**SU-76 Assault Gun** Steven J. Zaloga,2019-05-30 The SU-76 assault gun was the second most widely manufactured Soviet armoured fighting vehicle of World War II, outnumbered only by the legendary T-34. Inspired in part by the German Marder series of tank destroyers, Soviet designers realized that the chassis of the obsolete T-70 light tank could be adapted to a much more substantial gun if it was placed in a fixed casemate rather than in a turret. This led to the design of the SU-76, which saw its combat debut at Kursk in the summer of 1943. The SU-76 was deployed primarily as an infantry direct support weapon, becoming the infantry tank of the Red Infantry, much as the StuG III became the infantry tank of the German infantry. Featuring full colour artwork and written by an expert on tank warfare during World War II, this fascinating study describes one of the Soviet Union's most important armoured vehicles during its struggle with Nazi Germany.

**US Field Artillery of World War II** Steven J. Zaloga,2011-04-01 Determined to learn from the lessons of World War I, the US Army developed a new generation of field artillery weapons and tactics during the 1930s. Consequently, in World War II it was the clear leader in field artillery. Providing a thorough examination of the many critical innovations and doctrines, and the impact they had on performance, including the motorization of artillery, Fire Direction Centers, aerial observation, and radio communications. Exploring, in their entirety, the weapons that formed the backbone of the US artillery arsenal in World War II, this book reveals a wealth of detail not readily available elsewhere.

**Allied Artillery of World War Two** Ian V. Hogg,1998 This comprehensive volume describes the weapons of the Allied forces that were in use from 1939-45. Each of these weapons is described in detail with specifications and a fascinating array of rare photographs and drawings. This well-researched work provides in-depth coverage of all types of artillery used by the Allies, including: coastal and railway artillery, anti-tank, anti-aircraft, field, medium and heavy artillery.

**German Field Artillery of World War II** Steven J. Zaloga,2023-12-21 An illustrated study of the big guns of Hitler's army – the Wehrmacht's field artillery, its capabilities and its role in German fighting units of World War II. Often overshadowed in military history by the tanks and aircraft of Blitzkrieg, Germany's artillery was key to its methods of waging war throughout World War II. Field artillery remained the primary killer on the battlefield, often responsible for three-quarters of combat casualties inflicted. Redressing the balance, this book surveys the major Wehrmacht guns of the war, and the basic organizational structure of the German field artillery. Its primary focus is on the divisional field guns, especially the LfH 18 10.5cm field howitzer and the 15cm sFH 18 field howitzer that formed the backbone of German artillery. A brief survey is also made of the infantry guns used at the regimental level, and of corps-level heavy artillery. The issue of the use of Beutewaffen,” captured war-booty field guns, is also looked at, as is the Nebelwerfer and schwere Wurfgerät rocket artillery. With archive photos and meticulously detailed new illustrations, this book provides a concise study of the German Army's big guns of World War II, how they were organized and how they were used, both on the Eastern and Western fronts.

**The French 75** Steven J. Zaloga,2020-10-29 The 'Soixantequinze', France's legendary 75mm Modele 1897, was the first modern field gun, pioneering several critical innovations in field artillery designs, including a fast action breech and a soft recoil system. Although some of these features had been incorporated into earlier guns, the 75mm M1897 integrated them into a superior, lightweight field gun. The 75mm M1897 earned its reputation in the Great War, forming the backbone of French field artillery. It was widely distributed to Allied armies, including the American Expeditionary Forces and was also widely exported after World War I around the globe. It was manufactured under licence in numerous countries, including the United States, which used the gun in its initial Pacific campaigns. Due to its modernity and sound design, the 75mm remained in service well into World War II. It was used by the French, Polish and other armies in the Blitzkrieg campaigns of 1939–1940 and thousands were captured by the German Army in 1940 and used for coastal defence. Surprisingly, many were also converted into a very effective anti-tank gun, the PaK 97/38. These weapons lingered in service after World War II, though by this time, they were largely obsolete. This fascinating book explores the history of the 75mm Modele 1897 in detail, from its design and development to its deployment around the world. The text is supported by stunning, specially commissioned artwork including three-dimensional views of the gun and its variants.

**M10 Tank Destroyer vs StuG III Assault Gun** Steven J. Zaloga,2013-08-20 The Allies' M10 Tank Destroyer and the Germans' Sturmgeschütz (StuG) lll were the unsung workhorses of the northwest European battlefields of 1944–45. While their mission was not principally fighting one another, their widespread use ensured their frequent encounters, from the Normandy Bocage, to the rubble-strewn streets of Aachen. The StuG lll was the quintessential assault gun, a low-slung, heavily armoured, turret-less vehicle intended to provide direct fire support for infantry formations, whilst the M10 3in Gun Motor Carriage was originally developed as a tank destroyer. However, by 1944 the 3in gun proved ineffectual against the most thickly armored German tanks, and was consequently relegated to infantry support too. Widely deployed in roles their designers had not envisaged, these two armoured fighting vehicles clashed repeatedly during the 11-month campaign, which saw the Allies advance from Normandy to the heart of the Reich. Fully illustrated with specially commissioned artwork, this is the story of their confrontation at the height of World War ll.
