Her whole life is a struggle. Her health, her school, her social life, and even her relationship with her mother are all a mess. The world itself is a mess. With lethal acid rain and stifling, ever-present fog, nothing thrives in her home city, and it's even worse outside—or so she's been taught. Her best friend, David, also has a hard life, but he has hope. He's convinced that there's something better hidden beyond the fence surrounding their city and has always suggested escaping together. Olivia has never taken it seriously. But after a failed suicide attempt, her stay in the mental ward leads to a series of suspicious encounters with her mother and a fight at school. Feeling like there is nothing left to lose, she decides to give David's idea a shot. Despite their poor health and reports of killer beasts, Olivia and David brave the wilderness. The truth they discover there—not just about their society but about themselves—is more astonishing than anything they ever imagined. The Remnant Now that Olivia and David have discovered that their life in the city was a lie, their pursuit of the truth gives them a newfound purpose. Is there more to their Rare abilities than what they've discovered so far? Is there something about them that the government is trying to keep hidden? Taken captive and tortured by her oppressors, Olivia narrowly escapes with help from an unexpected source. She rejoins what's left of her new friends, only to find their home destroyed and coalition forces closing in to finish them off. Running for their lives, they set out on a desperate quest to find the Haven, a mysterious city that is rumored to be harboring and protecting Rares. This journey will take them deep into the wilderness and bring them to the edges of another coalition stronghold before they find their way. But the danger in front of them is rivaled only by the danger closing in behind them, and Olivia's new abilities will be put to the test. As they discover more secrets, the ones they bring with them may be the most important of all. The Return The moment Olivia's family is finally together in Uncle Eli's camp, violence comes between them when Matthias shoots her mother, who has proven untrustworthy too many times. But not all is lost because of her mother—with the help of Uncle Eli, they find out the rumors they have been chasing are true. The Haven is real. Freedom is in sight. At least, it will be once David and Olivia cross the DMZ. But that's easier said than done: assuming they don't freeze or starve in the bleak of winter, they must survive an irradiated no-man's-land reclaimed by the wilderness. With Eli's suspicious camp, the Coalition on their trail, and in-fighting among their own group, they're running out of time and options to find a way across. What happens when Olivia and David are forced to make painful choices between ideals and safety?

**Skeletons in the Closet** Tobin T. Buhk, 2010-06-03 A mother calls 911 because her child, despite a fetal monitor, stopped breathing. She didn't know it, but the fetal monitor her doctor prescribed had a memory chip. Would the monitor's memory chip preserve evidence of a tragic accident or a murder? A young couple's marriage is crumbling, but they decide to take one last family trip. She will never return home. A pool of blood suggests she died from injuries caused by an accidental fall from a boat dock. So how did she wind up face down in the lake? For more than two decades, Dr. Stephen D. Cohle has been solving vexing forensic mysteries as the medical examiner for Kent County, Michigan. As a whole, the cases he considers represent a cross-section of crime in mid-America, often committed by a macabre cast of characters: Jekyll and Hyde alcoholics who turned homicidal; killers who resorted to the most bizarre methods in concealing their crimes; and the rarest species in the zoo of criminology, a two-woman team of serial killers. Based on his work with Dr. Cohle, true-crime writer Tobin T. Buhk recounts twenty-one riveting, real-life stories, each with a unique forensic twist. Offering a glimpse into the strange sights, sounds, and smells of the county morgue, these tales of intrigue, deception, and murder will fascinate true-crime buffs, fans of CSI, and readers of mystery and detective stories. Tobin T. Buhk (Grand Rapids, MI) is a freelance writer and the coauthor (with Stephen D. Cohle, MD) of *Cause of Death*. In preparation for writing this book, he observed and assisted Dr. Cohle and his forensic team in more than thirty-five autopsies. Stephen D. Cohle, MD (Grand Rapids, MI), a nationally recognized figure in the community of forensic medicine, is the chief medical examiner for Kent County, Michigan, and a forensic pathologist for Laboratory Pathologists, PC. He is the author (with Tobin T. Buhk) of *Cause of Death* and (with R. Byard) of *Sudden Death in Infancy, Childhood, and Adolescence*.

**Into Me I See** Diane L Spencer, 2017-01-23 I had a dream that was not like any I had experienced before. Reaching the center of the stage, I stated that when we used our five senses to engage with our world, we only experienced a small fraction of the frequencies that actually existed. I continued in this vein, explaining that the limited capacity of our five senses was congruent with our limited conscious connection to life when relying only on our five senses. Our world, and everything in it that appears solid, was actually approximately 4 percent matter spinning so quickly it created the illusion of a solid mechanistic world. Our world was 96 percent dark matter and dark energy, named so because it was totally unobservable except for its gravitational effect. Upon waking, I went in search of what information I could find. To my amazement, there was quite a bit of information about a study of science called quantum physics, and many experiments had confirmed that there was a maximum of approximately 4 percent material or matter in our universe and 96 percent dark matter and energy. The math had added up for decades. That fact, if nothing else, could be relied upon. My mind was racing for two main reasons. Firstly, I had a grade 10 education and no conscious knowledge of quantum physics. Where was this information coming from? Secondly, the information itself was unbelievable. Fast-forward to approximately twenty-three years, I was still waiting for the science world to reconcile what they call the macro/micro or the equation of everything before quantum theory could be accepted as a law. In the meantime, studies proving the connection and consciousness of life continued without moving us into a new paradigm congruent to these connections and the cohesiveness of quantum physics, which continued to reveal. The time is now, so let's begin together.

**Eugenics at the Edges of Empire** Diane B. Paul, John Stenhouse, Hamish G. Spencer, 2017-11-16 This volume explores the history of eugenics in four Dominions of the British Empire: New Zealand, Australia, Canada, and South Africa. These self-governing colonies reshaped ideas absorbed from the metropole in accord with local conditions and ideals. Compared to Britain (and the US, Germany, and Scandinavia), their orientation was generally less hereditarian and more populist and agrarian. It also reflected the view that these young and enterprising societies could potentially show Britain the way — if they were protected from internal and external threat. This volume contributes to the increasingly comparative and international literature on the history of eugenics and to several ongoing historiographic debates, especially around issues of race. As white-settler societies, questions related to racial mixing and purity were inescapable, and a notable contribution of this volume is its attention to Indigenous populations, both as targets and on occasion agents of eugenic ideology.
