The Dawn of Eurasia Bruno Macaes, 2018-08-07 A bold, eye-opening account of the coming integration of Europe and Asia Weaving together history, diplomacy, and vivid personal narratives from his overland journey across Eurasia from Baku to Samarkand, Vladivostok to Beijing, Bruno Maçães provides a fascinating portrait of the shifting borderlands between Europe and Asia, tracking the economic integration of the two continents into a new supercontinent: Eurasia. As Maçães demonstrates, glimpses of the coming Eurasianism are already visible in China's bold infrastructure project reopening the historic Silk Road, in the success of cities like Hong Kong and Singapore, in Turkey's increasing global role, and in shifting U.S. foreign policy toward Europe and Asia. This insightful and clarifying book argues that the artificial separation of the world's largest island cannot hold.

The Dawn of Everything David Graeber, David Wengrow, 2021-11-09 INSTANT NEW YORK TIMES BESTSELLER A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or,

alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. The Dawn of Everything fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations

The Dawn of the New World. Humanity After the End of the New World Order Gabriele Sannino, 2024

Dawn of the New Everything Jaron Lanier, 2017-11-21 The guru of virtual reality looks back at the unique experiences that formed his vision for the future of technology With a singular voice and perspective, Lanier who The New York Times calls daringly original . . . a major wizard in the futurist circus. He is the father of virtual reality in the gaudy, reputation-burnishing way that Michael Jackson was the king of pop considers the future of virtual technology in a book that blends memoir with

ideas. He tells the wild story of his own relationship with technology by starting from the beginning. The son of Jewish immigrants and concentration camp survivors, raised in the UFO territory of New Mexico, he lost his mother at a young age and built a geodesic dome with his father in the desert. He worked as a goatherd and midwife, attended college before graduating high school, transferred to and failed out of a tony northeast liberal arts college, played music for money on the streets of New York, and eventually landed in Silicon Valley at the dawn of the first tech boom where he suddenly became rich. This crazy course to becoming a world renowned technology guru informs Lanier's optimism about virtual reality--the technology he has been immersed in from its very start. While he has been very critical of social media and other manifestations of technology, he believes that virtual reality can actually make our lives richer and fuller. Dawn of the New Everything is ultimately a look at what it means to be human in the dawn of unprecedented technological possibility.

Earthfast, the Dawn of a New World Richard

Thornton, 2014-05-17 Earthfast is the culmination of a lifetime of architectural practice and seven years of concentrated research. The journey began when archeologists at the American Museum of Natural History asked Richard to prepare architectural drawings of the Mission Santa Catalina de Guale on St. Catherines Island, GA. One discovery led to another. A big, black hole in American history was filled by reading dozens of obscure 16th and 17th century books, plus visiting many archaeological sites. Being Creek Indian, Richard was able to discern evidence from passages on Native Americans that were missed by earlier scholars. This is the first book to comprehensively examine the architecture and planning practices of the early French, Spanish and English colonies. It is unique. Richard Thornton is a professional Architect & City Planner with degrees from Georgia Tech and Georgie State University. He is the national

Architecture columnist for the Examiner and appeared on the premier of the History Channel's America Unearthed.

Dawn of a New Order Rein Mullerson, 2017-06-30 The most significant development in global politics following the end of the bi-polar Cold War era has been the rise of a multi-polar state system. This has led to the emergence of major potential super-powers, global rivalry, international terrorism and the gradual weakening of the one remaining hegemonic, uni-polar state after the Cold War - the US. The idealistic hopes following the collapse of communism have evaporated and Cold War competition between liberal capitalism and communism has been replaced by multi-polar global rivalry that can only be resolved by a balance of power buttressed by international law. In this ambitious and thought-provoking book, Professor Rein Mullerson outlines the challenges associated with the new geopolitics of the twenty-first century. Based on in-depth research over several decades it is an essential tool for understanding the new world order and the ensuing crises in global politics.

Duperre,2014-01-14 On the young world of Dezrel, brother gods Karak and Ashhur, fleeing their own failed world, recreate mankind in an attempt to make amends. The fledgling race of humanity is guided by the First Families, men and women who will not age so long as their hearts remain devoted to their deities. But quickly the realms are thrown into chaos by the construction of the Temple of the Flesh, built by exiled children of Karak in the unclaimed land of Haven that lies between the two kingdoms. Those of the Temple refuse to bend knee to either god, no matter the risk. Thus comes Karak's ultimatum to the people of Haven: destroy the Temple, or he will destroy it himself. Kingdom of Ants Edward O. Wilson,José M. Gómez

Durán,2010-11-01 One of the earliest New World naturalists, José Celestino Mutis began his professional life as a physician in Spain and ended it as a scientist and natural philosopher in modern-day Colombia. Drawing on new translations of Mutis's nearly forgotten writings, this fascinating story of scientific adventure in eighteenth-century South America retrieves Mutis's contributions from obscurity. In 1760, the 28-year-old Mutis—newly appointed as the personal physician of the Viceroy of the New Kingdom of

