The Energies of Men (Psychology Revivals) William McDougall, 2015-06-03 First published in 1932, the original blurb states: This is a simplified condensation of the author's two volumes, *An Outline of Psychology* and *An Outline of Abnormal Psychology*, which together give a comprehensive survey of the principles and findings of modern psychology. This is designed as an introduction to the scientific study of man and society for those who have not time or inclination to pursue the more recondite problems of mind. It is suitable for college use in the introductory course. It concentrates on the dynamics of the human organism and aims to give the student that minimum acquaintance with psychology without which he is not fitted to be a citizen of the modern world. Today it can be read and enjoyed in its historical context.

An Outline of Psychology William McDougall, 2007-03 This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1902 Excerpt: ...earth. r' = radius of moon, or other body. P = moon's horizontal parallax = earth's angular semidiameter as seen from the moon. f = moon's angular semidiameter. Now $\angle = P$ (in circular measure), $r' - r = r$ (in circular measure); $\therefore r : r' :: P : P'$, or (radius of earth) : (radius of moon) :: (moon's parallax) : (moon's semidiameter). Examples. 1. Taking the moon's horizontal parallax as $57'$, and its angular diameter as $32'$, find its radius in miles, assuming the earth's radius to be 4000 miles. Here moon's semidiameter = $16'$; $\therefore 4000 :: 57' : 16'$; $\therefore r = 400 \cdot 16 = 1123$ miles. 2. The sun's horizontal parallax being $88''$, and his angular diameter $32'$ find his diameter in miles. ' Am. 872,727 miles. 3. The synodic period of Venus being 584 days, find the angle gained in each minute of time on the earth

round the sun as centre. Am. 1-54 per minute. 4. Find the angular velocity with which Venus crosses the sun's disc, assuming the distances of Venus and the earth from the sun are as 7 to 10, as given by Bode's Law. Since (fig. 50) S V: VA:: 7: 3. But Srhas a relative angular velocity round the sun of 1-54 per minute (see Example 3); therefore, the relative angular velocity of A V round A is greater than this in the ratio of 7: 3, which gives an approximate result of 3-6 per minute, the true rate being about 4 per minute. Annual ParaUax. 95. We have already seen that no displacement of the observer due to a change of position on the earth's surface could apparently affect the direction of a fixed star. However, as the earth in its annual motion describes an orbit of about 92 million miles radius round the sun, the different positions in space from which an observer views the fixed stars from time to time throughout the year must be separated ...

The Group Mind William McDougall, 1920 Participation in group life degrades the individual, assimilating his mental processes to those of the crowd, whose brutality, inconstancy, and unreasoning impulsiveness have been the theme of many writers; yet only by participation in group life does man become fully man, only so does he rise above the level of the savage. The resolution of this paradox is the essential theme of this book. It examines and fully recognises the mental and moral defects of the crowd and its degrading effects upon all those who are caught up in it and carried away by the contagion of its reckless spirit. It then goes on to show how organisation of the group may, and generally does in large measure, counteract these degrading tendencies; and how the better kinds of organisation render group life the great ennobling influence by aid of which alone man rises a little above the animals and may even aspire to fellowship with the angels. Born to Run Christopher McDougall, 2010-12-09 A New York Times bestseller 'A sensation ... a rollicking tale well told' - The Times At the heart of Born to Run lies a mysterious tribe of Mexican Indians, the Tarahumara, who live quietly in canyons and are reputed to be the best distance runners in the world; in 1993, one of them, aged 57, came first in a prestigious 100-mile race wearing a toga and sandals. A small group of the world's top ultra-runners (and the awe-inspiring author) make the treacherous journey into the canyons to try to learn the tribe's secrets and then take them on over a course 50 miles long. With incredible energy and smart observation, McDougall tells this story while asking what the secrets are to being an incredible runner. Travelling to labs at Harvard, Nike, and elsewhere, he comes across an incredible cast of characters, including the woman who recently broke the world record for 100 miles and for her encore ran a 2:50 marathon in a bikini, pausing to down a beer at the 20 mile mark.

