Flight of the Dodo Peter Brown, 2009-10-31 When Penguin gets pooped on by a flying goose, he doesn't just get angry--he decides to do something about it. Penguin and his flightless friends set out to build a flying machine that will give them the bird's eye view they've never had in this picture book. Illustrations.

The Dodo Errol Fuller, 2003 The story of the dodo is a classic of evolution and extinction equal in fascination to that of the dinosaur or the saber-toothed tiger. Unlike these, however, the dodo was the first recorded example of an extinction that was, in all probability, entirely caused by humans. Humankind coexisted with the dodo between 1598 and 1681 and then the dodo was gone, hunted to extinction, unable to escape the new predators that arrived in ships on the isolated island later known as Mauritius. The giant pigeon, for this was what the dodo was, evolved from ancestors that had populated the island millions of years before in the Pleistocene period, when Mauritius was far adrift of where it lies today. The pigeons colonized an island paradise abundant with food, free of any terrestrial mammalian predators. Over millions of years they lost their instinct for danger. They also lost the ability to fly, and grew bulky with sturdy running legs. For the 17th-century sailors who arrived and settled on the island, they were easy to kill and as tasty as the turtles the sailors also caught and ate. The sailors introduced domestic animals and rat as well, competitors for the dodos' habitat. So much about the dodo is unknown and will never be known, and yet, the dodo engenders much speculation. *The Dodo: Extinction in Paradise* explores the science and the mythology, the history, archaeology, and legend, as well as the dodo's place in art and literature.

The Rise and Fall of D.O.D.O. Neal Stephenson, Nicole Galland, 2017-06-13 A New York Times Bestseller From bestselling author Neal Stephenson and critically acclaimed historical and contemporary commercial novelist Nicole Galland comes a captivating and complex near-future thriller combining history, science, magic, mystery, intrigue, and adventure that questions the very foundations of the modern world. When Melisande Stokes, an expert in linguistics and languages, accidentally meets military intelligence operator Tristan Lyons in a hallway at Harvard University, it is the beginning of a chain of events that will alter their lives and human history itself. The young man from a shadowy government entity approaches Mel, a low-level faculty member, with an incredible offer. The only condition: she must sign a nondisclosure agreement in return for the rather large sum of money. Tristan needs Mel to translate some very old documents, which, if authentic, are earth-shattering. They prove that magic actually existed and was practiced for centuries. But the arrival of the scientific revolution and the Age of Enlightenment weakened its power and endangered its practitioners. Magic stopped working altogether in 1851, at the time of the Great Exhibition at London's Crystal Palace--the world's fair celebrating the rise of industrial technology and commerce. Something about the modern world jams the frequencies used by magic, and it's up to Tristan to find out why. And so the Department of Diachronic Operations--D.O.D.O.--gets cracking on its real mission: to develop a device that can bring magic back, and send Diachronic Operatives back in time to keep it alive . . . and meddle with a little history at the same time. But while Tristan and his expanding operation master the science and build the technology, they overlook the mercurial--and treacherous--nature of the human heart. Written with the genius, complexity, and innovation that characterize all of Neal Stephenson's work and steeped with the down-to-earth warmth and humor of Nicole Galland's storytelling style, this exciting and vividly realized work of science fiction will make you believe in the impossible, and take you to places--and times--beyond imagining.

The Dodo Charles River Editors, 2020-01-26 *Includes pictures *Includes excerpts of contemporary accounts about the dodo *Includes a bibliography for further reading The Dodo never had a chance. He seems to have been invented for the sole purpose of becoming extinct and that was all he was good for. - Willy Cuppy, 19th century American humorist and literary critic At one point or another, just about everyone has heard of the dodo bird, which is almost universally described as a cuddly, whimsical creature renowned for its alleged stupidity. This prehistoric avian had been known for hundreds of years before it was made popular around the world in Lewis Carroll's 1865 classic, *Alice's Adventures in Wonderland*. The character, the Dodo, satirized the author himself - according to pop culture lore, Carroll, whose real name was Charles Lutwidge Dodgson, regarded the dodo as his spirit animal due to his alleged stutter, which led to him often presenting himself as Do-do-dodgson. Carroll was also a frequent patron of the Oxford Museum of Natural History, which served as a fount of inspiration for his memorable anthropomorphic characters. The 1951 Disney animation, *Alice in Wonderland*, breathed new life into Carroll's Dodo, portrayed as a plump, peach-faced creature with a bulbous pink beak, clad in a purple waistcoat, a powdered wig, and a pipe dangling out of his beak. Like its real-life counterparts, the Dodo was depicted as a flightless bird who crossed paths with Alice, bobbing along inside of a bottle upon the open sea. Owing to its inability to fly, the Dodo uses an upside-down toucan as his boat, and the Dodo is being maneuvered by a green hawk furiously flapping its wings, serving as the boat's propeller. The dimwitted, carefree dodo also made various appearances in film and TV shows over the years, such as Yoyo Dodo in the 1938 black-and-white animation *Porky in Wackyland*, the short-lived stop-motion animated series *Rocky and the Dodos*, and the 2002 animated film *Ice Age*, which depicts the dodos as a silly, clumsy troop of birds who fail to guard three small watermelons. Indeed, the dodo's presence in literature, picture books, music, video games, and general pop culture has been so prevalent that it has secured its own entry on TV Tropes, where it is infamously immortalized as the Dumb Dodo. This only scratches the surface of the string of misconceptions that has plagued the delightfully peculiar bird for centuries. Along with its stereotypical depictions in literature, film, and other mediums of pop culture, a number of idioms playing on the bird's alleged idiocy, as well as the supposed role it played in its own extinction, have become irreversibly

