Epic Traditions of Africa Stephen Belcher,1999-10-22 Belcher's volume contains a much needed and extremely well-integrated overview and discussion of a vast inter-related West African culture complex that deserves and requires the kind of original, insightful treatment it receives here. —David Conrad Epic Traditions of Africa crosses boundaries of language, distance, and time to gather material from diverse African oral epic traditions. Stephen Belcher explores the rich past and poetic force of African epics and places them in historical and social, as well as artistic contexts. Colorful narratives from Central and West African traditions are illuminated along with texts that are more widely available to Western readers—the Mande Sunjata and the Bamana Segou. Belcher also takes up questions about European influences on African epic poetry and the possibility of mutual influence through out the genre. This lively and informative volume will inspire an appreciation for the distinctive qualities of this uniquely African form of verbal art.

Theories of Africans Christopher L. Miller,1990 Situating literature and anthropology in mutual interrogation, Miller's...book actually performs what so many of us only call for. Nowhere have all the crucial issues been brought together with the sort of critical sophistication it displays.—Henry Louis Gates, Jr. . . . a superb cross-disciplinary analysis.—Y. Mudimbe

China's Youth Cultures and Collective Spaces Vanessa Frangville,Gwennaël Gaffric,2019-09-10 Presenting the collaborative work of 13 international specialists of contemporary Chinese culture and society, this book explores the spaces of creation, production, and diffusion of youth cultures in China among generations born since the 1980s. Defining the concept of youth culture as practices and activities that catalyze self-expression and creativity, this book investigates the emergence of new physical spaces, including large avenues, parks, shopping malls, and recreation areas. Building on this, it also examines the influence of non-physical places, especially digital cultures, such as online social networks, shopping platforms, Cosplay, cyberliterature, and digital calligraphy and argues that these may in fact play a more significant role in Chinese civil society today. As an exploration of how youth can be creative even in a coercive environment, China's Youth Cultures and Collective Spaces will be valuable to students and scholars of Chinese society, as well those working on the links between space, youth, and culture.

Tell Me How You Really Feel Aminah Mae Safi,2019-06-11 Aminah Mae Safi's Tell Me How You Really Feel is an ode to romantic comedies, following two girls on opposite sides of the social scale as they work together to make a movie and try very hard not to fall in love. The first time Sana Khan asked out a girl—Rachel Recht--it went so badly that she never did it again. Rachel is a film buff and aspiring director, and she's seen Carrie enough times to learn you can never trust cheerleaders (and beautiful people). Rachel was furious that Sana tried to prank her by asking her on a date. But when it comes time for Rachel to cast her senior project, she realizes that there's no more perfect lead than Sana--the girl she's sneered at in the halls for the past three years. And poor Sana--she says yes. She never did really get over that first crush, even if Rachel can barely stand to be in the same room as her. Told in alternative viewpoints and set against the backdrop of Los Angeles in the springtime, when the rainy season rolls in and the Santa Ana's can still blow--these two girls are about to learn that in the city of dreams, anything is possible--even love.

Social Media and Civil Society in Japan Muneo Kaigo,2017-08-09 This book offers an overview of social media usage in Japan and describes its role in society during mid-level disruptions by natural disasters. Conceived during and after the Great East Japan Earthquake that devastated large portions of the north-eastern area of Japan, this volume addresses the links between Japanese civil society and the social media scene, using both traditional hypothesis testing, social surveys and large-scale big data analysis to provide insight into the development of an online community for connecting citizens. Considering the connection of civil society organizations, citizens and local governments through online communication, notably social media, and how to promote higher levels of citizen engagement in Japan, it

offers solutions for a more prepared, resilient communication network among citizens in case of another large scale disaster.

African Literature in French Dorothy S. Blair,1976-11-18 This 1976 book provides both a historical survey and a critical analysis of the literature in French from West and Equatorial Africa. Professor Blair begins by discussing the social, educational and political influences which led to the formation of the Negritude movement and to a flowering of French-African creative writing. This historical approach is then complemented by a study of the different literary genres. She traces the evolution of the first manifestations of literary activity in French by African writers, the written folk-tale, fable and short story, from the oral tradition of the indigenous culture, and the eventual appearance of the novel with a legendary or historical theme. The origins of French-African drama are considered for the first time, and the work of the minor poets analysed. Finally, Professor Blair attempts a definition of the French-African novel, and studies examples from three major periods from the 1930s onwards.
