Fashioning the Afropolis Kerstin Pinther,Kristin Kastner,Basile Ndjio,2022-07-14 With a focus on sub-Saharan Africa, *Fashioning the Afropolis* provides a range of innovative perspectives on global fashion, design, dress, photography, and the body in some of the major cities, with a focus on Lagos, Johannesburg, Dakar, and Douala. It contributes to the ongoing debates around the globalization of fashion and fashion theory by exploring fashion as a genuine urban phenomenon on the continent and among its diasporas. To date, “fashion” and “city” have not been systematically related to each other in the African context and, for too long, a western-centric gaze has dominated scholarship, resulting in the perception of Africa as provincial and its visual arts and textile cultures as static and folkloristic. This perspective is all the more distorted, given Africa's rich sartorial past. With a huge number of tailors ready to adapt and renew clothing, reshaping garments into contemporary styles, and many cities in Africa becoming hot-spots for a steadily growing and well-connected scene of fashion designers in the past 20 years, the time is ripe for a reevaluation and reconsideration of the fashionscapes of Africa. Leading scholars offer an updated empirical and theoretical foundation on which to base new and exciting research on sub-Saharan fashion, challenging perceptions and offering new insights.

Curating and the Legacies of Colonialism in Contemporary Iberia Carlos Garrido Castellano,Bruno Leitão,2022-06-01 This book provides the first systematic genealogy of postcolonial and decolonial practices emerging from Iberian art spaces. The title redefines Iberian Studies through a decolonial lens. It expands current debates on curating and contemporary art by exploring how cultural programming has engaged with the legacies and continuities of colonialism in contemporary European societies.

Refugees and Migrants in Law and Policy Helmut Kury,Sławomir Redo,2018-05-31 Refugees and migration are not a new story in the history of humankind, but in the last few years, against a backdrop of huge numbers of migrants, especially from war-torn countries, they have again been a topic of intensive and contentious discussion in politics, the media and scientific publications. Two United Nations framework declarations on the sustainable development goals and on refugees and migrants adopted in 2016 have prompted the editors – who have a background in international criminology – to

invite 60 contributors from different countries to contribute their expertise on civic education aspects of the refugee and migrant crisis in the Global North and South. Comprising 35 articles, this book presents an overview of the interdisciplinary issues involved in irregular migration around the world. It is intended for educationists, educators, diplomats, those working in mass media, decision-makers, criminologists and other specialists faced with questions involving refugees and migrants as well as those interested in improving the prospects of orderly, safe, regular and responsible migration in the context of promoting peaceful and inclusive societies for sustainable development. Rather than a timeline for migration policies based on “now”, with states focusing on “stopping migration now”, “sending back migrants now” or “bringing in technicians or low-skilled migrant workers now”, there should be a long-term strategy for multicultural integration and economic assimilation. This book, prefaced by François Crépeau, the United Nations Special Rapporteur on the human rights of migrants, and William Lacy Swing, Director-General of the International Organization for Migration, addresses the question of the rights and responsibilities involved in migration from the academic and practical perspectives of experts in the field of social sciences and welfare, and charts the way forward to 2030 and beyond, and also beyond the paradigm of political correctness.

The Cultural Cold War and the Global South Kerry Bystrom, Monica Popescu, Katherine Zien, 2021-07-27 This volume investigates the cultural sites where the global Cold War played out. It brings to view unpredictable encounters that arose as writers, artists, filmmakers, and intellectuals from or aligned with the Third World navigated the ideological and material constraints set by superpowers and emerging regional powers. Often these encounters generated *communitas* and solidarity, while at times they fed old and new conflicts. Pushing forward recent scholarship that tracks the Cold War in the Global South and draws on postcolonial approaches, our contributors use archival, secondary, and ethnographic sources to trace the afterlives and memories of key figures and to explore meetings that performed cultural diplomacy. Our focus on sites of encounter or exchange underscores the situated, interpersonal, and embodied dimensions through which much of the cultural Cold War was experienced. While the global conflict divided citizens along ideological fault lines, it also linked people through circulating media—novels, film, posters, journals, and theatre—and multinational conferences that brought artists, intellectuals, and political activists together. Such contacts introduced new axes of solidarity and hierarchies of exclusion. Examining these connections and disjunctures, this new and necessary mapping of the cultural Cold War highlights under-addressed locations in Asia, Africa, and Latin America.

