

De Havilland Vampire

Martyn Chorlton

History of the de Havilland Vampire David Watkins,2013-11 A comprehensive history of the Vampire's development and operational service, covering many of its notable firsts, particularly as the first jet fighter to cross the Atlantic and the first jet to land on an aircraft carrier. Lavishly illustrated with comprehensive technical appendices.

The History of the De Havilland Vampire David Watkins,2014-05-10 The definitive book on an iconic aircraft Illustrated throughout with a varied and interesting selection of images, many previously unpublished An early jet aircraft that collected many notable firsts including the first jet fighter to cross the Atlantic and the first jet to land on an aircraft carrier Comprehensive appendices covering serial allocations, production, export details and preserved airframes The de Havilland Vampire was the second of the RAF's first-generation, post-Second World War jet fighters to enter service. It began life as an interceptor but was soon re-tasked in the day fighter/ground attack roles with the 2nd Tactical Air Force in Germany from 1948 to 1954 and with the RAF's Middle and Far East Air Forces. Throughout its forty-six-year career, it collected many notable firsts: it was the first jet fighter to cross the Atlantic; the first jet to land on an aircraft carrier; and the first jet trainer on which student pilots qualified for their 'Wings'. In addition to playing a full part in the RAF's order of battle during the 1940s and 1950s, the Vampire also served with the Fleet Air Arm and became an export success story for the British aircraft industry with hundreds sold to air forces worldwide. For a brief period during the 1950s, the Vampire formed the backbone of the RAF's night-fighter force and between 1952 and 1967, the Vampire trainer was responsible for a steady flow of trained pilots for the RAF, Royal Navy and foreign air forces. This comprehensive history covers the Vampire's development and operational service. It has been written with the full co-operation of the manufacturer, MoD, RAF and other world air forces, mixing narrative and technical detail with vivid personal accounts from those involved with the aircraft. Comprehensive appendices include technical specifications, production details, serials and export details. It is also lavishly illustrated and includes more than one story of encounters with UFOs by RAF Vampire pilots. **This electronic edition includes 315 photographs**

De Havilland Vampire, Venom and Sea Vixen Philip Birtles,1999

De Havilland Twin-boom Fighters Barry Jones,2004 De Havilland's first contribution to the brave new world of the jet fighter was the Vampire - a small, attractive aircraft with its de Havilland engine mounted directly behind the pilot. Most distinctively, its tailplane and fins were supported by twin booms attached to the wings. This was to be the first in an illustrious and successful trio of aircraft that shared the initial V in their name and the pretty twin-boom arrangement. Aviation historian Barry Jones has chronicled the development and service of the Vampire, the higher-powered Venom and its Sea Venom derivative, and the Sea Vixen. Covering the types' service with air forces throughout the world, and illustrated with many archive photographs, this is the perfect celebration of this much-loved family of aircraft

Vampire Boys Charlotte Bailey,2022-12-14 Sliding out of the shadows of World War Two, the de Havilland Vampire - accompanied by the distinctive whine of its Goblin engine - quickly proved itself an effective alternative to piston-powered fighters. After entering operational service with the RAF (as the service's first single-engined jet) in 1946, the Vampire - sought by air forces the world over - held a number of notable records: the first fighter to exceed 500 mph, the first to set a world altitude record of almost 60,000 ft, the first jet to take off and land from an aircraft carrier, and the first jet to cross the Atlantic Ocean. Not bad for something built partly of wood. Throughout these pages, the 'Vampire Boys' bring to life the trials and tribulations of operating a first-generation jet across the globe. Through their insightful anecdotes and exceptional experiences, the reader can follow squadrons across the dusty deserts of Iraq to exercises in West Germany. First-hand tales of training, aerial handling, incidents and accidents (including the much-maligned spin characteristics) and squadron life - accompanied by unique images - bring together a portrait of a pioneering time in aviation advancement, right up to the present day with the T.11 still flying from Coventry Airport.

