*Finding Moonshine: A Mathematician's Journey Through Symmetry (Text Only)* Marcus du Sautoy, 2012-05-31 This new ebook from the author of 'The Music of the Primes' combines a personal insight into the mind of a working mathematician with the story of one of the biggest adventures in mathematics: the search for symmetry.

**50 Visions of Mathematics** Dara O' Briain, 2014-05-01 Relax: no one understands technical mathematics without lengthy training but we all have an intuitive grasp of the ideas behind the symbols. To celebrate the 50th anniversary of the founding of the Institute of Mathematics and its Applications (IMA), this book is designed to showcase the beauty of mathematics - including images inspired by mathematical problems - together with its unreasonable effectiveness and applicability, without frying your brain. The book is a collection of 50 original essays contributed by a wide variety of authors. It contains articles by some of the best expositors of the subject (du Sautoy, Singh and Stewart for example) together with entertaining biographical pieces and articles of relevance to our everyday lives (such as Spiegelhalter on risk and Elwes on medical imaging). The topics covered are deliberately diverse and involve concepts from simple numerology to the very cutting edge of mathematics research. Each article is designed to be read in one sitting and to be accessible to a general audience. There is also other content. There are 50 pictorial 'visions of mathematics' which were supplied in response to an open call for contributions from IMA members, Plus readers and the worldwide mathematics community. You'll also find a series of proofs of Pythagoras's Theorem - mathematical, literary and comedy - after this, you'll never think of Pythagoras the same way again.

*Secret Science: The Amazing World Beyond Your Eyes* Dara O Briain, 2018-10-04 A brand-new book from the UK and Ireland's best-loved comedian, Dara O Briain! So you think everyday life is boring?! WHAT?! Hoo-ee, are you wrong! No, seriously. There's so much EXTRAORDINARY science going on right from the minute you wake up to when you go to sleep. Actually, while you're asleep, too. Science is a non-stop EVERYWHERE, everything adventure with some incredibly cool stuff going on, too. You've got your incredible brain, which has worked out how to read these words and make playing a video game feel as EXCITING as real life; you've got aeroplanes that can somehow get from the ground into the sky with all those people AND their luggage on board; you've got electricity and artificial intelligence and GPS and buses coming in threes (that's science too) and LOADS more. In Secret Science, Dara O Briain takes you on a journey from the comfort of your favourite chair to the incredible science behind your everyday

life and on into the future!

**Understanding Learning Difficulties in Maths: Dyscalculia, Dyslexia or Dyspraxia?** Judy Hornigold, 2017-10-16 • Why do some pupils experience maths learning difficulties? • How can you determine whether there is a specific learning difficulty such as dyscalculia, dyspraxia or dyslexia? • What teaching strategies can help overcome maths anxiety and specific maths learning difficulties? Without doubt maths is one of the most important subjects taught in schools and yet it is the one subject that can strike fear and dread in children from the very start of their education. In this book Judy Hornigold explores potential causes of maths learning difficulties and particularly the specific difficulties that learners with dyscalculia, dyslexia and/or dyspraxia experience. It considers how general maths anxiety impedes mathematical development and then examines whether this, or a more fundamental and specific difficulty with maths such as dyscalculia, is the real root of difficulties. The book then looks in detail at a wide range of strategies to help overcome general maths anxiety and more specific learning difficulties. It addresses four distinct areas - core number, reasoning, memory and visual spatial awareness - as the main areas of difficulty for learners with dyscalculia (core number and reasoning), dyslexia (memory) and dyspraxia (visual spatial awareness).

