De Tomaso from Buenos Aires to Modena Daniele Pozzi,2015-11-26 The first illustrated and complete book on one of the top marques of the Olympus of automotive history, written in collaboration with the de Tomaso family. -- The volume traces the sporting and entrepreneurial story of Alejandro de Tomaso, exhaustively illustrating the characteristics of the models that have made the Automobili De Tomaso famous around the world, such as the Pantera, truly a cult object, especially in the United States. Many different dimensions are interwoven in de Tomaso's story: the world of the gentlemen-sportsmen who animated the motor-racing competitions in the 1950s-1960s, the genuine and somewhat?provincial? charisma of the artist-mechanics of the Modena area, and the story of the great American industrial dynasties and the intricate developments of the Italian automotive industry. -- The book is born the collaboration with the de Tomaso family, who for the first time have opened the private archives of the founder of the auto maker, making available to the public at large the private photographs, the historical images of all the models and the technical drawings, revealing the secrets and the behind-the-scenes episodes of a legendary production. To further enrich the book an ad hoc photographic campaign will be realized. The texts in the volume, rigorous yet accessible to the non-expert, will be entrusted to a scholar of the history of this Italian business, while the technical section will be written by a team of sports car experts chosen together with the de Tomaso family.

Bella Mangusta Dick Ruzzin,2016-07-30 When we reflect upon the history of Italian coachbuilding and design, it is impossible to ignore the De Tomaso / Giugiaro Mangusta. It was stunning from every angle; in both art and engineering, it challenged and defined every aspect of motor car design in the mid-1960s while solving the problems associated with midengined design with beauty, grace, and authority. By the dictates of its creator, the Mangusta would be a race car for the street, its chassis based on a contemporary competition car. By the hand of one of the greatest automotive designers in Italy, it would be wide, low, sleek, and of perfect line. Ex-GM Designer Dick Ruzzin knows this well, as did others whose lives were devoted to automotive architecture. The Detroit doyens of design, William L. Mitchell at GM and Gene Bordinat at Ford, realized immediately that the Mangusta was one of the most advanced and beautiful cars in the world. Both ordered a specially tailored Mangusta for their personal use, and Mitchell had his equipped with a Chevy V8. Ruzzin has owned the ex-Mitchell Mangusta for the last forty-seven years. He spent years in Turin and interviewed many of those who still remembered how the Mangusta came to be created. Writing with passion, experience, and knowledge, Ruzzin has expertly authored the only book specifically about the design of the Mangusta. —Pete Vack, Editor and Publisher, VeloceToday.com, LLC ----- Reading about Dick Ruzzin's Mangusta reminds me of two of the most unforgettable characters I ever met. They are, of course, Alejandro de Tomaso and William L. Mitchell. Once known as Europe's most profligate creator of exotic sports and racing prototypes, Argentinean emigre de Tomaso had a phase of fondness for backbone-framed cars that gave birth to the Mangusta, magnificently styled by the young Giorgetto Giugiaro. The mercurial Alejandro finally made good as a car manufacturer—with a little help from the Italian government. A car enthusiast from his bald dome to his Bond Street shoes, Bill Mitchell arranged for GM Styling to buy the latest sports cars to help him persuade GM's often hidebound management that more exciting cars might be good for business. His Chevy-engined Mangusta was a perfect example. Ironically its successor in de Tomaso oeuvre was the Pantera, launched by Ford like an arrow at the heart of GM. Now Dick Ruzzin brings his own enthusiasm for great automobiles to this presentation of an esoteric example from the golden age of Italian sports cars, deeply informed on all aspects of the Mangusta as only a passionate owner can be. —Karl Ludvigsen

Detomaso Pantera David Adler,Linda Adler,Wallace Wyss,2006 In recent years, interest in the DeTomaso marque has increased dramatically. Good Panteras are harder to find each year, and values continue to rise. What's fascinating about the Pantera community is that no two owners seem to prepare their cars in the same way, and in fact completely original cars are a minority. Unlike in the Corvette, MoPar or Ferrari world where originality is worshipped, in the Pantera constellation, modifications and upgrades are for the most part, accepted and encouraged as long as they are done to a very high standard. This color picture book presents all of the models of Panteras that were offered by the factory in Italy, including the GTS, GT5, GT5-S and the very rare Group 4 race cars. In sharp contrast, mild to wild owner modifications of these cars are shown, including blowers, turbos, massive brakes and carbon fiber body panels, to name a few.

