*The Arkansas Delta* Williard B. Gatewood Jr.,Jeannie M. Whayne,1996-12-01 Winner of the 1994 Virginia C. Ledbetter Prize, this collection of wide-ranging essays is the first collaborative work to focus exclusively on the living and historical contradictions of the Arkansas portion of the Mississippi River delta. Individual chapters deal with the French and Spanish colonial experience; the impact of the Civil War, the roles of African Americans, women, and various ethnic groups; and the changes that have occurred in towns, in social life, and in agriculture. What emerges is a rich tapestry—a land of black and white, of wealth and poverty, of progress and stasis, of despair and hope—through which all that is dear and terrible about this often overlooked region of the South is revealed.

Space and Environment in the Industrialising Mekong Delta Siwei Tan,2016 Industrial zones were only introduced to Vietnam in the 1990s, but even the agrarian Mekong Delta boasts of about 100 zones. What is their environmental impact? While missing capacity, financing, and regulation is the

common diagnosis, this book reintroduces the structural features of the Vietnamese state and its economy into its analysis of wastewater management in the industrial zones. It reveals the socio-spatial effects of the Vietnamese state administration system and the State's utilisation of law and its ambiguities to express and facilitate multiple dimensions of socio-spatiality. Siwei Tan (LLB, MSc) holds a PhD in Geography. She is an assistant lecturer for environmental governance at the Department of Geography in University of Bonn. *Comparing Futures for the Sacramento, San Joaquin Delta* Jay Lund, Ellen Hanak, William Fleenor, Willaim Bennett, Richard Howitt, 2010-02-02 An ecosystem in freefall, a shrinking water supply for cities and agriculture, an antiquated network of failure-prone levees—this is the Sacramento-San Joaquin Delta, the major hub of California's water system. Written by a team of independent water experts, this analysis of the latest data evaluates proposed solutions to the Delta's myriad problems. Through in-depth economic and ecological analysis, the authors find that the current policy of channeling water exports through the Delta is not sustainable for any interest. Employing a peripheral canal-conveying water around the Delta instead of through it—as part of a larger habitat and water management plan appears to be the best strategy to maintain both a high-quality water supply and at the same time improve conditions for native fish and wildlife. This important assessment includes integrated analysis of long term ecosystem and water management options and demonstrates how issues such as climate change and sustainability will shape the future. Published in cooperation with the Public Policy Institute of California