**The Princeton Companion to Applied Mathematics** Nicholas J. Higham, 2015-09-15 This is the most authoritative and accessible single-volume reference book on applied mathematics. Featuring numerous entries by leading experts and organized thematically, it introduces readers to applied mathematics and its uses; explains key concepts; describes important equations, laws, and functions; looks at exciting areas of research; covers modeling and simulation; explores areas of application; and more. Modeled on the popular Princeton Companion to Mathematics, this volume is an indispensable resource for undergraduate and graduate students, researchers, and practitioners in other disciplines seeking a user-friendly reference book on applied mathematics. Features nearly 200 entries organized thematically and written by an international team of distinguished contributors Presents the major ideas and branches of applied mathematics in a clear and accessible way Explains important mathematical concepts, methods, equations, and applications Introduces the language of applied mathematics and the goals of applied mathematical research Gives a wide range of examples of mathematical modeling Covers continuum mechanics, dynamical systems, numerical analysis, discrete and combinatorial mathematics, mathematical physics, and much more Explores the connections between applied mathematics and other disciplines Includes suggestions for further

reading, cross-references, and a comprehensive index

*Don't Change The Light Bulbs* Rachel Jones, 2014-09-25 Don't Change the Light Bulbs offers tips and hints on how to be the best teacher you can be, and is written by some of the most respected leaders in education today. It covers primary, secondary and post 16 phases, in addition to cross curricular sections on leadership, ICT, inclusion, creativity, SEN and tutoring. It also presents the practical advice of those who have been there and done it and who now want to share their collective wisdom with you. The aim of which is to make education better, not just in your classroom but for everyone. A useful and inspirational book, it can be read straight through, or dipped in and out of for subject specific advice. A one-stop shop to inspire, invigorate and re-energise teachers and leaders alike, it's comprehensively written and covers an exceptional subject breadth. There is something for everyone, as it provides hints and ideas from both sides of the knowledge/skills debate, and challenges the perceived divide between primary and secondary pedagogy. Don't Change the Light Bulbs will provoke discussion, not only over its useful ideas, but also because of how it seeks to rethink the way we see imagined dichotomies in education. The wise words found within its pages will inspire your teaching, encouraging and supporting you, whilst you are stimulated to think outside of the classroom walls. For use by, and of interest to, everyone involved in the education sector.

Beyond the Sky: You and the Universe Dara Ó Briain, 2017-09-07 So you want to go into space? WHY?! (No, really - it's sort of a terrible idea. We humans are perfectly designed for life on Earth. We can walk around, breathe, drink water, eat vegetables, read books, not get poisoned or crushed to death when we go outside - it's lovely right where we are.) Not convinced? GOOD! People have been dreaming about space travel for centuries - there's something amazing about the idea of leaving our planet behind and setting out to explore the Universe - there's so much we still don't know. UK and Ireland's best-loved comedian Dara Ó Briain takes you on a journey from the safety of your comfiest chair to the furthest reaches of space (and beyond!)

*The Turing Guide* B. Jack Copeland, Jonathan Bowen, Mark Sprevak, Robin Wilson, 2017 This carefully edited resource brings together contributions from some of the world's leading experts on Alan Turing to create a comprehensive guide that will serve as a useful resource for researchers in the area as well as the increasingly interested general reader.

Mathematical Cultures Brendan Larvor, 2016-05-25 This collection presents significant contributions from an international network project on mathematical cultures, including essays from leading scholars in the history and philosophy of mathematics and mathematics education. Mathematics

has universal standards of validity. Nevertheless, there are local styles in mathematical research and teaching, and great variation in the place of mathematics in the larger cultures that mathematical practitioners belong to. The reflections on mathematical cultures collected in this book are of interest to mathematicians, philosophers, historians, sociologists, cognitive scientists and mathematics educators.

**Irish Son** Dan Finn, 2014-05-16 *A Day In the Life*. A snapshot of the world we live in capturing a moment in time. Transgressive fiction depicting the hyper-realism of the mundane on a nondescript Monday in June.

