Strengthening Forensic Science in the United States National Research Council,Division on Engineering and Physical Sciences,Committee on Applied and Theoretical Statistics,Policy and Global Affairs,Committee on Science, Technology, and Law,Committee on Identifying the Needs of the Forensic Sciences Community,2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The Origin of Consciousness in the Breakdown of the Bicameral Mind Julian Jaynes,2000-08-15 National Book Award Finalist: "This man's ideas may be the most influential, not to say controversial, of the second half of the twentieth century."—Columbus Dispatch At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. "Don't be put off by the academic title of Julian Jaynes's The Origin of Consciousness in the Breakdown of the Bicameral Mind. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor."—The New York Times "When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis."—John Updike, The New Yorker "He is as startling as Freud was in The Interpretation of Dreams, and Jaynes is equally as adept at forcing a new view of known human behavior."—American Journal of Psychiatry

House of Leaves Mark Z. Danielewski, 2000-03-07 "A novelistic mosaic that simultaneously reads like a thriller and like a strange, dreamlike excursion into the subconscious." –The New York Times Years ago, when House of Leaves was first being passed around, it was nothing more than a badly bundled heap of paper, parts of which would occasionally surface on the Internet. No one could have anticipated the small but devoted following this terrifying story would soon command. Starting with an odd assortment of marginalized youth -- musicians, tattoo artists, programmers, strippers, environmentalists, and adrenaline junkies -- the book eventually made its way into the hands of older generations, who not only found themselves in those strangely arranged pages but also discovered a way back into the lives of their estranged children. Now this astonishing novel is made available in book form, complete with the original colored words, vertical footnotes, and second and third appendices. The story remains unchanged, focusing on a young family that moves into a small home on Ash Tree Lane where they discover something is terribly wrong: their house is bigger on the inside than it is on the outside. Of course, neither Pulitzer Prize-winning photojournalist Will Navidson nor his companion Karen Green was prepared to face the consequences of that impossibility, until the day their two little children wandered off and their voices eerily began to return another story -- of creature darkness, of an ever-growing abyss behind a closet door, and of that unholy growl which soon enough would tear through their walls and consume all their dreams.

Signs and Symbols Adrian Frutiger, 1998 Discusses the elements of a sign, and looks at pictograms, alphabets, calligraphy, monograms, text type, numerical signs, symbols, and trademarks.

Incredible Temples and Sanatan Sanskriti Hari Prakash Gupta, 2023-05-06 In this book, "The Incredible Temple and Sanatan Sanskriti" author has endeavored to focus on the hindu temples of Karnataka, Tamil Nādu, Kerala & Odisha. They are amongst the most ancient, architectural, archeological and heritage temples. These are eminently known for huge statutes, Mandapas, Towering super structures, Gopuram etc. They all glorify Hindu Culture and scriptures viz. Puranas, Itihas, Vedas etc. The stories given there are vividly captured on more than life size carvings made from sandstone, soapstone, granite etc. One is awe struck how our ancestors created such masterpieces, with now considered, primitive tools and implements. This book is a tribute to our great forefathers who through their skills, dedication and pains taking labor over the centuries created such poetry in stone.

The Language of the Moon - for Beginners Harry Eilenstein, 2021-07-06 In magic a special language is spoken - not the spells, not the old languages that nobody uses for thousands of years, not the language of grimoires ... but the language of images. This language is direct and sincere and true - it is what it is, it tells how it is, it shows the innermost essence of what is signified ... the words of this language are a reflection of what they point to. The language of magic needs the connection to what it wants, it must be accurate, without inner contradiction ... otherwise this language has no magical effect. The language of magic works in the subconsciousness - and the subconsciousness is not judgmental, it is not moral, it hides nothing, it sees everything ... and that is where magic works. The words of magic direct the life-force - and what is the life-force but the substance of the subconsciousness? ... therefore the language of the magicians must be a True Language. The language of magic in astrology is the Moon: the inner images, the dreams, the dream journeys, the visions, the symbols, the omens, the fairy tales, the myths ... the language of magic is the Language of the Moon

Magic for Beginners I Harry Eilenstein, 2021-06-30 This Volume contains the books: - Telepathy for Beginners - Telepathy for Advanced Learners - Telekinesis for Beginners - Auto-Movement for Beginners - Astrology for Beginners - The Language of the Moon - for Beginners - Feng Shui for Beginners - Kundalini for Beginners

Demonic Grounds Katherine McKittrick, 2006 In a long overdue contribution to geography and social theory, Katherine McKittrick offers a new and powerful interpretation of black women's geographic thought. In Canada, the Caribbean, and the United States, black women inhabit diasporic locations marked by the legacy of violence and slavery. Analyzing diverse literatures and material geographies, McKittrick reveals how human geographies are a result of racialized connections, and how spaces that are fraught with limitation are underacknowledged but meaningful sites of political opposition. *Demonic Grounds* moves between past and present, archives and fiction, theory and everyday, to focus on places negotiated by black women during and after the transatlantic slave trade. Specifically, the author addresses the geographic implications of slave auction blocks, Harriet Jacobs's attic, black Canada and New France, as well as the conceptual spaces of feminism and Sylvia Wynter's philosophies.

Central to McKittrick’s argument are the ways in which black women are not passive recipients of their surroundings and how a sense of place relates to the struggle against domination. Ultimately, McKittrick argues, these complex black geographies are alterable and may provide the opportunity for social and cultural change. Katherine McKittrick is assistant professor of women’s studies at Queen’s University.