Introduction to Quantum Mechanics 1 Ibrahima Sakho,2019-12-12 The conception of lasers and optoelectronic devices such as solar cells have been made possible, thanks to the modern day mastery of processes that harness the interaction of electromagnetic radiation with matter. This first volume is dedicated to thermal radiation and experimental facts that reveal the quantification of matter. The study of black body radiation allows the introduction of fundamental precepts such as Planck's law and the energy-related qualities that characterize radiation. The properties of light and wave-particle duality are also examined, based on the interpretation of light interferences, the photoelectric effect and the Compton effect. This book goes on to investigate the hydrogen atomic emission spectrum and how it dovetails into our understanding of quantum numbers to describe the energy, angular momentum, magnetic moment and spin of an electron. A look at the spectroscopic notation of the states explains the different wavelengths measured from the splitting of spectral lines. Finally, this first volume is completed by the study of de Broglie's wave theory and Heisenberg's uncertainty principle, which facilitated the advancement of quantum mechanics.

Endurance: The Toby Price Story Toby Price,2022-02-01 The Australian bush has conjured up some crazy legends, but the rise and rise of two-time Dakar champion Toby Price is surely one of its best. Who knew that the remote town of Roto (pop. 41) would be the launching pad of one of the greatest motorsports athletes the world has seen, fit to tackle and triumph over the planet's most gruelling endurance race? Toby Price has lived a truly remarkable life, filled with ups, downs and every bump in the road imaginable: a childhood racing prodigy from the tender age of 2 – there was hardly a paddock that could contain him. After tearing through the junior ranks, taking out titles in both dirt track and motocross, Toby was living the dream, turning pro at 16 and joining the formidable KTM Racing team. Soon he was turning heads internationally and tapped to take on the most forbidding enduro courses the sport could throw at him. But the clock and the elements weren't his only adversaries. The death of his adored sister, Min; the tragic loss of mentors and rivals in the desert; countless broken bones and an accident that should have paralysed him for life – Toby's story is a study in staying true to yourself and following your passion to its ultimate end: rain, hail or shine. The person who emerged from the crucible of so many trials is now one of the most beloved figures in Australian sport, a kid from the country whose need for speed took him to the top of the podium – and he's not about to slow down now.

Development and Territorial Restructuring in an Era of Global Change Elisabeth Peyroux,Christine Raimond,Vincent Viel,Emilie Lavie,2023-08-29 Thinking about development and the environment

simultaneously is one of the biggest scientific and societal challenges of the 21st century. Understanding the interactions between biophysical systems and human activities in an era of global change requires overcoming disciplinary divides and opening up new epistemological perspectives. This book explores these challenges using a territorial lens. Combining various scales of analyses (from global to local) and contexts (both urban and rural) in the North and in the South, it analyzes the relationships between environment and development through a variety of geographical objects (i.e. cities, rural and agricultural areas, coastlines, watershed), themes (i.e. ecological transitions, food, energy, transport, agriculture, mining activities) and methodologies (i.e. qualitative and quantitative approaches, modeling, in situ measurements). By engaging in a dialogue between social science and natural science disciplines, within different fields and with a variety of forms of knowledge production, this book provides essential information for understanding and reading the complexity of a globalized world. This book is targeted at academics and students in social sciences and at stakeholders in the field of territorial and environmental management.