De Havilland Twin Booms Adrian M. Balch,2002 This volume features the famous de Havilland Vampire, Venom and Sea Vixen aircraft that all shared the twin-boom tail design. They were amongst the first military jets to enter service with the RAF and Fleet Air Arm after World War I, and many where exported.

Vampire Key Publishing,2023-03-31 Developed by the de Havilland Aircraft Company, the Vampire jet fighter first flew on 20 September 1943. In this new book edition, the design, development and service of this impressive aircraft are explored, accompanied by an array of beautiful images.

Vampire Martyn Chorlton,2013

The Shepherd Frederick Forsyth,2012-10-30 Christmas Eve, 1957: An RAF pilot needs a miracle to make it home as his fighter jet begins to fail, in a story by the #1 New York Times-bestselling author. It is Christmas Eve, 1957, and there are cozier places to be than the cockpit of a de Havilland Vampire fighter plane. But for the Royal Air Force pilot who has just taken off from West Germany, this single-seat jet is the only way to make it back to England for Christmas morning. His flight plan is simple; the fuel tank is full. In sixty-six minutes, he will be back in Blighty. But then the plane begins to fail. First the compass goes haywire, then the radio dies. Lost and alone above the English coast, the pilot is searching for a landing strip when the fog closes in, signaling certain death. He has given up hope when a second shadow appears—a Mosquito fighter-bomber of World War II vintage. The plane is a “shepherd,” guiding the Vampire to a safe landing, and its appearance is a gift from fate, a miracle out of time—but for one lonely pilot, the mystery has just begun. A classic bestseller, beloved by aviation fans (including actor John Travolta, who calls it “one of my favorites because it personalizes the two planes”) and general readers alike, The Shepherd is a gripping, heartwarming tale for a cold winter's night.

Jet Fighters Coloring Book John Batchelor,Coloring Books,1998-06 Forty-four accurately rendered illustrations with captions capture the exciting details of a low-flying U.S. F-117 Stealth fighter, an aircraft carrier-based F-18, a Tornado GR-1, a Russian-built MiG-15, and other historic planes.

Vampires and Fleas Alec Brew,2003-12-18 In this book Alec Brew tells the whole story of the British aircraft preservation movement. From early days at Old Warden and the Science Museum, through the establishment of the famous, but now long-past, Skyframe and Strathallan collections.

Jet Age Sam Howe Verhovek,2011-08-02 The captivating story of the titans, engineers, and pilots who raced to design a safe and lucrative passenger jet. In Jet Age,

journalist Sam Howe Verhovek explores the advent of the first generation of jet airliners and the people who designed, built, and flew them. The path to jet travel was triumphal and amazingly rapid-less than fifty years after the Wright Brothers' first flight at Kitty Hawk, Great Britain led the world with the first commercial jet plane service. Yet the pioneering British Comet was cursed with a tragic, mysterious flaw, and an upstart Seattle company put a new competitor in the sky: the Boeing 707 Jet Stratoliner. Jet Age vividly recreates the race between two nations, two global airlines, and two rival teams of brilliant engineers for bragging rights to the first jet service across the Atlantic Ocean in 1958. At the center of this story are great minds and courageous souls, including Sir Geoffrey de Havilland, who spearheaded the development of the Comet, even as two of his sons lost their lives flying earlier models of his aircraft; Sir Arnold Hall, the brilliant British aerodynamicist tasked with uncovering the Comet's fatal flaw; Bill Allen, Boeing's deceptively mild-mannered president; and Alvin Tex Johnston, Boeing's swashbuckling but supremely skilled test pilot. The extraordinary airplanes themselves emerge as characters in the drama. As the Comet and the Boeing 707 go head-to-head, flying twice as fast and high as the propeller planes that preceded them, the book captures the electrifying spirit of an era: the Jet Age. In the spirit of Stephen Ambrose's Nothing Like It in the World, Verhovek's Jet Age offers a gorgeous rendering of an exciting age and fascinating technology that permanently changed our conception of distance and time, of a triumph of engineering and design, and of a company that took a huge gamble and won.
