Hasan Celâl Güzel, Cem Oğuz, Osman Karatay

The Power of Dogu Simon Kaner, 2009 Born from the earliest dated tradition of pottery manufacture in the world, dogū abstract clay figurines with recognisably human features are a link back to the lost worlds of the remarkable Jomon period (c. 10,000-500 BC). They have been excavated in large quantities from sites throughout the country. Many were deliberately broken before burial which has raised intriguing questions about their possible uses. This catalogue will illustrate 70 dogū, the most important of which have been designated as either National Treasures or Important Cultural Properties. In addition to the descriptions of the pieces themselves, the book will include chapters written by experts in the field exploring the wider East Asian setting and the significance of this context in understanding Japanese prehistory.

Ahmet Doğu İpek: A Halo of Blackness Upon Our Heads Selen Ansen, Süreyya Evren, 2022-09-01 Published in the context of Ahmet Doğu İpek's solo exhibition which brings together works that the artist has created with various mediums between 2020–2022, the book titled *A Halo of Blackness Upon Our Heads* features a text written by the exhibition's curator Selen Ansen, as well as commissioned essays by Cana Bostan, Gökçen Erkılıç and Nevzat Sayın which explore İpek's works stemming from natural phenomena through the lens of reflections proposed by the exhibition. Designed by Ali Emre Doğramacı, the publication also includes reproduction images and exhibition photographs by Hadiye Cangökçe, flufoto (Barış Aras & Elif Çakırlar) and Sena Nur Taştekin. Taking place in Arter's -1 floor between 19 May 2022 and 29 January 2023, the exhibition *A Halo of Blackness Upon Our Heads* presents a world only just born, yet already brimming with countless experiences, a multitude of narrations, innumerable revolutions both past and still to come, microscopic and grandiose transformations, quantities of small and grand destructions. Although figurative for the most part, İpek's works reflect the climate of our epoch by means of abstraction, emphasising in a covert manner the small and broad-scale events that impact our lives. In a broader sense, these works allow us to reach that which our hands or our eyes cannot grasp: skys, darkneses, subterranean forces, tectonic movements, buried memories, the infinitesimal, the immensely big, the far-off, the too near.

The Turkish War of Independence Edward J. Erickson, 2021-05-24 The dramatic story of the turbulent birth of modern Turkey, which rose out of the ashes of the Ottoman Empire to fight off Allied occupiers, Greek invaders, and internal ethnic groups to proclaim a new republic under Mustafa Kemal (Atatürk). It is exceedingly rare to run across a major historical event that has no comprehensive English-language history, but such was the case until *The Turkish War of Independence* brought together all the main strands of the story, including the chaotic ending of World War I in Asia Minor and the numerous military fronts on which the Turks defied odds, fighting off several armies to create their own state from the defeated ashes of the Ottoman Empire. This important book culminates Erickson's three-part series on the early 20th-century military history of the Ottomans and Turkey. Making wide use of specialized, hard-to-find Western and Turkish memoirs and military sources, it presents a narrative of the fighting, which eventually brought the Turkish Nationalist armies to victory. Often termed the Greco-Turkish War, an incomplete description that misses its geographic and multinational scope, this war pitted Greek, Armenian, French, British, Italian, and insurgent forces against the Nationalists; the narrative shows these conflicts to have been distinct and separate to Turkey's opponents, while the Turkish side saw them as an interconnected whole.

Geo-trekking in Ethiopia's Tropical Mountains Jan Nyssen, Miro Jacob, Amaury Frankl, 2019-07-09 This book is based on over 150 scientific papers about the Dogu'a Tembien district in Ethiopia. To reach a broader public of people interested in geosites and human-environment interactions, the authors here add a geoguide about this mountain district in Ethiopia (13°30' N, 39°10' E; up to 2850 m high) which shows a varied lithology. A large team has carried out research in that district over the past 23 years, including long stays in the areas. Numerous viewpoints and geosites are only accessible on foot; hence the authors prepared the book as a trekking guide, which will enhance sustainable tourism in the same time. This edited work summarises the study results in the international literature into a comprehensive book, which comprises 35 thematic chapters, detailed description of 573 km of trekking routes to access the landscape and the most scenic excursion points, as well as the necessary logistical information. A state-of-the-art trekking map is included as a digital annex.

