschau, 2013-03-14 Seminar paper from the year 2013 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 1,3, University of applied sciences, Cologne, course: Marketing, language: English, abstract: The sustainability of business activity is one of the key issues for companies in the 21st century. For it is stated as a fact, that the current way of use of our environmental resources is not adaptable for the future, companies have been taken into responsibility

for not taking only their profits into account, but also their impacts on our environment. In addition the modern society more and more demands social value of these companies to participate in social development. Corporate Social Responsibility is offered as an approach to handle these challenges, without ignoring the financial survival and the competitiveness of the companies. In the following assignment the theoretical background of this concept is explained and a practical implementation is described on the example of the Daimler AG. As a result it is stated, whether this example is capable of being a role model or needs a role model itself.