Pantera -Ultimate Portfolio R.M. Clarke,2002-02-23 In September 1969 Ford announced that they would market the de Tomaso Pantera through its Lincoln-Mercury dealer Styled by Ghia these cars had mid-mounted, American-built Ford V8 engines and represented a type of high-performance car that were popular in the 1970s. The introductory model was 330bhp later developed to the 350bhp GTS; then came the GT5, GT5S and ultimately the 200. Sales, however, never reached expected levels and so Ford ceased to import the cars in 1974 due to strict safety regulations but the cars continued to be built until 1994. This is a book of contemporary road and comparison tests, specification and technical data, new model intro's, driver's reports, production methods. Models covered include: GTS, GT5, GT5S and 200.

Political and Economic Change in the Automobile Industry Claudio Cosentino,2009-10-20 Inhaltsangabe:Definition of problem This paper deals with the future strategic orientation of manufacturers of luxury cars. The sociological, political, ecological, technological and economic environmental factors and their influence on corporate orientation will be highlighted and analysed. This fundamental problem for car niche

brands is investigated through the example of Maserati, an upmarket brand which has become, like no other, both a trendsetter and a victim of the expectations of its patrons and customers and is now struggling for market shares together with its parent company. This paper will initially highlight influencing factors and also the need for efficiency in manufacture and production, as well as the new tasks and challenges arising from legislation. Macroeconomic factors, such as the shrinking purchasing power in developed countries like the U.S. due to inflation (and stagflation) worries (which result from the daily rise in raw material prices), exert just as great an influence on car sales figures as the growing number of super-rich in Third World countries. The question concerning the shift of target markets arises. Do the raw materials inhibit sales for these products? Or is the clientele immune? What innovations are demanded, and are they compatible with the attributes associated with super sports cars and luxury cars? Ferrari, Maserati, Lamborghini, and even Aston Martin are manufacturers who boast that they make cars with horrendous power ratings, fuel consumption, and emission levels. Their customers love the sound of the engines, comparable as they are with aircraft engines. They produce engines with eight, ten or even twelve cylinders, epitomising power, but at the same time are more suitable for the race track than for the road if one compares their figures with those of classic mass-market cars. The customers rate performance and sound higher than fuel consumption per litre and environmental awareness. These are geared to basic male instincts. Beauty of form, brute force and eroticism are mostly described in terms of beautiful women or sins or mythological mental attributes. The marketing is concerned with lifestyle, passion, and the child in people, the Freudian id. A man simply wants to own these mighty projectiles; forget common sense. The owner of such a car is, according to this car s marketing image, the one who has created it. He is successful, healthy, rich and good-looking. A majority of the world s male [...]

The Fords Peter Collier,David Horowitz,2002 The Fords: An American Epic is the dramatic story of three generations of Fords and of the dramatic conflict between fathers and sons played out against the backdrop of America's greatest industrial empire. The story begins with Henry I, the mechanical wizard, tinkerer, and mad genius who drove the automobile into the heart of American life and conquered the world with it. But in the end he became an embittered crank who so possessively loved the company he built that when his son, Edsel, tried to change it to suit the times, Henry destroyed him. It was left to Edsel's son, Henry II, to avenge him and save the Ford Motor Company. From the details of Henry I's illicit affair, which produced an illegitimate son, to the life and loves of Hank the Deuce and his celebrated feud with Lee Iacocca, this is an engrossing account of a vital chapter in American history. The authors have added a new preface to this now classic work, showing how Henry II's line lost out to the line of his brother William Clay Ford in the quest to control the company in the twentieth century.