Fundamentals of Chemical Reactor Engineering Timur Dogu, Gulsen Dogu, 2021-10-26 FUNDAMENTALS OF CHEMICAL REACTOR ENGINEERING A comprehensive introduction to chemical reactor engineering from an industrial perspective In *Fundamentals of Chemical Reactor Engineering: A Multi-Scale Approach*, a distinguished team of academics delivers a thorough introduction to foundational concepts in chemical reactor engineering. It offers readers the tools they need to develop a firm grasp of the kinetics and thermodynamics of reactions, hydrodynamics, transport processes, and heat and mass transfer resistances in a chemical reactor. This textbook describes the interaction of reacting molecules on the molecular scale and uses real-world examples to illustrate the principles of chemical reactor analysis and heterogeneous catalysis at every scale. It includes a strong focus on new approaches to process intensification, the modeling of multifunctional reactors, structured reactor types, and the importance of hydrodynamics and transport processes in a chemical reactor. With end-of-chapter problem sets and multiple open-ended case studies to promote critical thinking, this book also offers supplementary online materials and an included instructor's manual. Readers will also find: A thorough introduction to the rate concept and species conservation equations in reactors, including chemical and flow reactors and the stoichiometric relations between reacting species A comprehensive exploration of reversible reactions and chemical equilibrium, including the thermodynamics of chemical reactions and different forms of the equilibrium constant Practical discussions of chemical kinetics and analysis of batch reactors, including batch reactor data analysis In-depth examinations of ideal flow reactors, CSTR, and plug flow reactor models Ideal for undergraduate and graduate chemical engineering students studying chemical reactor engineering, chemical engineering kinetics, heterogeneous catalysis, and reactor design, *Fundamentals of Chemical Reactor Engineering* is also an indispensable resource for professionals and students in food, environmental, and materials engineering.

Fethullah Gulen and the Gulen Movement in 100 Questions Dogu Ergil, 2013-02-27 Understanding both Fethullah Gulen, a moderate Turkish Muslim scholar, and the Gulen Movement, a global network of volunteers, teachers, students, intellectuals and business people who are inspired by Gulen's philosophy based on dialog and peaceful coexistence, is vital to making any sort of predictions about the direction that Turkey might be headed in the

next years. Who is Fethullah Gulen? What is Gulen's worldview and what are his fundamental ideas about society and the state. How does Gulen view history and what does he consider the most important events? What are the basic principles of the Gulen movement? These questions and more are posed and answered in detail in this book.

Chemical Reactor Technology for Environmentally Safe Reactors and Products Hugo de Lasa, G. Dogammau, A. Ravella, 2012-12-06 Chemical reactor engineering, as a discipline, has a central role to play in helping with the development of adequate strategies and technologies that can deal effectively with the concerns of today's society, which are increasingly becoming attuned to the environment. The current challenge is how to adapt present processes and products to meet more rigorous environmental standards. *Chemical Reactor Technology for Environmentally Safe Reactors and Products* addresses these issues in three parts: I -- Fuels of the Future and Changing Fuel Needs; II -- Alternative Sources; III -- Emission Control, Chemical Reactor Safety and Engineering. Attention is also paid, throughout the text, to the fundamental technological aspects of reactor engineering and to possible strategies for bridging knowledge gaps.

Recent Advances in Fish Farms Faruk Aral, Zafer Dogu, 2011-11-21 The world keeps changing. There are always risks associated with change. To make careful risk assessment it is always needed to re-evaluate the information according to new findings in research. Scientific knowledge is essential in determining the strategy for fish farming. This information should be updated and brought into line with the required conditions of the farm. Therefore, books are one of the indispensable tools for following the results in research and sources to draw information from. The chapters in this book include photos and figures based on scientific literature. Each section is labeled with references for readers to understand, figures, tables and text. Another advantage of the book is the systematic writing style of each chapter. There are several existing scientific volumes that focus specially on fish farms. The book consists of twelve distinct chapters. A wide variety of scientists, researchers and other will benefit from this book.
