Applied Informatics and Communication, Part IV Jun Zhang, 2011-08-02 The five volume set CCIS 224-228 constitutes the refereed proceedings of the International conference on Applied Informatics and Communication, ICAIC 2011, held in Xi'an, China in August 2011. The 446 revised papers presented were carefully reviewed and selected from numerous submissions. The papers cover a broad range of topics in computer science and interdisciplinary applications including control, hardware and software systems, neural computing, wireless networks, information systems, and image processing.

Dictionary of Contemporary Chinese Military History Larry M. Wortzel, 1999-09-30 Tracking the evolution of the Red Army through the war against Japan and the Chinese civil war, Wortzel's book provides a comprehensive basic reference focusing on the major events, people, and issues that have produced the historical legacy of the People's Liberation Army. Placing contemporary Chinese military history in the context of China's 19th century clashes with the West and Japan, Wortzel illustrates how the imposition of unequal treaties by foreign powers conditioned China's 20th century defense forces and actions and explains how the Communist military forces developed. It also shows how fractionalization in the Communist military leadership led to the Cultural Revolution and Mao Zedong's purges. Drawing on a substantial number of sources available only in Chinese as well as on English-language secondary sources, the book provides a basic reference aimed at orienting the nonspecialist to the significant events and people in China's recent military history. The book will also provide a quick reference for the specialist in Chinese history.

The International Missile Bazaar William C Potter, Harlan W Jencks, 2019-09-06 International experts examine transactions, capabilities, structures and norms influencing the complex network of trade in missile technologies.

China's New Foreign Policy Tilman Pradt, 2016-11-17 This book analyses how China overcame its meagre reputation in the early 1990s to become an aggressively growing military power and rising threat to the international system. The author focuses on China's new multilateral foreign policy approach, ambitious military build-up programme and economic cooperation initiatives. This book presents a much-needed comparative perspective of China in terms of foreign policy, seeking to develop analytical tools to assess China's motivations and moves. The author suggests that understanding China's new foreign policy, its tactics in multilateral organisations, and approaches to conflict resolutions are elementary to grasp the new realities of international relations, particularly relevant to newly established institutions in the evolving Asian political system which require basic knowledge for analysing the politics in this continent. This book uses an innovative approach, a qualitative analysis of China's foreign policy addressing criteria of reputation management, to overcome the perceived 'China threat'.

Sino - Pak Nexus and Implications for India M D Upadhyay, 2015-11-01 Pakistan has a long and strong relationship with China. The long-standing ties between the two countries have been mutually beneficial. Since the 1962 Sino-Indian War, Pakistan has supported China on most issues of importance to the latter, especially those related to the question of China's sovereignty. Looking into the future, China's expanding influence in Central Asia and its interest in overland access to the Arabian Sea could motivate even stronger links with Pakistan. The nexus is a live threat for India having military and non-military manifestations. These are irreversible strategic realities which India cannot ignore. Hence India's foreign policy formulations and initiatives must factor in these threats and determine the course and direction of its foreign policy and response to threats emanating from the nexus. This book helps in understanding these threats and provides options for India to counter the China-Pakistan Nexus without hurting the growing Indo China economic relations.

Historical Dictionary of Science and Technology in Modern China Lawrence R. Sullivan, Nancy Y. Liu, 2015-03-19 The historical dictionary provides information on science and technology in China from the late nineteenth century to the present including: a chronology; introduction; extensive bibliography; over 700 cross-referenced dictionary entries on major scientific and technological fields and sub-fields; entries on western scholars and educators.

21st Century Chinese Cyberwarfare William Hagestad II,2012-03-05 21st Century Chinese Cyberwarfare draws from a combination of business, cultural, historical and linguistic sources, as well as the author's personal experience, to attempt to explain China to the uninitiated. The objective of the book is to present the salient information regarding the use of cyber warfare doctrine by the People's Republic of China to promote its own interests and enforce its political, military and economic will on other nation states. The threat of Chinese Cyberwarfare can no longer be ignored. It is a clear and present danger to the experienced and innocent alike and will be economically, societally and culturally changing and damaging for the nations that are targeted.

Biogeochemical Cycle of Mercury in Reservoir Systems in Wujiang River Basin, Southwest China Xinbin Feng,Bo Meng,Haiyu Yan,Xuewu Fu,Heng Yao,Lihai Shang,2017-11-09 This book presents an intensive study on the biogeochemical cycle of mercury in a river-reservoir system in Wujiang River Basin, the upper branch of the Yangtze River. Six reservoirs located in the mainstream of the Wujiang River and their corresponding inflow/outflow rivers were selected for inclusion in this study, which was conducted by researchers from the Institute of Geochemistry, Chinese Academy of Sciences. The concentration and distribution of Hg in reservoirs (the water column, sediment, sediment pore water), inflow/outflow rivers of reservoirs, and wet deposition in Wujiang River Basin were systematically investigated, and measurements were taken of the water/air exchange flux of gaseous elemental mercury (GEM). On the basis of the data gathered, a detailed mass balance of total mercury (THg) and methylmercury (MeHg) in the six reservoirs was developed. In addition, the book identifies the primary factors controlling Hg methylation in the river-reservoir system in Wujiang River Basin. The accumulation and bio-magnification of Hg species within food chains in reservoirs and human health risk of MeHg exposure through fish consumption are also included in this book.