Associative and Non-Associative Algebras and Applications Mercedes Siles Molina, Laiachi El Kaoutit, Mohamed Louzari, L'Moufadal Ben Yakoub, Mohamed Benslimane, 2020-01-02 This book gathers together selected contributions presented at the 3rd Moroccan Andalusian Meeting on Algebras and their Applications, held in Chefchaouen, Morocco, April 12-14, 2018, and which reflects the mathematical collaboration between south European and north African countries, mainly France, Spain, Morocco, Tunisia and Senegal. The book is divided in three parts and features contributions from the following fields: algebraic and analytic methods in associative and non-associative structures; homological and categorical methods in algebra; and history of mathematics. Covering topics such as rings and algebras, representation theory, number theory, operator algebras, category theory, group theory and information theory, it opens up new avenues of study for graduate students and young researchers. The findings presented also appeal to anyone interested in the fields of algebra and mathematical analysis.

The Future Is in Your Hands Beth Buggenhagen, 2023-11-07 In Senegal, portraiture serves as a vital index and creator of social connection. People sit for and display portraits, keep albums, and view illustrated magazines together. Through these portraiture practices, Senegalese have fashioned idealized images to mend fraught and fragmented lives in the context of decades of migration. The

Future Is in Your Hands provides an expansive frame for photography to highlight the role of affect in portraiture practices. Moving from the colonial to the newly independent Senegal, Beth Buggenhagen combines museum, ethnographic, and archival research on photography's past with lens-based artists who address themes of separation, visibility, rupture, and repatriation through portraiture.

Buggenhagen, in collaboration with Senegalese photographers, explores how photographs, as visual and material objects, migrate themselves and, like the bodies they represent, create a record not only of lived experiences but also of the cycle of migration for this labor-exporting country. By complicating the history of portraiture in Senegal, *The Future Is in Your Hands* reveals the enduring power of images and the efforts under way to keep this art form safely in Senegalese hands.

Congoville Pieter Boons, Sandrine Colard, 2021-06-01 One hundred years after the founding of the École Coloniale Supérieure in Antwerp, the adjacent Middelheim Museum invites Sandrine Colard, researcher and curator, to conceive an exhibition that probes silenced histories of colonialism in a site-specific way. For Colard, the term Congoville encompasses the tangible and intangible urban traces of the colony, not on the African continent but in 21st-century Belgium: a school building, a park, imperial myths, and citizens of African descent. In the exhibition and this adjoining publication, the concept Congoville is the starting point for 15 contemporary artists to address colonial history and ponder its aftereffects as black flâneurs walking through a postcolonial city. Due to the multitude of perspectives and voices, this book is both a catalogue and a reference work comprised of artistic and academic contributions. Together, the participating artists and invited authors unfold the blueprint of Congoville, an imaginary city that still subconsciously affects us, but also encourages us to envision a decolonial utopia. Een eeuw na de oprichting van de École Coloniale Supérieure in Antwerpen nodigt het naburige Middelheimmuseum onderzoeker en curator Sandrine Colard uit om een tentoonstelling te creëren die sitespecifiek peilt naar de stille geschiedenissen van het kolonialisme. Congoville duidt op de zichtbare en onzichtbare stedelijke sporen van de kolonie, niet op het Afrikaanse continent, maar pal in het België van vandaag: een schoolgebouw, een park, imperialistische mythes en burgers van Afrikaanse origine. Doorheen de tentoonstelling en deze bijhorende publicatie is Congoville de context waarbinnen 15 hedendaagse kunstenaars, als zwarte flâneurs op pad in een postkoloniale stad, het koloniale verleden en de impact ervan adresseren. Door de veelheid aan perspectieven en stemmen is dit boek tegelijk een catalogus en een naslagwerk met zowel academische als artistieke bijdragen. Samen ontvouwen de betrokken kunstenaars en auteurs de blauwdruk van Congoville, een imaginaire stad die ons nog steeds onbewust in haar greep houdt, maar ons ook aanspoort om na te denken

over een de-koloniaal utopia. With contributions by/Met bijdragen van: Pieter Boons, Sandrine Colard, Filip De Boeck, Bas De Roo, Nadia Yala Kisukidi, Sorana Munsya & Léonard Pongo, Herman Van Goethem, Sara Weyns, Nabilla Ait Daoud Participating artists/Deelnemende kunstenaars: Sammy Baloji, Bodys Isek Kingelez, Maurice Mbikayi, Jean Katambayi, KinAct Collective, Simone Leigh, Hank Willis Thomas, Zahia Rahmani, Ibrahim Mahama, Ângela Ferreira, Kapwani Kiwanga, Sven Augustijnen, Pascale Marthine Tayou, Elisabetta Benassi, Pélagie Gbaguidi For more information, visit www.middelheimmuseum.be/nl/activiteit/congoville

