People and Politics in France, 1848–1870 Roger Price, 2004-06-17 This 2004 book is about politicisation and political choice in the aftermath of the February Revolution of 1848, and the emergence of democracy in France. The introduction of male suffrage both encouraged expectations of social transformation and aroused intense fear. In these circumstances the election of Louis-Napoleon Bonaparte as President of the Republic - and his subsequent coup d'état - were the essential features of a counter-revolutionary process which involved the creation of a system of democracy as the basis of regime legitimacy and as a prelude to greater liberalisation. The state positively encouraged the act of voting. But what did it mean? How did people perceive politics? How did communities and groups participate in political activity? These and many other questions concern the relationships between local issues and personalities, and the national political culture, all of which impinged on communities increasingly

as a result of substantial social and political change.

Introduction to UAV Systems Paul G.

Fahlstrom, Thomas J. Gleason, 2012-07-11 Unmanned aerial vehicles (UAVs) have been widely adopted in the military world over the last decade and the success of these military applications is increasingly driving efforts to establish unmanned aircraft in non-military roles. Introduction to UAV Systems, 4th edition provides a comprehensive introduction to all of the elements of a complete Unmanned Aircraft System (UAS). It addresses the air vehicle, mission planning and control, several types of mission payloads, data links and how they interact with mission performance, and launch and recovery concepts. This book provides enough information to encourage a student to learn more; to provide a specialist with a basic appreciation of the technical issues that drive other parts of the system and interact with their specialty; or to help a program manager understand system-level tradeoffs and know what questions to ask. Key features: Comprehensive overview of all elements of a UAS and of how they interact. Introduces the underlying concepts of key subsystems. Emphasizes system-integration issues and how they relate to subsystem design choices. Practical discussion of issues informed by lessons learned in UAV programs. Introduction to UAV Systems, 4th edition is written both for newcomers to the subject and for experienced members of the UAV community who desire a comprehensive overview at the system level. As well as being a primary text for an introductory course on UAS or a supplementary text

in a course that goes into more depth in one of the individual technologies involved in a UAS, this book is a useful overview for practicing engineers, researchers, managers, and consultants interested in UAV systems.

Hitler's War in the East, 1941-1945 Rolf-Dieter Müller, Gerd R. Ueberschär, 2002 Provides a guide to the extensive literature on the war in the East, including largely unknown Soviet writing on the subject. Sections on policy and strategy, the military campaign, the ideologically motivated war of annihilation in the East, the occupation, and coming to terms with the results of the war offer a wealth of bibliographic citations, and include introductions detailing history of the period and related issues. For military historians, and for scholars who approach this period in history from a socio-economic or cultural perspective. No index. Annotation copyrighted by Book News, Inc., Portland, OR

The Gougeon Brothers on Boat Construction Meade Gougeon, Joel Gougeon, Jan Gougeon, 2005 An illustrated guide to wooden boat construction using WEST SYSTEM epoxy by pioneers in the field of wood/epoxy composite construction. Subjects include Fundamentals of Wood/Epoxy Composite Construction, Core Boatbuilding Techniques, First Production Steps, Hull Construction Methods, and Interior and Deck Construction.

British Aircraft Before the Great War Michael H. Goodall, Mike Goodall, 2001 For the very first time, the history of British pre-World War I aircraft has been gathered together in one volume, with more than 900 of them well illustrated. This new book constitutes a most valuable contribution about a remarkable period in aviation history and is a memorial to the bravery and inventiveness of the intrepid pioneers of that far off era. Among the many famous manufacturer's covered are Avro, Sopwith, Shorts, and Bristol. Many lesser known designers and builders such as Martin-Handasyde and Howard Wright are also given ample coverage.

Epoxy Basics Russell Brown, 2013-07 EPOXY BASICS, Working with Epoxy Cleanly & Efficiently, gives a pointed overview of methods used by the author for Gluing, Filleting, Glassing, and Coating. It includes tips for fill coating, gloss coating, glassing edges and corners, using peel ply, surface preparation, tools, safety, and troubleshooting. Large color photos accompany the text. Russell Brown is well known for his precise work with epoxy and he brings his decades of experience to these 46 pages with the same precision.