*Cheer Up Love* Susan Calman, 2016-05-05 SUSAN CALMAN AKA WONDER WOMAN & QUEEN OF DRAGONS AS SEEN ON STRICTLY COME DANCING 2017 'DEEPLY HONEST, SURPRISINGLY HILARIOUS AND UPLIFTING' The Pool 'HEART-WARMING: UNMISSABLE' Damian Barr, Metro Susan Calman is a well-known comedian and writer who has appeared on countless radio and television programmes from The News Quiz and Just a Minute on BBC Radio 4, presented Armchair Detectives and Secret Scotland, hosts the podcast Mrs Brightside and stole the nation's hearts in STRICTLY COME DANCING 2017. Her solo stand up show, Susan Calman is Convicted, was broadcast on BBC Radio 4 and dealt with subjects like the death penalty, appearance and depression. It was the overwhelming and positive reaction to the show she wrote about mental health that made Susan want to write a more detailed account of surviving depression when you're the world's most negative and anxious person. The Crab of Hate is the personification of Calman's depression and her version of the notorious Black Dog. A constant companion all her life, the Crab has provided her with the best, and very worst of times. This is a very personal and affecting memoir of how, after many years and with a lot of help and talking, Susan has embraced her dark side and realised that she can be the most joyous sad person you'll ever meet. CHEER UP LOVE IS FUNNY, POIGNANT AND (HOPEFULLY) INFORMATIVE. IT'S ALWAYS GOOD TO TALK AND TO REALISE YOU ARE NOT ALONE. \*Susan Calman's new book, Sunny Side Up, publishes September 2018\*

**The Creativity Code** Marcus Du Sautoy, 2020-03-03 “A brilliant travel guide to the coming world of AI.” —Jeanette Winterson What does it mean to be creative? Can creativity be trained? Is it uniquely human, or could AI be considered creative? Mathematical genius and exuberant polymath Marcus du Sautoy plunges us into the world of artificial intelligence and algorithmic learning in this essential guide to the future of creativity. He considers the

role of pattern and imitation in the creative process and sets out to investigate the programs and programmers—from Deep Mind and the Flow Machine to Botnik and WHIM—who are seeking to rival or surpass human innovation in gaming, music, art, and language. A thrilling tour of the landscape of invention, *The Creativity Code* explores the new face of creativity and the mysteries of the human code. “As machines outsmart us in ever more domains, we can at least comfort ourselves that one area will remain sacrosanct and uncomputable: human creativity. Or can we?...In his fascinating exploration of the nature of creativity, Marcus du Sautoy questions many of those assumptions.” —Financial Times “Fascinating...If all the experiences, hopes, dreams, visions, lusts, loves, and hatreds that shape the human imagination amount to nothing more than a ‘code,’ then sooner or later a machine will crack it. Indeed, du Sautoy assembles an eclectic array of evidence to show how that’s happening even now.” —The Times

**The Problem With Immigrants** Derek Laud, 2015-01-27 In modern Britain, barely a day goes by without a politician, pundit, paper or pub-goer launching into a tirade about 'the problem with immigrants' and what should be done to tackle it. High unemployment, overcrowded schools, benefit scrounging, housing shortages, stretched healthcare services ... pretty much every issue facing the country today seems to be pinned on immigration - but is it really a problem at all? In this fascinating book, Derek Laud sets out to challenge the widespread misconceptions and prejudices surrounding those who have relocated to the UK. He examines the social, economic and cultural impact of immigration across the centuries, and addresses the question of why some ethnic communities struggle here while others thrive. An insightful, thought-provoking and timely examination of one of the most significant issues of our time, this is an indispensable and refreshingly nuanced contribution to the immigration debate.

