Code Name Lise George James, 2021-03-28 In Code Name Lise, we deal with the idea of sinking warships with shore-bound artillery. It can be done and was done before, but you need the ships to be near, at a dangerously close range. They must be ambushed unexpectedly and destroyed, or you will be in deep trouble, as they call in heavy airstrikes or use their long-range weapons to maximum effect. The major problem you may face in this scenario is the air threat. All modern warships are armed with helicopters and South African warships at times have the Denel Rooivalk attack helicopter on them. This helicopter is deadly and feared for good reason. It is rated by many to be better than the more famous US Apache Longbow. The question I wanted to be answered in this book was to see if a Rooivalk attack beast can be shot down, and if so, how. They are protectively armoured against 23mm shells, they are faster than an Apache and their pilots are aggressive fellows. You will normally not get close enough to shoot a Rooivalk down, she can see in the darkness and she has deadly missiles outranging any MANPAD or anti-aircraft gun. Her ECM and E-ECM systems are world-class. Thus, you must surprise her and get close enough to down her in the first few shots or you are dead when she counter-attacks. However, there is a way, a maskirovka. Description: After sinking a South African Navy frigate in an epic gun battle in the Mozambican Channel, former Police Special Forces Company Commander, Geoffrey Foxtrot, now Egg Breaker Ground Commander, is heading down south with his fellow Egg Breakers intending to ambush a squadron of naval fast attack craft that is coming north to investigate the sinking of the frigate. To get them close enough and inside gun range, he abandons the Q-ship, the EBS Orlando, on a deserted beach, a maskirovka designed to bring the fast attack craft towards the ambush site. For political reasons, he must cross the border into South Africa and spring a naval ambush from northern Zululand and thus taking the chance of meeting with superior South African ground forces, a fight he cannot possibly win. To make matters worse, a South African Denel Rooivalk is escorting the naval vessels and constitutes a major threat, she must be shot down quickly or she will destroy him and his men. With his wife, the former South African Secret Service Counter-Terrorism Head until she defected in Code Name VF0565, a pregnant Angelique Dawson-Foxtrot injured and dying from wounds received during an ambush in Code Name Phoenix, he needs to dig deep to accomplish his mission. The ambush takes place and the Egg Breakers try to escape with the Q-ship, but they are found by South African Air Force Gripen fighter jets and sunk. As the men swim for their lives, they are strafed mercilessly. Things are looking grim for all our heroes, Foxtrot, Geelslang and the pregnant Angelique. If you wish to read about Covert and Special Forces Operations in sub-Saharan Africa, the GMJ Books are the place to start. You will learn about covert operations, Special Forces techniques and military history not known outside the select few. Code Name Lise is the 4th book in the popular GMJ Series.

Code Name Lise George M. James, 2014-12-01 Major Foxtrot, a former South African Special Forces operator takes his men into South Africa to ambush a squadron of fast attack craft who came to investigate the sinking of the frigate (Code Name Phoenix). From there they try to escape with the Q-ship Orlando but are intercepted by South African Air Force Gripen fighter jets. This book follows closely on GMJ Book Three, Code Name Phoenix. Backpack Helicopter Fouad Sabry, 2022-10-25 What Is Backpack Helicopter A backpack helicopter is a motor, rotor, and controls assembly for a helicopter that can be attached to a person's back. This allows the person to walk about on the ground while wearing the backpack helicopter, and then use the backpack helicopter to fly. A harness similar to one used for a parachute is used, and there should also be a strap running between the legs. In certain designs, the amount of upward force may be increased by using a ducted fan design. There have been a number of attempts made to create backpack helicopters, with varying degrees of success. How You Will Benefit (I) Insights, and validations about the following topics: Chapter 1: Backpack helicopter Chapter 2: VTOL Chapter 3: Jet pack Chapter 4: List of rotorcraft Chapter 5: Hiller YH-32 Hornet Chapter 6: Helicopter flight controls Chapter 7: SoloTrek XfV Chapter 8: Helicopter rotor Chapter 9: Tip jet Chapter 10: Quadcopter Chapter 11: Gyrodyne Chapter 12: Steam rocket Chapter 13: Rotorcraft Chapter 14: Helicopter Chapter 15: Yves Rossy Chapter 16: Aerospace General Mini-Copter Chapter 17: Gyrodyne RON Rotorcycle Chapter 18: Martin Jetpack Chapter 19: Solution F/Chretien Helicopter Chapter 20: Hoppi-Copter Chapter 21: Nagler-Rolz NR 54 (II) Answering the public top questions about backpack helicopter. Who This Book Is For Professionals, undergraduate and graduate students, enthusiasts, hobbyists, and those who want to go beyond basic knowledge or information for any kind of backpack helicopter.

