

De Havilland Dh 106 Comet

Martin Painter

De Havilland Comet Kev Darling,2005-10-14 The de Havilland DH.106 Comet was the world's first pure-jet airliner. Powered by four de Havilland Ghost turbojet engines and accommodating its passengers in a pressurized cabin, the Comet offered new levels of speed, comfort and smoothness to the air traveler when it entered service with BOAC in 1952.

De Havilland Dh.106 Comet Wolfgang Borgmann,2024-04-28 A new illustrated history of the first commercial jet airliner

De Havilland Comet R. E. G. Davies,Philip Birtles,1999 July 27th 1999 is the 50th anniversary of the first flight of the de Havilland DH 106 Comet airliner. This tribute volume marks the inauguration of the commercial Jet Age by the British Overseas Airways Corporation (BOAC).

De Havilland Comet Key Publishing,2022-08-30 The de Havilland DH106 Comet aircraft made history as the first jet airliner to fly and the first to offer a scheduled jet passenger service. With over 90 images and first-hand accounts, this book covers the creation, development, testing, successes and failures of the Comet, and looks at its lasting impression on aircraft history.

De Havilland Comet Colin Higgs,2018-11-30 “A first-rate review of the history of the world's first commercial jetliner, its early difficulties and their rectification” (Firetrench). The world got a little smaller in July 1949 when the first jet-powered airliner took to the skies barely four years after the end of the Second World War. Not only was the de Havilland Comet 1 was a lot faster than previous airliners, but it could also fly higher and further. It was packed with new technology but, perhaps most importantly for those early passengers, it was a quiet, luxurious, and even pleasant experience, something that could never be said for the noisy piston-engine aircraft that came before. The Comet’s leadership in jet travel for the future was assured until aircraft began crashing. The first ones were put down to pilot error but two disastrous events in 1954 grounded the fleet and Britain’s advantage over the rest of the world was lost. Boeing caught up with its ubiquitous 707 and the Comet was destined to become but a memory. However, rising from the ashes came a new Comet—one that was bigger and more powerful than before and designed for completely different roles. Where the first Comets had provided an expensive and plush way to travel for the rich few, the new Comet 4s carried more passengers to a multitude of destinations inevitably becoming key carriers for the early package holidaymakers. At the same time, they became vital strategic transports for the RAF as the British Empire receded. This book tells the full story of the world’s first jet-powered airliner, from its remarkable beginnings, through its early flight trials programme to its entry into service. The type’s military career is also covered, as is its construction; also included in this volume are details of the numerous variants produced and those still surviving as exhibits today.

Comet! The World's First Jet Airliner Graham Simons,2013-11-14 This new volume from the respected and well-regarded aviation historian and author Graham Simons is sure to appeal to all aviation enthusiasts, including as it does a wide array of historical sources and archival information drawn together into one consolidated volume □ the closest to a definitive study of the craft than any produced before. ??Extensively illustrated throughout, the book features details lifted directly from enquiry and salvage reports, much of which has never been published before and offers a unique insight into the failures and tragedies that blighted the early days of development, laying down lessons that were ultimately to benefit later designs. As part of his research into the book, the author met and interviewed Harry Povey, the De Havilland Production Manager and John Cunningham, the Comet test pilot who would be the first to experience flight at the helms of the iconic craft. Both of these first hand accounts are relayed in the book, adding a deeper sense of authenticity and a more personalised account of proceedings than facts and reports alone are able to achieve.??Attention is also paid to the derivative Nimrod design, and the book features an interview that the author conducted with the aircraft commander of the last ever Nimrod operational flight. Interviews of this kind are supplemented by the author's own narrative of proceedings, setting personal experience within historical context and exploring the themes and historical topics that the interviews evoke.

First Jet Airliner Timothy Walker,Scott Henderson,2000 This work provides a history of the first civil jet transport to be designed, built and to enter world service. It includes a close-up-detail section for modellers, and specially commissioned colour profiles introduce each chapter.

De Havilland Aircraft Since 1909 Aubrey Joseph Jackson,R. T. Jackson,1987 The de Havilland Aircraft Company was founded in 1920, but had its origins with the first steps in biplane design made by Geoffrey de Havilland, who in 1908 left his job with the Motor Omnibus Construction Company to embark on a career as an aeroplane designer. During the First World War, his D.H. 4 bomber design was supplied in hundreds to both the Royal Flying Corps and the United States Army Air Service. A D.H.4 variant was also the first aeroplane to provide a passenger service, between Paris and London. The tradition built on the reputation of de Havilland's work during the First World War, also provided the foundation for some of the most popular aircraft for civil and military aviation - the D.H.60 G Gipsy Moth, the D.H.71 Tiger Moth, the D.H.98 Mosquito light bomber, and the D.H.106 Comet are all storied names in the history of British aviation. The story that unfolds in these pages also includes the tragic death of Geoffrey de Havilland's son,

Geoffrey Jr., a test pilot killed flying the De Havilland D.H.108. The late A J Jackson had a particular affection for de Havilland aircraft and was particularly fond of flying Tiger Moths. He is also the author of Avro Aircraft since 1908 and Blackburn Aircraft since 1909 (both Putnam).

Jet Age Sam Howe Verhovek,2011-08-02 The captivating story of the titans, engineers, and pilots who raced to design a safe and lucrative passenger jet. In *Jet Age*, journalist Sam Howe Verhovek explores the advent of the first generation of jet airliners and the people who designed, built, and flew them. The path to jet travel was triumphal and amazingly rapid-less than fifty years after the Wright Brothers' first flight at Kitty Hawk, Great Britain led the world with the first commercial jet plane service. Yet the pioneering British Comet was cursed with a tragic, mysterious flaw, and an upstart Seattle company put a new competitor in the sky: the Boeing 707 Jet Stratoliner. *Jet Age* vividly recreates the race between two nations, two global airlines, and two rival teams of brilliant engineers for bragging rights to the first jet service across the Atlantic Ocean in 1958. At the center of this story are great minds and courageous souls, including Sir Geoffrey de Havilland, who spearheaded the development of the Comet, even as two of his sons lost their lives flying earlier models of his aircraft; Sir Arnold Hall, the brilliant British aerodynamicist tasked with uncovering the Comet's fatal flaw; Bill Allen, Boeing's deceptively mild-mannered president; and Alvin Tex Johnston, Boeing's swashbuckling but supremely skilled test pilot. The extraordinary airplanes themselves emerge as characters in the drama. As the Comet and the Boeing 707 go head-to-head, flying twice as fast and high as the propeller planes that preceded them, the book captures the electrifying spirit of an era: the Jet Age. In the spirit of Stephen Ambrose's *Nothing Like It in the World*, Verhovek's *Jet Age* offers a gorgeous rendering of an exciting age and fascinating technology that permanently changed our conception of distance and time, of a triumph of engineering and design, and of a company that took a huge gamble and won.
