The Derelict William Hope Hodgson,2020-12-08 The Derelict is a short story by William Hope Hodgson, first published in 1912. An elderly ship's doctor recounts a strange event that happened to him some years earlier, in the context of discussing his ideas about a fundamental life force that can manifest itself in the presence of proper materials. While sailing as a passenger, a sudden storm disables the ship. In the aftermath, a derelict vessel is discovered. Excerpt: 'Seen anything of Carnacki lately?' I asked Arkright when we met in the City. 'No,' he replied. 'He's probably off on one of his jaunts. We'll be having a card one of these days inviting us to No. 472, Cheyne Walk, and then we'll hear all about it. Queer chap that.'

Derelict Robert L. Hovorka, Jr.,1988 Five survivors of the ill-fated spaceliner Goddess, led by Ensign Pamela Dubois, discover a derelict ship controlled by a predatory cybernetic entity--and in their fear Dubois's companions decide to sacrifice her to the alien

Recycling Derelict Land George Fleming,1991 This book provides practising engineers with a firm basis on which to classify types of derelict land and alert them to the range of environmental and legal considerations involved.The book examines the hazards involved in land recycling, from geotechnical and hydro-geological, to chemical and biological. The need for an integrated approach to site investigation is emphasized, showing the interaction between physical, chemical and biological aspects of a particular site. Data from case studies are used to illustrate analysis and interpretation procedures.

Contaminated and Derelict Land R. W. Sarsby,1998 This volume is concerned with sites on, or below, which there has been previous industrial activity leading to some permanent effects on the ground. A wide range of problems and impacts makes treatment of contaminated and derelict land a very complex issue. This volume presents the proceedings of Green 2, the second in a four-yearly series of international symposia that discuss aspects of geotechnical engineering intimately related to the environment.

The Derelict Neil Williams,2021-04-22 The Derelict is really a story of two derelicts - the events on the first and their part in the creation of the second. With this story I've pretty much nailed my colours to the mast, so to speak. As the tale is intended as a tribute to stories by the likes of William Hope Hodgson or H P Lovecraft (with a passing nod to Coleridge's Ancient Mariner), where some terrible event is related in an unearthed journal or (as is the case here) by a narrator driven to near madness. The primary influence on the story was the voyage of the Demeter, from Bram Stoker's Dracula, one of the more compelling episodes of that novel. Here the crew are irrevocably doomed from the moment they set sail. There is never any hope of escape or salvation once the nature of their cargo becomes apparent. This was to be my jumping off point with The Derelict. Though I have charted a very different course from the one taken by Stoker, I have tried to remain resolutely true to the spirit of that genre of fiction and the time in which it was set. -Neil Williams

Derelict Alan E. Nourse,2016-03-03 What was the mystery of this great ship from the dark, deep reaches of space? For, within its death-filled chambers was the avenue of life! Will the crew bring the ship home, or perhaps use it to free mankind?

Derelict LJ Cohen,2014-05-29 When Rosalen Maldonado tinkers with the derelict freighter, she's just hoping to prove she deserves a scholarship to University. She certainly doesn't count on waking the ship's damaged AI or having three stowaways, Micah Rotherwood and brothers Jem and Barre Durbin, along for the ride. They all have their private reasons for hiding aboard and lives they are seeking to escape, but if the accidental crew can't work together and learn to trust each other, they'll die together, victims of a computer that doesn't realize the war ended decades before any of them were even born. Read the story that began the five book Halcyone Space series, at a special price of \$0.99

Jacobsen,Jana Paniccia,Alex Bledsoe,Chaz Brenchley,R.Z. Held,Julie E. Czerneda,2021-07-15 A ship lost with all hands on icy Titan. A dying woman's soul linked with the fate of an interstellar vessel. A wrecked ferry possessed by the ruin-demon who grounded her. A haunted space cruiser of legend again terrorizing those who travel among the stars. A pirate-ravaged frigate concealing magical secrets that can doom the wicked, or redeem the worthy. An inexplicably empty cruiser arriving at a space station amid the panic of a system-wide pandemic. There is an allure to the ghost ship, the once-proud voyaging craft now abandoned to the void of space or the depths of the sea. In Derelict, speculative fiction authors Kristine Smith, D.B. Jackson, Griffin Ayaz Tyree, Andrija Popovic, Sharon Lee & Steve Miller, Gerald Brandt, Kit Harding, Gini Koch, Jacey Bedford, Mark D. Jacobsen, Jana Paniccia, Alex Bledsoe, Chaz Brenchley, R.Z. Derelict Linda Mooney,2024-04-12 Running from an attack by the Alliance and looking for cover, a derelict ship unexpectedly comes into view. JeVit of the Pure takes the opportunity to hide behind it, not expecting to find an open bay door inviting them in. Too late she realizes she should have rejected that invitation. Centurion Zeke Rossi and his team are in pursuit of an enemy ship when it just...disappears. Spotting an alien vessel they don't recognize, the Terrans temporarily give up the chase to investigate, and Zeke is tapped to board the ship first to look around. Immediately, his gut tells him something is wrong. It's not until he enters the spacecraft that his feeling is validated, but he has no idea the worst is yet to come. The ship seems to be truly deserted, but the two couldn't be more wrong. When their paths cross, JeVit realizes that although Zeke is injured, their best chance of surviving is to call a truce and join forces. However, trust between enemies proves difficult. When escape becomes possible, JeVit chooses the path most likely to save Zeke's life, and hopefully not end hers on sight. But when Zeke awakens, his memories are nothing but flashes, other than the gray-eyed, blue-headed beauty he keeps envisioning. What happened to him? What happened to her? And how does she fit into the puzzle of his piecemeal memory? Raised to be sworn enemies, the two can't resist the pull to be together, despite what it means for their future. They're willing to risk it all, but can they convince the Terrans and the Hafu to unite against a common enemy?