Limitless: The Autobiography Tim Peake, 2020-10-15 THE PERFECT SUMMER READ - From the #1 bestselling author of Hello, is this Planet Earth? and Ask an Astronaut As heard on BBC Radio 4 Desert Island Discs _____ 'What surprised me was how entirely serene I felt. I was weightless, no forces exerting themselves on my body. To my left was the Space Station. Below me, gradually going into shadow, was the Earth. And over my right shoulder was the universe.' In fascinating and personal detail, and drawing on exclusive diaries and audio recordings from his mission, astronaut Tim Peake takes readers closer than ever before to experience what life in space is really like: the sights, the smells, the fear, the sacrifice, the exhilaration and the deep and abiding wonder of the view. Warm, inspiring and often funny, Tim also charts his surprising road to becoming an astronaut, from a shy and unassuming boy from Chichester who had a passion for flight, to a young British Army officer, Apache helicopter pilot, flight instructor and test pilot who served around the world. Tim's extensive eighteen-year career in the Army included the command of a platoon of soldiers in Northern Ireland during the Troubles, deployment in Bosnia, and operations in Afghanistan. Full of life lessons for readers of all ages, Limitless is the story of how ordinary can become extraordinary. _____ 'For someone who has literally been out of this world Tim's an incredibly down to earth guy and I think you'll be amazed at some of the things he has done ... it's so inspiring to know that even going into space didn't change him as much as being a parent did.' JOE WICKS 'Tim is one of our nation's good guys - and his story is a testament to his courage, kindness and a never-give-up spirit.' BEAR GRYLLS 'Full of courage, camaraderie and daring escapades, this reads like a Boys' Own adventure' MIRROR 'A fantastic book' PIERS MORGAN 'Fasten your seatbelt for an exhilarating read ... His accounts of blasting

into orbit at 25 times the speed of sound and floating, weightless, around the space station are enthralling.' EXPRESS Bestseller in the UK, Sunday Times, October 2020

Allies in Air Power Steven Paget, 2021-01-04 In the past century, multinational military operations have become the norm; but while contributions from different nations provide many benefits—from expanded capability to political credibility—they also present a number of challenges. Issues such as command and control, communications, equipment standardization, intelligence, logistics, planning, tactics, and training all require consideration. Cultural factors present challenges as well, particularly when language barriers are involved. In *Allies in Air Power*, experts from around the world survey these operations from the birth of aviation to the present day. Chapters cover conflicts including World War I, multiple theaters of World War II, the Korean War, the Vietnam War, the Gulf War, Kosovo, the Iraq War, and various United Nations peacekeeping missions. Contributors also analyze the role of organizations such as the UN, NATO, and so-called coalitions of the willing in laying the groundwork for multinational air operations. While multinational military action has become commonplace, there have been few detailed studies of air power cooperation over a prolonged period or across multiple conflicts. The case studies in this volume not only assess the effectiveness of multinational operations over time, but also provide vital insights into how they may be improved in the future.

Know Your Helicopters Thomas Hargreave, 2017-01-20 *Know Your Helicopters* is a pocket-sized book detailing 44 types of helicopters most commonly seen in service today from the smallest Robinson to the biggest Mil, including Bells, Boeings, Sikorskys and many more. A photograph of each machine is included. Tom Hargreave served 18 years in the British Army as an Army Air Corps pilot. In this time he accumulated 2,500 hours of flight time across a variety of helicopter types including the Gazelle, Lynx, Agusta 109 and the Apache.

The Political Economy of Aerospace Industries Keith Hartley, 2014-11-28 Keith Hartley uses examples from most of the world's significant aerospace industries, especially across the USA, UK and Europe. The emphasis on political economy reflects the continuing influence of government on the fortunes of the industry. He prese

