**Aging, Technology and Health** Richard Pak,Anne Collins- Mclaughlin,2018-03-15 Aging, Health and Technology takes a problem-centered approach to examine how older adults use technology for health. It examines the many ways in which technology is being used by older adults, focusing on challenges, solutions and perspectives of the older user. Using aging-health technology as a lens, the book examines issues of technology adoption, basic human factors, cognitive aging, mental health, aging and usability, privacy, trust and automation. Each chapter takes a case study approach to summarize lessons learned from unique examples that can be applied to similar projects, while also providing general information about older adults and technology. Discusses human factors design challenges specific to older adults Covers the wide range of health-related uses for technology—from fitness to leading a more engaged life Utilizes a case study approach for practical application Envisions what the future will hold for technology and older adults Employs a roster of interdisciplinary contributors

**Machine Shop Training Course** Franklin D. Jones,1964 Packed with facts and rules that students can put to use in the shop and toolroom, they include everything from underlying principles, to standards, to calculations for every specific task in shop training. Together, they provide an outstanding treatise on machine shop practice. No classroom or workshop where apprentices are being trained can afford to be without these valuable combination text and reference guides. Covers fundamental principles; methods of adjusting and using different types of machine tools - with typical examples of: work-measuring instruments and gauges cutting screw threads by different processes thread grinding gear cutting precision toolmaking methods typical shop problems with solutions miscellaneous facts relating to the art of machine construction and much, much more

**The Mechanic's Guide** William V. Shelton,2023-12-13 Reprint of the original, first published in 1875. The publishing house Anatiposi publishes historical books as reprints. Due to their age, these books may have missing pages or inferior quality. Our aim is to preserve these books and make them available to the public so that they do not get lost.

*Supply and Demand Management in Ride-Sourcing Markets* Jintao Ke,Hai Yang,Hai Wang,Yafeng Yin,2023-04-30 Supply and Demand Management in Ride-Sourcing Markets offers a fundamental modeling framework for characterizing ride-sourcing markets by spelling out the complex relationships among key endogenous and exogenous variables in the markets. This book establishes several economic models that can approximate matching frictions between drivers and passengers, describes the equilibrium state of ride-sourcing markets, and more. Based on these models, the book develops an optimum strategy (in terms of trip fare, wage and/or matching) that

maximizes platform profit. While the best social optimum solution (for maximizing the social welfare) is generally unsustainable, this book provides options governments can use to encourage second-best solutions. In addition, the book's authors establish models to analyze ride-pooling services, with traffic congestion externalities incorporated into models to see how both new platforms and government designs can optimize operating strategies in response to the level of traffic congestion. Serves as a foundation for subsequent research studies that investigate ride-sourcing services through mathematical modeling Offers valuable managerial insights for ride-sourcing platforms and helps them develop more efficient and effective operating strategies Assists the governments or social planners in designing appropriate regulatory schemes to achieve more sustainable and societally beneficial market outcomes
