#### **Summary of Coating Surveys on the Four Air Command Frigates (Zeven Provinciën Class) (Onderzoek Naar de Conditie Van de Coatingsystemen Op Vier**

**Luchtcommandofregatten (Zeven Provinciën Klasse)).** ,2008 The condition of coating systems onboard four air command frigates (Zeven Provinciën class) is subject to discussion within the Royal Netherlands Navy. An inventory has been made into the current condition of coating systems applied in a selection of various tanks and bilges, underwater hulls, topsides/superstructure and deck coverings. Types of defects and surface areas affected by these defects have been assessed accurately. Causes have been investigated. The survey has revealed that some of the selected coating systems are not fit for purpose (sew' age tanks, grey water tank 2, antifouling on LCF 3/4, deck covering F deck). The quality of the steel works (welding) can be improved, the application of the coating systems varied between poor to reasonable and several material selections/combinations on the superstructure were unfavourable. Bilges in pump rooms 2 and 3 are sensitive to pitting corrosion. These shortcomings and the lack of maintenance have resulted in a performance which is poorer than expected considering the short service period for various pans. Better results can be attained following a review of coating specifications, when quality control during new building is improved and more cleared guarantee agreements are drafted.

*The Allied Defense of the Malay Barrier, 1941-1942* Tom Womack,2015-12-01 Though few realize it, the Netherlands East Indies were the object of Japan's attack on Pearl Harbor in December 1941. Likewise, their invasions of Guam, Wake Island and the Philippines were mainly diversionary operations to safeguard their main assault on Dutch and British colonies. Since the end of World War I, Japan had coveted the vast East Indies oil reserves, and the colony had feared invasion since Germany overran Holland in May 1940. Isolated politically the weakly defended archipelago was a tempting prize. The East Indies government initially maintained a strict policy of neutrality while desperately working to build up its military strength. As Japanese actions pushed the region toward war, the Dutch reluctantly embraced closer ties with America and Britain. For a brief period, the East Indies were key players in Pacific War strategy. This book details for the first time in English the Dutch prewar strategy, their efforts to counter Japanese espionage and their sizable though largely forgotten military contribution in the early months of the Pacific War.

*Seaforth World Naval Review 2017* Conrad Waters,2016-10-30 “This fascinating book examines trends in maritime strategy and geopolitics . . . including technological advances and significant new ships.”—Nautilus Telegraph This annual has an established reputation as an authoritative but affordable summary of all that has happened in the naval world in the previous twelve months. It combines regional surveys with one-off major articles on noteworthy new ships and other important developments. Besides the latest warship projects, it also looks at wider issues of importance to navies, such as aviation and electronics, and calls on expertise from around the globe to give a balanced picture of what is going on and to interpret its significance. Features of this edition include an in-depth analysis of the Royal Netherlands Navy, while Significant Ships will cover the USN's radical new Zumwalt class destroyers, the Republic of Korea's amphibious assault ship Dokdo, and the JMSDF's Akizuki class destroyers, among others. There are also technological reviews dealing with naval aviation by David Hobbs (with a focus on the present state of the RN's Fleet Air Arm), while Norman Friedman surveys naval surface-to-surface missiles. The World Naval Review is intended to make interesting reading as well as providing authoritative reference, so there is a strong visual emphasis, including specially commissioned drawings and the most up-to-date photographs and artists' impressions. For anyone with an interest in contemporary naval affairs, whether an enthusiast or a defense professional, this annual has become required reading. “An extraordinarily useful annual from the point of view of a comprehensive update on the world's navies . . . a key resource for keeping up, whether in cabin or armchair.”—Seaweed

**Navies of Europe** Lawrence Sondhaus,2014-06-11 Europe ruled the waves for most of the modern era and even when its navies were eclipsed in size by the US force, they continued to dominate world wars. In this unique history of Europe's naval forces, Larry Sondhaus charts the development of naval warfare from the transition to steam to recent actions in the Persian Gulf. Combining detailed technical information with an in-depth comparison of warfare and tactics across some of the key conflicts of the modern world, this is an absorbing account of European and British seapower, past and present.

**THE ORGANIZATION AND ORDER OF BATTLE OF MILITARIES IN WORLD WAR II** Charles D. Pettibone,2014-04-16 There are numerous Order of Battle books on the market. So what makes this one so special? Why should one decide on this particular book? Most Order of Battle books usually deal only with the division and corps level of a country's army. Most higher commands are not covered. This book deals with all the branches of a country's military, giving a breakdown of all the major echelons of command, from theater down to brigade, under each component (army group, armies, corps, division, and brigade), and the equivalent command structure for the other military branches are included. Second, it attempts to give an overall command structure of the country's military, showing the central headquarters command structure as well as the major components (army groups, armies, corps, etc.) Third, most Order of Battle books list the commanders and their dates of tenure. This book includes those but also lists their next duty assignments or where they went after leaving the post. One can literally trace a general officer's career through the upper echelons of command, making this completely different from all the other Order of Battle books on the market.