Safety and Reliability – Safe Societies in a Changing World Stein Haugen, Anne Barros, Coen van Gulijk, Trond Kongsvik, Jan Erik Vinnem, 2018-06-15 *Safety and Reliability – Safe Societies in a Changing World* collects the papers presented at the 28th European Safety and Reliability Conference, ESREL 2018 in Trondheim, Norway, June 17-21, 2018. The contributions cover a wide range of methodologies and application areas for safety and reliability that contribute to safe societies in a changing world. These methodologies and applications include: - foundations of risk and reliability assessment and management - mathematical methods in reliability and safety - risk assessment - risk management - system reliability - uncertainty analysis - digitalization and big data - prognostics and system health management - occupational safety - accident and incident modeling - maintenance modeling and applications - simulation for safety and reliability analysis - dynamic risk and barrier management - organizational factors and safety culture - human factors and human reliability - resilience engineering - structural reliability - natural hazards - security - economic analysis in risk management *Safety and Reliability – Safe Societies in a Changing World* will be invaluable to academics and professionals working in a wide range of industrial and governmental sectors: offshore oil and gas, nuclear engineering, aeronautics and aerospace, marine transport and engineering, railways, road transport, automotive engineering, civil engineering, critical infrastructures, electrical and electronic engineering, energy production and distribution, environmental engineering, information technology and telecommunications, insurance and finance, manufacturing, marine transport, mechanical engineering, security and protection, and policy making.

West African Studies Women and Trade Networks in West Africa OECD, Sahel and West Africa Club, 2019-04-04 The report proposes the development of innovative public policies based on the reinforcement of the social capital of women and policy approaches that promote better integration of the initiatives undertaken by governments, international and non-governmental organisations to empower women and strengthen their resilience.

The Routledge Handbook of Phenomenology and Phenomenological Philosophy Daniele De Santis, Burt C. Hopkins, Claudio Majolino, 2020-08-24 Phenomenology was one of the twentieth century's major philosophical movements, and it continues to be a vibrant and widely studied subject today with relevance beyond philosophy in areas such as medicine and cognitive sciences. The Routledge Handbook of Phenomenology and Phenomenological Philosophy is an outstanding guide to this important and fascinating topic. Its focus on phenomenology's historical and systematic dimensions makes it a unique and valuable reference source. Moreover, its innovative approach includes entries that don't simply reflect the state-of-the-art but in many cases advance it. Comprising seventy-five chapters by a team of international contributors, the Handbook offers unparalleled coverage and discussion of the subject, and is divided into five clear parts: • Phenomenology and the history of philosophy • Issues and concepts in phenomenology • Major figures in phenomenology • Intersections • Phenomenology in the world. Essential reading for students and researchers in philosophy studying phenomenology, *The Routledge Handbook of Phenomenology and Phenomenological Philosophy* is also suitable for those in related disciplines such as psychology, religion, literature, sociology and anthropology.

