The Immortal Beaver Sean Rossiter,2009-07-01 Developed soon after World War II, the de Havilland Beaver has become one of the most successful and long-lived designs in aviation history. The Beaver was conceived as a “half-ton flying pickup truck” capable of setting down on land, water, and snow. Since its conception the Beaver has been adopted worldwide, becoming the floatplane of choice for island-hopping along the Pacific Northwest, flying into the Arctic, transporting missionaries and doctors into remote spots in Africa, and serving as a support aircraft in Antarctic expeditions. The Beaver also became “the generals’ Jeep” during the Korean War – and the generals’ favorite transport to fishing spots in peacetime.

Bush Planes and Bush Pilots Dan McCaffery,2003-06 In February 1932 legendary bush pilot Wilfrid May used his Bellanca Pacemaker to hunt down the notorious killer Albert Johnson, the Mad Trapper of Rat River. Russ Baker used his Junkers W34 to pluck 24 men from a Yukon mountainside after three bombers crashed in appalling weather in 1942. Jack Hunter tracked rumrunners off the New Brunswick coast in his Fairchild. Bush Planes and Bush Pilots is the story of sixteen extraordinary aircraft found in the collections of Canada's aviation museums. It is a celebration of some of the greatest moments in Canadian history, when daring young pilots defied incredible odds to open up some of the nation's remotest regions to the outside world. Author Dan McCaffery highlights a diverse spectrum of planes from the pioneer era to the modern day; each plane is profiled individually, accompanied by historical and contemporary visuals and colour artwork. Bush Planes and Bush Pilots is an attractive book that will appeal to all who are interested in aviation history and the story of Canada's development as a nation.

Biennial Report of the Board of Control and Officers of the Michigan State Prison for the Two Years Ending Michigan State Prison,1916

Air Traffic Control, Order 7110.65R CHG 3, June 11, 2007 ,2007

Encyclopedia of African Airlines Ben R. Guttery,1998-01-01 The rainy season, terrain, and financial hardships

have made the construction of highways and railroads nearly impossible in many parts of Africa. This lack of modern infrastructure has been overcome in some part by the development of air transportation. Hundreds of carriers--both small and large, government owned and private--have connected all parts of the continent. Together, they have had a tremendous impact on the African economy and the people. Country-by-country, this comprehensive reference work provides brief histories of over 700 airlines in 54 African nations. Each entry has the years of operation of the carrier, along with information on its origin, growth, and route structure. Aircraft usage, including registration numbers and nicknames, is covered in many cases. Any crashes involving aircraft in the carrier's fleet are also noted. An appendix gives the location of all major African airports.