*The Decline of European Naval Forces* Jeremy Stöhs,2018-04-15 The Decline of European Naval Forces aims to provide insight into the evolution of Europe's naval forces since the end of the Cold War. To illuminate the drastic changes many European navies have undergone over the last twenty-five years, Jeremy Stöhs analyzes the defense policies and naval strategies of eleven European states as well as the evolution, deployment, and capabilities of their respective naval forces. In these case studies, the development of Europe's most important naval forces is assessed per the respective strategic framework in which they have operated over the past two decades. Stöhs describes not only the general composition of each force but also the range of their capabilities and their important technical features. His study shows that since the end of the Cold War, all but a few European navies have significantly decreased in size and, thus, have ceded important capabilities along the way. Based on the understanding of sea power as a prerequisite for political influence and economic health, the consequences of the geopolitical shift toward the Asian-Pacific region, and most importantly the general decline of Europe's traditional naval capabilities, the author concludes that the ability of European states to influence events near and abroad by means of their naval forces has atrophied and will continue to be called into question in the future.

*Stealth Technology* Fouad Sabry,2022-08-18 What Is Stealth Technology Stealth technology is a sub-discipline of military tactics and passive and active electronic countermeasures. It covers a range of methods used to make personnel, aircraft, ships, submarines, missiles, satellites, and ground vehicles less visible to radar, infrared, sonar, and other detection methods. Encyclopedia of Military Science G. Kurt Piehler,2013-07-24 The Encyclopedia of Military Science provides a comprehensive, ready-reference on the organization, traditions, training, purpose, and functions of today's military. Entries in this four-volume work include coverage of the duties, responsibilities, and authority of military personnel and an understanding of strategies and tactics of the modern military and how they interface with political, social, legal, economic, and technological factors. A large component is devoted to issues of leadership, group dynamics, motivation, problem-solving, and decision making in the military context. Finally, this work also covers recent American military history since the end of the Cold War with a special emphasis on peacekeeping and peacemaking operations, the First Persian Gulf War, the events surrounding 9/11, and the wars in Afghanistan and Iraq and how the military has been changing in relation to these events. **International Order at Sea** Jo Inge Bekkevold,Geoffrey Till,2016-10-15 This book examines how international order at sea is challenged, changed and maintained. The book surveys challenges to the international order at sea in the Asia-Pacific, the Indian Ocean Region, the Atlantic Ocean and the Arctic Ocean. It explores the interaction between and cooperation among leading, emerging and smaller naval powers, both naval and coastguard responses, required for the maintenance of good order at sea. Six broad and interlinked issues are identified that will influence the future international order at sea: the balance between the maritime and the continental domains; the balance between great power rivalry and cooperation; the contest between access and denial; the operational balance between preparing; building and training for warfighting as opposed to operations other than war; how to manage 'disorder' security challenges that very often transcends territorial waters and national boundaries, and finally, the balance between safeguarding national interests and contributing to collective efforts preserving the international order at sea.

**Seaforth World Naval Review 2019** Conrad Waters,2018-10-30 Now celebrating its tenth edition, World Naval Review provides an affordable but yet authoritative summary of global naval developments over the past 12 months. Regional surveys of fleet evolution and procurement by editor Conrad Waters are supplemented by in-depth articles from a range of subject experts focusing on significant new warships, technological advances and specific navies. Features in this edition include extended

reviews of the new aircraft carriers USS \_Gerald R. Ford\_ and HMS \_Queen Elizabeth\_, the largest ships ever to serve in their respective fleets. Technological subjects include assessments of naval communications by Norman Friedman and autonomous systems by Richard Scott, whilst David Hobbs' usual review of naval aviation is expanded to include a broader analysis of key trends over the last decade. Meanwhile, reviews of specific fleets focus on the navies of Canada, Peru and Singapore, all medium-sized naval powers at critical – if very different – phases of their development. Firmly established as providing the only annual naval overview of its type, World Naval Review is essential reading for anyone – whether enthusiast or professional – interested in contemporary maritime affairs.