Cyber-Conflict and Global Politics Athina Karatzogianni,2008-09-11 This volume examines theoretical and empirical issues relating to cyberconflict and its implications for global security and politics. Taking a multidimensional approach to current debates in internet politics, the book comprises essays by leading experts from across the world. The volume includes a comprehensive introduction to current debates in the field and their ramifications for global politics, and follows this with empirical case studies. These include cyberconflict, cyberwars, information warfare and hacktivism, in contexts such as Sri Lanka, Lebanon and Estonia, the European Social Forum, feminist cybercrusades and the use of the internet as a weapon by ethnoreligious and socio-political movements. The volume presents the theoretical debates and case studies of cyberconflict in a coherent, progressive and truly multidisciplinary way. The book will be of interest to students of cyberconflict, internet politics, security studies and IR in general.

High-speed Rail: An Analysis Of The Chinese Innovation System Bai Gao,Guowu Li,Zhihong Zhen,2020-12-21 High-speed railway system is interdisciplinary subject that covers infrastructure, mobile equipment, traction power supply, communication signal, operation and maintenance, and

transportation organization. The purpose of this book is to give readers a basic understanding of the technology behind of China's high-speed rail network. In this book, the author mainly focusses on the innovations of products and processes, especially product innovation, which involves the selection of technology route, technology system and technology source. Therefore, the innovation in HST here refers to the selection of technology route, technology system and technology source, as well as, the new products developed and manufactured according to the selection. With the in-depth study, the author would like to provide outlook for development in this area in the next stage.

The Chinese Army Today Dennis J. Blasko, 2013-06-17 The Chinese Army Today is a comprehensive study of the Chinese military, examining its ground forces in a level of detail not found in any other contemporary works. This new, revised edition has been fully updated to take account of recent changes in the institution. In 1999, the military modernization program of the Chinese People's Liberation Army increased in intensity and achieved a focus not seen in the previous two decades. Based primarily on actual Chinese sources, this book details these changes and puts them in the context of the many traditions that still remain. Written by a retired professional military officer who has served in China, the text uses first-hand observation of the Chinese military and three decades of military experience to weave many disparate threads from official Chinese statements, documents, and media reports into an integrated whole. The author also conducts an in-depth exploration into the many forces that constitute the People's Liberation Army. This is an essential book for all students of Chinese military and security affairs, and highly recommended for students of Chinese Politics, Asian Security, and International Relations and Strategic Studies, in general.

Tools of War Syed Ramsey, 2016-09-01 A weapon, arm, or armament is any device used with intent to inflict damage or harm to living beings, structures, or systems. Weapons are used to increase the efficacy and efficiency of activities such as crime, law enforcement, self-defense, and warfare. In a broader context, weapons may be construed to include anything used to gain a strategic, material or mental advantage over an adversary. While just about any ordinary objects such as sticks, stones, cars, or pencils can be used as weapons, many are expressly designed for the purpose – ranging from simple implements such as clubs, swords and guns, and to complicated modern intercontinental ballistic missiles, biological and cyberweapons. This book has been written keeping in view the requirements of undergraduate and postgraduate students and research scholars in the area of weapons and warfare and Military history.

Military Capacity and the Risk of War Eric H. Arnett, 1997 When does the legitimate application of military technology to the problem of national defence become needlessly provocative? Arnett addresses this question in the context of 4 particularly important Asian states

Beyond South Asia Neil Padukone, 2014-08-28 The Republic of India occupies a key geopolitical and strategic space at the center of the Indian Ocean. How it interacts with the rest of the world will have profound consequences in the 21st century. Beyond South Asia follows the evolution of India's strategic thinking since 1947, providing a comprehensive analysis of its foreign policy worldview. It begins with India's failed attempt to unite and dominate the subcontinent following independence, a strategy that resulted in conflict as its smaller neighbors invited the U.S. and China to the region, resisted intra-regional cooperation, and even violently opposed New Delhi. It then explores how this worldview has shifted as India, needing markets, energy resources, and ways to balance against China, has developed economic and military ties in Central and Southeast Asia, the Middle East, Africa, the southern Indian Ocean, and beyond. To do so has required more stability in South Asia, making India more conciliatory toward other countries of the subcontinent. This in turn leading to a lessening of tensions, enhanced cooperation, and an economic reintegration of the subcontinent, including a burgeoning détente with Pakistan. This in-depth analysis provides a comprehensive look at the domestic and regional factors that drive India, a key actor in global politics. Written in an accessible manner, it will be of use to students and specialists of Indian foreign policy, South Asian politics, international relations, and security studies and to anyone interested in the future of AfPak, the Indian Ocean region, and America's strategic pivot.

The China Reader David L. Shambaugh, 2016 Chronicles the diverse aspects of this transition

since the late-1990s. It is comprehensive in scope and draws upon both primary Chinese sources and secondary Western analyses written by the world's leading experts on contemporary China ... covers the full range of China's internal and external developments.--From publisher description.