**Tickling the English** Dara O Briain, 2009-10-01 Nostalgia, identity, eccentricity, gin drinking and occasional violence... these are just some of the themes that stand-up comedian Dara O Briain explores in *Tickling the English*. O Briain moved to England many years ago, but when he takes his show on tour around the country - from deserted seaside towns and remote off-shore islands, to sprawling industrial cities and sleepy suburbs - it's clear to him that his adopted home is still a bit of an enigma. Why do the English pretend to be unhappy all the time? Why can't they accept they rank about 5th, in everything? And what's with all the fudge? But this Irishman loves a challenge; he's certainly got the gregarious personality and the sure-fire wit to bring down the barriers of that famous English reserve, and have a good old rummage inside. Swapping anecdotes with his audiences and spending time wandering in their hometowns, this nosy neighbour holds England up to the light while exploring some of the attitudes he brought over here with him too. As Dara goes door-to-door in search of England in this part tour diary, part travelogue, the result is an affectionate, hilarious and often eye-opening journey through the Sceptred Isle.

**More Maths for Mums and Dads** Mike Askew, Rob Eastaway, 2013-02-21 A brilliant guide for parents through the troubled waters of GCSE maths - and to help you to help your teenager to feel confident and even enjoy it, especially when studying at home. In their first, bestselling, book *Maths for Mums and Dads* Rob Eastaway and Mike Askew helped you and your child make sense of the new methods and topics covered in primary school maths. But as your child embarks on secondary school, two new issues arise. First, in the build-up to GCSE, school children begin to do maths that you probably have never encountered before – or if you have, you never really got it in the first place, and have long since forgotten. Factorising? Finding the locus? Solving for  $x$ ? Probability distributions? What do these even mean? *More Maths for Mums and Dads* gives you all the ammunition to help you to help your teenager get to grips with and feel more confident about – and hopefully even enjoy – GCSE maths. It covers in straightforward and easy-to-follow terms the maths your child will encounter in the build up to GCSE, in many cases gives practical and fun examples of where the maths crops

up in the real world. In addition, the authors introduce the notion of estimation and coin a new term, Zequals. Using the Zequals method will help develop your teenager's feel for numbers, which in turn could transform their experience and enjoyment of everyday maths.

Is There Anybody Out There? Dara O Briain, 2020-10-01 Science fiction meets science fact in this brand new hilarious book from one of the UK and Ireland's best-loved comedians. Genuinely qualified space expert, Dara O Briain, is here with all the answers to help you sort your Area 51s from your messages from Mars. Includes: • how life begins in the first place • how Earth was created • whether aliens might exist elsewhere in the Solar System • the search for other planets like our own • how we could possibly ever get there and . . . • would we really meet aliens? Alongside this runs the hilarious, but not very true story of Carl and his cat, Clive, who will join you on the journey of the book to help take you from novice alien-hunter to bona-fide space expert, with a brilliant final twist! So, is there anybody out there? NO. (Well, maybe.) And do aliens really exist? Probably. (Possibly.)

*What We Cannot Know* Marcus du Sautoy, 2017-05-18 'Brilliant and fascinating. No one is better at making the recondite accessible and exciting' Bill Bryson Britain's most famous mathematician takes us to the edge of knowledge to show us what we cannot know. Is the universe infinite? Do we know what happened before the Big Bang? Where is human consciousness located in the brain? And are there more undiscovered particles out there, beyond the Higgs boson? In the modern world, science is king: weekly headlines proclaim the latest scientific breakthroughs and numerous mathematical problems, once indecipherable, have now been solved. But are there limits to what we can discover about our physical universe? In this very personal journey to the edges of knowledge, Marcus du Sautoy investigates how leading experts in fields from quantum physics and cosmology, to sensory perception and neuroscience, have articulated the current lie of the land. In doing so, he travels to the very boundaries of understanding, questioning contradictory stories and consulting cutting edge data. Is it possible that we will one day know everything? Or are there fields of research that will always lie beyond the bounds of human comprehension? And if so, how do we cope with living in a universe where there are things that will forever transcend our understanding? In *What We Cannot Know*, Marcus du Sautoy leads us on a thought-provoking expedition to the furthest reaches of modern science. Prepare to be taken to the edge of knowledge to find out if there's anything we truly cannot know.