Gridded Worlds: An Urban Anthology Reuben Rose-Redwood, Liora Bigon, 2018-05-02 This book is the first edited collection to bring together classic and contemporary writings on the urban grid in a single volume. The contributions showcased in this book examine the spatial histories of the grid from multiple perspectives in a variety of urban contexts. They explore the grid as both an indigenous urban form and a colonial imposition, a symbol of Confucian ideals and a spatial manifestation of the Protestant ethic, a replicable model for real estate speculation within capitalist societies and a spatial framework for the design of socialist cities. By examining the entangled histories of the grid, *Gridded Worlds* considers the variegated associations of gridded urban space with different political ideologies, economic systems, and cosmological orientations in comparative historical perspective. In doing so, this interdisciplinary anthology seeks to inspire new avenues of research on the past, present, and future of the gridded worlds of urban life. *Gridded Worlds* is primarily tailored to scholars working in the fields of urban history, world history, urban historical geography, architectural history, urban design, and the history of urban planning, and it will also be of interest to art historians, area studies scholars, and the urban studies community more generally.

Open Science by Design National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Board on Research Data and Information, Committee on Toward an Open Science

Enterprise,2018-09-09 Openness and sharing of information are fundamental to the progress of science and to the effective functioning of the research enterprise. The advent of scientific journals in the 17th century helped power the Scientific Revolution by allowing researchers to communicate across time and space, using the technologies of that era to generate reliable knowledge more quickly and efficiently. Harnessing today's stunning, ongoing advances in information technologies, the global research enterprise and its stakeholders are moving toward a new open science ecosystem. Open science aims to ensure the free availability and usability of scholarly publications, the data that result from scholarly research, and the methodologies, including code or algorithms, that were used to generate those data. Open Science by Design is aimed at overcoming barriers and moving toward open science as the default approach across the research enterprise. This report explores specific examples of open science and discusses a range of challenges, focusing on stakeholder perspectives. It is meant to provide guidance to the research enterprise and its stakeholders as they build strategies for achieving open science and take the next steps.

Sustainable Development Disciplines for Humanity Shōjirō Urata,Kazuo Kuroda,Yoshiko Tonegawa,2023 This Open Access book provides eight problem solving lectures for sustainable development for people, peace, and partnerships. Those are three of the five keywords for the Sustainable Development Goals (SDGs): people, the planet, prosperity, peace, and partnerships or “the 5Ps”. Each of these lectures is classified into one of the keywords for SDGs and based on the history of social thought, human development, law, education, sociology, and peace studies. Further, each lecture delineates the essence of each discipline when it is practically applied to development studies. This book, Sustainable Development Disciplines for Humanity, along with its sister volume related to the planet and prosperity, Society, will be useful in studying development. Interdisciplinary research is necessary to achieve the SDGs advocated by the United Nations. Hence, it is essential to learn the basics of individual disciplines, as they each offer ample knowledge fostering problem solving through the accumulation of existing research. This and its sister volume are the first comprehensive textbooks summarizing the essence of each necessary discipline to approach development studies from an interdisciplinary perspective. In developing countries, this book will provide access to development research for readers aiming to further develop their own nations. Moreover, in developed countries, the book will provide access to problem-solving research for readers seeking holistic solutions to complex social problems. .

Spatializing Practices of Regional Organizations during Conflict Intervention Jens

Herpolsheimer, 2021-02-28 This book studies relevant actors and practices of conflict intervention by African regional organizations and their intimate connection to space-making, addressing a major gap regarding what actually happens within and around these organizations. Based on extensive empirical research, it argues that those intervention practices are essentially spatializing practices, based on particular spatial imaginations, contributing to the continuous construction and formatting of regional spaces as well as to ordering relations between different regional spaces. Analyzing the field of developing practices of conflict intervention by the Economic Community of West African States (ECOWAS) and the African Union (AU), the book contributes a new theory-oriented analytical approach to study African regional organizations (ROs) and the complex dynamics of African peace and security, based on insights from Critical Geography. As such, it helps to close an empirical gap with regard to the 'internal' modes of operation of African ROs as well as the lack of their theorization. It demonstrates that, contrary to most accounts, intervention practices of African ROs have been diverse and complexly interrelated, involving different actors within and around these organizations, and are essentially tied to the space-making. This book will be of key interest to students and scholars of African Politics, Governance, Peace and Security Studies, International or Regional Organizations and more broadly to Comparative Regionalism, International Relations and International Studies.