Naval Firepower Norman Friedman, 2013-08-20 An in-depth history of naval battleship firepower from before World War I to the end of World War II, by America's leading naval analyst. For more than half a century, the big gun was the arbiter of naval power, but it was useless if it could not hit the target fast and hard enough to prevent the enemy doing the same. Because the naval gun platform was itself in motion, finding a "firing solution" was a significant problem exacerbated when gun sizes increased, fighting ranges lengthened, and seemingly minor issues like wind velocity had to be considered. To speed up the process and eliminate human error, navies sought a reliable mechanical calculation. This heavily illustrated book outlines for the first time in layman's terms the complex subject of fire-control, as it dominated battleship and cruiser design from before World War I to the end of the dreadnought era. Covering the directors, range-finders, and electro-mechanical computers invented to solve the problems, author Norman Friedman explains not only how the technology shaped (and was shaped by) the tactics involved, but also analyzes their effectiveness in battle. His examination of the controversy surrounding Jutland and the relative merits of competing fire-control systems draws surprising conclusions. He also reassesses many other major gun actions, such as the battles between the Royal Navy and the Bismarck, and the U.S. Navy actions in the Solomons and at Surigao Strait. All major navies are covered, and the story concludes at the end of World War II with the impact of radar.

Seaforth World Naval Review 2014 Conrad Waters, 2013-11-07 Since its launch in 2009 this annual has rapidly established a reputation as an authoritative but affordable summary of all that has happened in the naval world in the previous twelve months. It combines the standing features of regional surveys with one-off major articles on noteworthy new ships and other important developments. Besides the latest warship projects, it also looks at wider issues of importance to navies, such as aviation and electronics, and calls on expertise from around the globe to give a balanced picture of what is going on and to interpret its significance. Special features for this year include a survey of current and future torpedo developments, an in-depth study of the Royal New Zealand Navy, a look at how the Royal Navy is coping after the Strategic Defense and Security Review, plus analyses of significant new warship classes: the Japanese Hyuga class DHH concept, the USNS Spearhead Joint High-Speed Vessels, Danish Iver Huitfeldt class frigates, and German AIP technology as demonstrated in the recent Type 212A submarines. For anyone with an interest in contemporary naval affairs, whether an enthusiast or a defence professional, this annual has become required reading.

Maritime Strategy and Global Order Daniel Moran, James Avery Russell, 2016-05-15 An international roster of top scholars explores the role of naval power and maritime trade in creating the modern international system. This book is both a history of maritime strategy, sea power, and seaborne commerce from the nineteenth century to the present day and an examination of current strategic issues. --Sten Rynning, Professor of Political Science, Head, Center for War Studies, University of Southern Denmark Washington Book Review

**Undersea Warfare in Northern Europe** Kathleen H. Hicks, Andrew Metrick, Lisa Sawyer Samp, Kathleen Weinberger, 2016-08-02 The CSIS International Security Program analyzes Russian undersea intentions and capabilities in the near to mid-term and the ability of NATO and partner nations to respond effectively.

**Navies in the 21st Century** Conrad Waters, 2016-09-30 "A range of naval experts . . . build[s] a diverse and deeply-thought out picture of where maritime warfare is now and where it is likely to go."—Army Rumour Service What is the purpose of navies in the modern world, and what types of warship does this require? This book tackles these questions by looking at naval developments, both technological and operational, in the quarter century since the end of the Cold War. It provides the overall political and economic context, assesses significant naval operations from the first Gulf War to Russia's annexation of Crimea, reviews changes in the objectives and composition of the principal fleets, describes major design developments amongst the main warship types, and examines wider technological and operational developments, including naval aviation, shipbuilding and manning. "A high quality publication with a great many superb photographs. For those wishing to keep fully informed on world naval affairs, it is excellent value and strongly recommended."—Scuttlebutt "This new book follows the successful approach and format of the very popular naval annual Seaforth's World Naval Review. Under the same editor, a new team of specialists have been assembled to write authoritative articles in their particular fields of expertise. The absorbing text is fully supported by many outstanding images—Most Recommended."—Firetrench "Provides a most useful contextual analysis of the post-Cold War period, explaining how technological developments and a range of world events have variously shaped the fleets of today."—Warship

NATO Missile Defense and the European Phased Adaptive Approach Steven J. Whitmore, John R. Deni, 2013 In 2010, NATO decided to expand its ballistic missile defense program, in part because of the American offer to include its European Phased Adaptive Approach (EPAA) as the centerpiece of an expanded effort. For the Allies' part, few have actually contributed tangible ballistic missile defense assets, in terms of missile interceptors, radars or other sensors, or ballistic missile defense-related platforms. This is likely to have significant implications for the U.S. Army, which has an important but largely underappreciated role in NATO missile defense today. In particular, the Army is likely to face increased manpower demands, materiel requirements, and training needs in order to meet the demand signal created by the NATO ballistic missile defense program. Additionally, Army units involved directly in or in support of ballistic missile defense are likely to face a higher OPTEMPO than currently projected. Ultimately, this will exacerbate the perceived imbalance in transatlantic burden-sharing, particularly if the EPAA provides little, if any, benefit to the defense of U.S. territory, given Washington's decision to cancel Phase 4 of that framework.