Granada—embarked on a 48-year exploration of the natural world of northern South America. His thirst for knowledge led Mutis to study the region's flora, become a professor of mathematics, construct the first astronomical observatory in the Western Hemisphere, and amass one of the largest scientific libraries in the world. He translated Newton's writings and penned essays about Copernicus; lectured extensively on astronomy, geography, and meteorology; and eventually became a priest. But, as two-time Pulitzer Prize-winner Edward O. Wilson and Spanish natural history scholar José M. Gómez Durán reveal in this enjoyable and illustrative account, one of Mutis's most magnificent accomplishments involved ants. Acting at the urging of Carl Linnaeus—the father of taxonomy—shortly after he arrived in the New Kingdom of Granada, Mutis began studying the ants that swarmed everywhere. Though he lacked any entomological training, Mutis built his own classification for the species he found and named at a time when New World entomology was largely nonexistent. His unorthodox catalog of army ants, leafcutters, and other six-legged creatures found along the banks of the Magdalena provided a starting point for future study. Wilson and Durán weave a compelling, fast-paced story of ants on the march and the eighteenth-century scientist who followed them. A unique glance into the early world of science exploration, *Kingdom of Ants* is a delight to read and filled with intriguing information.

Dawn of an Era of Wellbeing Ervin Laszlo, Frederick Tsao, 2021 *Dawn of An Era of Well-Being* does not offer a forecast. It respects the saying, The future is not to be predicted, but created. Humankind is facing monumental challenges--the sustainability of our natural resources, climate change, wealth inequalities, breakdowns in social structures, the impact of artificial intelligence, and of course the threat of pandemics. What we need to understand is that with each of these challenges is an opportunity to create a better future for our Earth. But first

we need to open our eyes and understand how the old normal--the conventions and assumptions about how our systems work--are no longer sustainable. Change is going to occur, and a new normal is not simply necessary; it is also imminent. The authors of *Dawn of An Era of Well-Being* offer a unique worldview called the quantum paradigm that is emerging in society. Their concepts and principles are drawn from theories of Western science and Eastern wisdom traditions of human spirituality. These compass points for navigating the uncharted waters we are entering will be of interest and value to all who want to find a path to a better world for all beings who inhabit it. In this critically important work of advocacy for the possibilities of the human race, authors Ervin Laszlo and Frederick Tsao are joined by several contributors representing a wide range of views by Deepak Chopra, Jean Houston, Neale Donald Walsch and other well-known thought leaders.

Dawn of the New Man Eduard Prugovecki, 2002-05-08 DR. PHILIP DERON is a twenty-first century scientist with a very unique personality and outlook on life, who volunteers as the subject of an experiment in suspended animation. He awakens three-and-half centuries in the future, where he is confronted with two societies at opposite ends of the sociological, economic and political spectrum: Terra and FWF. They both evolved from the ashes of a Last War, which brought mankind to the brink of extinction, and marked the transition of the Old Era into a New Era of technological wonders that can mediate benevolent as well as ominous social tools, habits and institutions. In Terra, Philip is confronted not only with this technological progress, but also with new customs, new values, and a totally new outlook on life. And, for the first time in his life, he falls in love. And not with just one, but with two enchanting Terran women Nina Faur, a psychologist, and Judy Bjork, a geneticist both of whom reciprocate his feelings in a, to his Old Era mentality, most unorthodox manner. And just as he finally begins to cope with this, by the standards of his own

times, most unusual and intriguing situation, he unwittingly becomes involved with a woman most exceptional even by Terran standards Anita Brandt, a paranormal possessing extraordinary attributes and talents. Anita introduces Philip to Parapsychic Transcendentalisma school of thought which strives to realize mans spiritual potential by developing his latent psychic abilities, which enable mental mergers and empirically strive to establish the existence of a Cosmic Consciousness intrinsic in the writings of some Old Era philosophers and thinkers. Further stimulated by the inquiring minds of Anita, Nina and Judy, Philip launches into an investigation of other Terran transcendentalist movements. They reveal to him an entirely new world of philosophical ideas and scientific achievements that attempt to provide answers to questions that have preoccupied thinkers since the dawn of civilization. Having been brought up, however, in the Old Era, Philip realizes how vulnerable the ultra-pacifistic Terran civilization is to the aggressive tendencies of FWFthe only other country with which it shares the planet Earth since the Last War that has annihilated most of mankind. As opposed to Terra, in which the computer-assisted techniques of coordinated group decision making have eliminated the need for any form of government, FWF is ruled by an oligarchy that has mentally enslaved most of its population by taking advantage of the same technology that in Terra is used to liberate the human mind and stimulate the human spirit. Lulled into social inertia by mind-numbing Tri-Di shows and the psychologically addictive pleasures of Joy Capswhich induce states of ecstasy by the direct stimulation of brain centers as reward for efficiency at workthe FWF masses are the obedient subjects of their political and economic masters. Outraged by some of the manifestations of the subliminally induced mental and spiritual lethargy of these masses, Philip embarks on a risky and prolonged struggle to change the mentality and the social conditions prevalent in FWF. Ultimately, his confrontation with the FWF establishment

endangers his life as well as that of Nina and Anita the two courageous and exceptional Terran women with whom he had developed a most unusual and unique relationship. ON A MORE FUNDAMENTAL LEVEL, Dawn of the New Man is a novel about the aspirations of mankind, and about spiritual and social growth: the spiritual growth of its protagonist, Dr. Philip Deronan intelligent and highly educated scion of a super-rich family, but largely a product of the contemporary Western social milieu into a sensitive and empathetic member of the ethically and socially advanced Terran society, in which humanistic values are not just preached but also routinely practiced
