Dry Docking and Shipboard Maintenance David House,2015-08-27 This book covers every aspect of the dry docking of sea going vessels. It provides a guide to industry for the different dock types and docking procedures inclusive of material management, steelwork operations and dry dock legislation. Many thousands of people worldwide are engaged within the perimeter of the docking and shipboard maintenance industries to ensure that our ships remain in Class and are kept seaworthy. Docking a vessel successfully involves many skills and trades, requiring a teamwork operation between ships crews and the shoreside docking personnel. This book describes dock types alongside the various methods of docking, stability concerns, repair activities, steelwork management, legislation and survey detail, as well as shipyard safety requirements. Includes a new chapter on steelwork and material management of the shipyard complex. Contains over a hundred photographs and illustrations, including a full colour plate section. Full coverage of dry dock operations, handling facilities, main ship building slips and shipyard repair activities.

Boat Docking Charles T. Low,1997 Docking and undocking a small craft in close quarters takes years of practice. There are a number of factors to consider when maneuvering a boat into a small docking area such as the effects of current, wind and propeller action. You may never reach boat docking and undocking perfection (very few do) but this book will steer you into the right direction. For example Chapter Two is about Docking Examples and in Chapter Six the author writes about the Human Factors and the part they play when boating. Boat Docking covers a number of situations boaters encounter when docking or undocking - and everyone can learn from this book.

Automated Rendezvous and Docking of Spacecraft Wigbert Fehse,2003-11-13 The definitive reference for space engineers on rendezvous and docking/berthing (RVD/B) related issues, this book answers key questions such as: How does the docking vehicle accurately approach the target spacecraft? What technology is needed aboard the spacecraft to perform automatic rendezvous and docking, and what systems are required by ground control to supervise this process? How can the proper functioning of all rendezvous-related equipment, systems and operations be verified before launch? The book provides an overview of the major issues governing approach and mating strategies, and system concepts for rendezvous and docking/berthing. These issues are described and explained such that aerospace engineers, students and even newcomers to the field can acquire a basic understanding of RVD/B. The author would like to extend his thanks to Dr Shufan Wu, GNC specialist and translator of the book's Chinese edition, for his help in the compilation of these important errata.

7 Steps to Successful Boat Docking Katherine Giampietro Redmond,2006-01 Forget the why's of boat docking; this book is filled with the how to's that will lead you to dock your boat successfully, even in wind and/or current. It presents the local knowledge of the authors in an easily understood, and simply implemented, 7-step process. For helmsmen/women with single-engine inboard vessels, power or sail; twin-engine inboard and outboard vessels; single-engine outboard or inboard/outboard or stern-drive vessels.

Dead Man Docking Mary Daheim,2009-10-13 B&B hostess Judith McMonigle Flynn and her closer-than-a-sibling cousin Renie would be crazy to turn down a free, 1930s-themed South Pacific islands cruise aboard the magnificent San Rafael, the pride of the Cruz Cruises fleet. Unfortunately, the fabulous pre-launch party is as far out to sea as the passengers are likely to get, after the body of their VIP host, Magglio Cruz, is discovered stuffed in the piano and the cruise is cancelled. Suddenly

free to gad about San Francisco with their marooned shipmates -- at least one of whom is possibly homicidal -- the cousins decide to join glamorous, martini-quaffing Rick and Rhoda St. George and their wheezy white pooch, Asthma, for a bit of amateur sleuthing. But the route to Magglio's murderer may not be such smooth sailing. And if Judith, Renie, and the St. Georges aren't careful, they may all end up leaving their hearts in San Francisco . . . and the rest of their mortal remains as well!

Molecular Docking Dimitrios Vlachakis,2018-07-11 Molecular docking has always been and will be on the forefront of developments in the eminent field of drug design and medicinal chemistry. At the early days, drug discovery was based on blackboard drawings and expert intuition. However, as times move on, the amount of available information and overall knowledge base that needs to be analyzed cannot be processed manually. This, coupled by the rapid growth in computational infrastructure and processing power, has allowed for the efficient use of molecular docking tools and algorithms to be considered in the greater field of drug discovery. In the postgenomic era, molecular docking has become the key player for the screening of hundreds of thousands of compounds against a repertoire of pharmacological targets.

Applied Case Studies and Solutions in Molecular Docking-Based Drug Design Dastmalchi, Siavoush,2016-05-11 As the pharmaceutical industry continues to advance, new techniques in drug design are emerging. In order to deliver optimum care to patients, the development of innovative pharmacological techniques has become a widely studied topic. *Applied Case Studies and Solutions in Molecular Docking-Based Drug Design* is a pivotal reference source for the latest scholarly research on the progress of pharmaceutical design and computational approaches in the field of molecular docking. Highlighting innovative research perspectives and real-world applications, this book is ideally designed for professionals, researchers, practitioners, and medical chemists actively involved in computational chemistry and pharmaceutical sciences.

Molecular Docking and Molecular Dynamics Amalia Stefaniu,2019-12-18 This book clearly

explains the principles of in silico tools of molecular docking and molecular dynamics. It provides examples of algorithms and procedures proposed by different software programs for visualizing and identifying potential interactions in complexes of biochemical interest. The book is structured in six chapters, each of which discusses different molecular simulation methodologies and provides concrete examples of complexes interactions. In each chapter authors give an overview of the treated subject, a description of the methodologies used, and a discussion of the results. The authors describe computational ways to achieve a rational design of bioactive compounds with various therapeutic applications, including antitumoral agents, antitubercular drugs, nonsteroidal anti-inflammatory drugs, and radiopharmaceuticals.

Guidance, Navigation, and Control for Spacecraft Rendezvous and Docking: Theory and Methods Yongchun Xie, Changqing Chen, Tao Liu, Min Wang, 2021-02-16 This book focuses on the theory and design methods for guidance, navigation, and control (GNC) in the context of spacecraft rendezvous and docking (RVD). The position and attitude dynamics and kinematics equations for RVD are presented systematically in accordance with several different coordinate systems, including elliptical orbital frame, and recommendations are supplied on which of these equations to use in different phases of RVD. The book subsequently explains the basic principles and relative navigation algorithms of RVD sensors such as GNSS, radar, and camera-type RVD sensors. It also provides guidance algorithms and schemes for different phases of RVD, including the latest research advances in rapid RVD. In turn, the book presents a detailed introduction to intelligent adaptive control and proposes corresponding theoretical approaches to thruster configuration and control allocation for RVD. Emphasis is placed on the design method of active and passive trajectory protection in different phases of RVD, and on the safety design of the RVD mission as a whole. For purposes of verification, the Shenzhou spacecraft's in-orbit flight mission is introduced as well. All issues addressed are described and explained from basic principles to detailed engineering methods and examples, providing aerospace engineers and students both a basic understanding of, and numerous practical engineering methods for, GNC system design in RVD.

Castrating and Docking Lambs George Harold Bedell, 1920 The largest part of the returns from farm flocks is derived from the sale of lambs. In order that this source of income may be as large as possible, it is necessary to have lambs in the best possible marketable condition. Ram lambs and undocked lambs are discriminated against on the market because they are less well developed and lack a uniform and attractive appearance. It is impossible to obtain as large gains or as good condition on lambs that have not been castrated. This bulletin discusses how these operations may be done safely and effectively on the farm, --Page [2].