cemented in the English lexicon. Dodo and the even less tactful dumb dodo are slang terms directed at dense individuals, an explicit reference to the bird's sluggish reflexes and supposedly pint-sized brain. One may have also come across a business venture or a fad that has gone the way of the dodo or is as dead as a dodo, meaning that the venture has become defunct, obsolete, or a thing of the past, most likely due to reckless and half-baked business practices. The phrase deaf to reality like a dodo has also been thrown around quite frequently in recent years, used to describe individuals who are overly trusting and blissfully ignorant of unpalatable facts and ugly truths. But were the dodo birds truly as simple-minded as they are often portrayed? And what were the actual factors behind the zany avian's extinction? The Dodo: The History and Legacy of the Extinct Flightless Bird looks at the origins of the bird, human contact with it, and how the species went extinct. Along with pictures depicting important people, places, and events, you will learn about the dodo like never before.

I Am Dodo Kae Nishimura, 2005 When a professor who believes that the dodo is not yet extinct finally finds one in New York City, he does everything he can think of to capture the bird until he learns why Dodo should be free.

The Dodo and Its Kindred Hugh Edwin Strickland, Alexander Gordon Melville, 1848 This volume by Strickland, an English ornithologist, and Mitchell, a physician, reconstructs the habits of the extinct dodo and related birds.. Since physical remains were so few, they also relied on contemporary paintings by artists such as Roelandt Savery, many of which are reproduced in this book.

Cosmo remembers a time when dodos lived happily on Earth. But with humans came their guns, and soon the only dodos left were Cosmo and two friends. Then comes the terrible day when Cosmo finds himself all alone, the last of the dodos. If he is to survive, he must leave the planet he loves. He is lucky to make a trusty friend in the form of an almost-human space robot, and, together, they set out across the universe to find other dodos. But soon they realize that many creatures, and even the planet Earth, need protection and care. The survival of all living things depends on it. The Dodo William Reynolds Sanford, Carl Green, 1989 Discusses the flightless bird that lived on the island of Mauritius and why it became extinct in the 1600s. Also describes the efforts of conservationists to protect endangered birds.

The Song of the Dodo David Quammen, 1997-04-14 “Compulsively readable—a masterpiece, maybe the masterpiece of science journalism.” —Bill McKibben, Audubon A brilliant, stirring work, breathtaking in its scope and far-reaching in its message, The Song of the Dodo is a crucial book in precarious times. Through personal observation, scientific theory, and history, David Quammen examines the mysteries of evolution and extinction and radically alters our understanding of the natural world and our place within it. In this landmark of science writing, we learn how the isolation of islands makes them natural laboratories of evolutionary extravagance, as seen in the dragons of Komodo, the elephant birds of Madagascar, the giant tortoises of the Galapagos. But the dark message of island studies is that isolated ecosystems, whether natural or human-made, are also hotbeds of extinction. And as the world's landscapes, from Tasmania to the Amazon to Yellowstone, are carved into pieces by human activity, the implications of this knowledge are more urgent than ever. An unforgettable scientific adventure, a fascinating account of an eight-year journey of discovery, and a wake-up call for our time, David Quammen's The Song of the Dodo is an exquisitely written book that takes the reader on a globe-circling tour of wild places and extraordinary ideas.

Yes, the same flightless bird that was hunted to oblivion in Mauritius more than 300 years ago! This dodo has become the single most priceless creature on the planet and it must be rescued immediately. Without delay, Animal Intelligence Agency agents are assigned to this urgent mission. NOTE: The Animal Intelligence Agency is a multi-species nongovernmental agency. Specially trained Animal and Human agents work undercover to save animals and save the world. Some of them have a licence to kill. Agent no. 002 Species: Panthera tigris tigris Name: Bagcha Currently the only agent with a licence to kill. He is the most dangerous and experienced operative, with the scars to prove it.