The Derelict Anthony L. Williams,2000-12-01 The Derelict is a space saga centering on a stellar skirmish and a meeting with an unseen menace known to be heading for the Milky Way Galaxy. United States Naval Battle Group One intercepts this strange contact miles beyond the galaxy and finds an immense, creeping derelict spaceship billions of years old. It is not until they board this dangerous, burned-out hulk that they discover they are trapped there by murderous diabolical forces.

The Black Derelict Fred Files,2020-01-14 After the events of the Serpent Fleet, Captain Stand and the crew of the Trawler have taken a nice little vacation, but it isn't long before Paul lines up another assignment. While unusual for a salvage crew, they agree to locate and rescue a lost colony ship. It isn't long before that assignment leads them into something far more dangerous. It could be the salvage find of a lifetime, or it could be an alien deathtrap ready to ensnare all of humanity. In addition to the salvage work, an investigation is underway into one of the Trawlers crewmembers in association with a war crime that nearly escaped detection.

Cosmic Derelict Neil R. Jones,2011-06-10 Professor Jameson and his immortal band of robot-bodied Zoromes find a derelict space-ship-and in it the

deadliest, mind-destroying danger of their careers!ExcerptWith a metal tentacle, Professor Jameson pointed to the world in the rear of their passage. At a distance astern of less than twenty thousand miles, the planet still loomed large and commanding, occupying a large section of the star-sprinkled sky within its halo of atmosphere.It seems strange, 6W-438, that we found no intelligent life on that world.There are still three inner planets to explore. We may yet find an intelligent species in this system.Life, even of low intelligence, is the exception rather than the rule, 744U-21 reminded them. We have found life on but seven worlds in the last twenty-eight planetary systems we have visited, and all but one of these worlds were divided up among two systems. We did gather interesting scientific data, however, in a good many cases.This system shows signs of being peculiarly well adapted for life forms, the professor pointed out. We may strike something of interest among the inner worlds.First, we must explore this lone satellite of the fourth world. It is strange that there is but one moon among all five worlds. Possibly, on closer approach to the inner world, we shall see smaller ones we missed through distant observation.The satellite in question grew on their vision as the mother world behind gradually dwindled. 20R-654 piloted the space ship in a broad, sweeping curve around the little moon. As detectors and diviners of all kinds were trained upon the little moon, Professor Jameson, by the side of 744U-21, who was estimating the satellite's diameter and density, saw that their earlier approximation of seventeen hundred miles diameter was only slightly in excess of the exact.There is a strong concentration of metal at one spot we passed, 65G-849 announced.Return that way and we shall seek it out, 744U-21 relayed to 20R-654 at the controls. Cruise closer to the surface.Close to the surface, in their parlance, meant at an initial safe distance of several miles above any possible spires of rock or mountainous terrain rising up suddenly from beyond the moon's close horizon. They dropped gradually nearer the rough, airless expanse of desolate surface and slowed their speed as 65G-849 reported stronger emanations. At one point, he re ported the metallic concentration to be highly localized. Then the ship passed beyond it, for the emanations diminished in strength quite rapidly. 65G-849 made a confusing report, however, as they returned to the point of highest recording. The radiations were weaker.We have strayed off the line to one side or the other.No, we were above the same topographical features both times.Check your instruments again and give specific directions to 20R-654.This was done, and a startling discovery was made.We are not over this metal concentration! We are under it!Surprise and interest was immediately manifested by all thirty-eight machine men.A sub-satellite!The mysterious object was quickly found. It was small, they noticed, as the ship maneuvered to sunward.Another space ship-smaller than ours!

Derelict Days . . . Irv Thomas,2010-08-31 Gathered here under one cover are the previously scattered tales of my hitch-hiking life. As the sub-title implies, however, they are more than mere travel tales; for the common, unremarkable act of hitch-hiking cloaks a quite remarkable instrument of personal growth and guidance. This is so because it is uniquely capable of removing the hitch-hiker from the realm of the planned and predictable. Life happens, then, on a course of events over which we have only the barest remnant of control (accepting or rejecting an offered ride). In this rarefied state of being, amazing things become visible for the perceptive observer. Without the protective shield of control, one begins to see elements of real life most often otherwise hidden by the myopia of pursuing a goal under one’s own drive and handling – the normal circumstance of daily life. The ‘real life’ I invariably discover, when hitch-hiking, has been filled with instances of providence and synchronicity. So much so, that it has implanted in me a deeper, richer understanding of how life really works – if we let it. These tales are packed with such instances, making this book both a pleasure and an enlightenment to read.