The Use of Force in UN Peacekeeping Peter Nadin, 2018-02-06 This edited volume provides a detailed and nuanced analysis of UN peacekeeping and the use of force, to inform a better understanding of the complex and interconnected issues at stake for the UN community. Peacekeeping is traditionally viewed as a largely passive military activity, governed by the principles of impartiality, consent, and the minimum use of force. Today, most large UN Peacekeeping Operations are only authorized to use force in defence of their mandates and to protect civilians under imminent threat of physical violence. Recently, with the deployment of the Force Intervention Brigade in the DRC, the UN has gone beyond peacekeeping and into the realm of peace-enforcement. These developments have brought to the fore questions regarding the use of force in the context of peacekeeping. The key questions addressed in this book examine not only the utility of force, but also the dilemmas and constraints inherent to the purposive use of force at a strategic, operational and tactical level. Should UN peacekeepers exercise military initiative? Is UN peacekeeping capable of undertaking offensive military operations? If so, then under what circumstances should peacekeepers use force? How should force be wielded? And against whom? With chapters written by experts in the field, this comprehensive volume will be of great use and interest to postgraduate students, academics and experts in international security, the UN, peacekeeping and diplomacy.

Eye on the Money Terry Crawford-Browne, 2011-05-27 The clerk of the court called all rise as judge Blignaut swept in dressed in his black gown. He sat down, and moments later we rose again as he swept out, having pronounced the verdict. 'The clerk handed [my lawyer] a copy of the judgment. I received my own copy by e-mail that afternoon. [My lawyer] commented that it was being awarded against me in an issue brought in the public interest.' The issue was the South African arms deal scandal. The costs were almost a million rand. The plaintiff was Terry Crawford-Browne. As the scandal around the arms deal gathered force during the late 1990s, Crawford-Browne launched a campaign against an armaments acquisition programme that has locked South Africa into twenty years of debt repayment. With no discernible foreign enemy, he asked, why did we need such sophisticated weaponry: The answer was simple: in any arms deal the commissions are huge. With considerable courage, the man who acted for Archbishop Desmond Tutu during the banking sanctions campaign of the 1980s has taken on the post-apartheid government for its betrayal of the struggle against apartheid. In a poignant, telling account he describes the ANC's slide from moral high ground of the sanctions campaign to the corrupted lowlands where weapons of war are traded.

Treasonous David Hickson, 2021-03-06 The new president is hiding a dark secret. The journalist who discovered that secret is dead. Now there is only one man who can do anything about it ... Ben Gabriel's life is falling apart. He has been discharged from the British Special Forces... fired from a job in military intelligence... his girlfriend has disappeared... and now he might be the only person who can stop the country from falling into the hands of a corrupt killer. That country is South Africa, where Gabriel is struggling to build a new life. It is a country clogged with corruption and abuse of power. Here it takes someone willing to step outside the law to discover the truth... And Gabriel is that someone. Because the path he treads is more than a little crooked. *Treasonous* is the pulse-pounding first tale in the Gabriel thriller series. If you like complex heroes, hair-raising action, and gut-wrenching consequences, then you'll love David Hickson's electrifying story.

Iran's Nuclear Option Al J. Venter, 2005-01-19 "The most systematic exposition to date about Iran's nuclear program and its role in world affairs" (Middle East Quarterly). Since the Islamic Republic of Iran admitted that it was secretly producing highly enriched, weapons-grade uranium, nations have struggled to react appropriately. For the first time, and in full detail, this book explains exactly what the Europeans and United Nations have been trying to forestall. Iran could shortly have the ability to strike its immediate Middle Eastern neighbors—and more distant nations—with nuclear weapons. With the size to dominate its region, Iran also has an avowed mission to export its theocratic principles, and in recent decades, has been a notorious supporter of terrorist organizations. Its parallel development of atomic bombs represents the greatest threat to the balance of world power we've seen in the new millennium. Here, defense expert Al Venter reveals the extent to which Iran's weapons program has developed and the clandestine manner in which its nuclear technology has been acquired. He demonstrates how Tehran has violated the Nuclear Non-Proliferation Treaty and details the

involvement of several countries shown by the IAEA to have trafficked in illegal nuclear materials. He proves, for the first time, a direct link between the now-defunct South African apartheid regime's nuclear program and Tehran's current nuclear ambitions. Venter digs deep into subjects such as Iran's fervor on behalf of Shiite Islam, its missile program—developed alongside its nuclear one—and the role of the Pasdaran, the Revolutionary Guards, whose tentacles have spread throughout the Middle East and increasingly farther afield. While noting Tehran's support of terrorist groups such as Hezbollah, Venter follows closely how the Persian homeland itself has progressed toward a strategic nuclear capability that would make recent terrorist attacks look obsolete. Iran's Nuclear Option is essential reading for anyone with an interest in global security, the perilous volatility of the Middle East, and America's options, should it be willing and able to counter the threat while time remains.