Natural Born Heroes Christopher McDougall, 2016-04-05 NATIONAL BESTSELLER • From the bestselling author of Born to Run comes a book that inspires us to unleash the extraordinary potential of the human body and climb, swim, skip, throw, and jump our way to heroic feats. Redefines the heroic ideal, establishing heroism as a skill set rather than a virtue.—NPR Books Christopher McDougall's journey begins with a story of remarkable athletic prowess: On the treacherous mountains of Crete, a motley band of World War II Resistance fighters—an artist, a shepherd, and a poet—abducted a German commander from the heart of the Axis occupation. To understand how, McDougall retraces their steps across the island that birthed Herakles and Odysseus, and discovers ancient techniques for endurance, sustenance, and natural movement that have been preserved in unique communities around the world. His search takes us scrambling over rooftops with a Parkour crew in London, foraging for greens with a ballerina in Brooklyn, tossing heavy pieces of driftwood on a Brazilian beach with the creator of MovNat—and, finally, to our own backyards. "McDougall traveled to Crete to examine the physical and mental capacity of Greek war heroes [and] studied natural movement, endurance, and nutrition to understand how regular people are capable of extraordinary athletic feats.... We can all adapt the tools of the athletes featured." —Real Simple Look for Christopher McDougall's new book, Born to Run 2, coming in December!

Problems of Personality Charles Macfie Campbell, 1925

Kierkegaard's Writings, IX, Volume 9 Søren Kierkegaard, 2009-10-11 Prefaces was the last of

four books by Søren Kierkegaard to appear within two weeks in June 1844. Three Upbuilding Discourses and Philosophical Fragments were published first, followed by The Concept of Anxiety and its companion--published on the same day--the comically ironic Prefaces. Presented as a set of prefaces without a book to follow, this work is a satire on literary life in nineteenth-century Copenhagen, a lampoon of Danish Hegelianism, and a prefiguring of Kierkegaard's final collision with Danish Christendom. Shortly after publishing Prefaces, Kierkegaard began to prepare Writing Sampler as a sequel. Writing Sampler considers the same themes taken up in Prefaces but in yet a more ironical and satirical vein. Although Writing Sampler remained unpublished during his lifetime, it is presented here as Kierkegaard originally envisioned it, in the company of Prefaces.

Saving America's Beaches Scott L Douglass, 2002-08-08 This book tells you where beach sand comes from, how waves are formed and how they break and move sand down the coast, how "works of man" have blocked this movement and caused beach erosion, and what can be done to save the beaches for future generations of Americans. A three-part prescription for healthy beaches is proposed: "backing off", "bypassing sand", and "beach nourishment". So if you love waves and beaches, and care about the future of your favorite beach spot, then read this book while you enjoy the beach. Contents: Beaches — America's Longest Playgrounds Our Jeweled Necklace of Sand — The Geology of Beaches Surf's Up! — Waves and Their Effect on Beaches "Sand Thieves" of the Beach — How We Are Destroying Our Beaches "Designer Beaches" — Beach Nourishment Engineering The Prescription for Saving America's Beaches To Learn More About Beaches The "Fine Print" — Acknowledgements, Photo Credits, References Readership: Undergraduates in marine sciences, earth sciences and civil engineering; coastal management professionals; and lay people. Keywords: Reviews: "An interesting book that provides perspective to the beach erosion problem from a coastal engineering viewpoint. Definitely worth reading" Professor Stephen P Leatherman Florida International University "Great, easy to understand and perfect for summarizing to local governing bodies and advisory committees." Ron Hovell, Coastal Projects Manager Collier County (Naples), Florida, USA "... found it to be incredibly good. I highly recommend the book to anyone who loves the beach and or will be making decisions on beach programs." Tom Campbell President of the American Coastal Coalition USA "This book of 91 pages should be required reading for the general public who visit and are interested in beaches. It is a delightfully easy read, well illustrated with color photographs of a variety of beach scenes, many of them quite beautiful and there is not a single equation in the entire book which must have been difficult for Douglass, an engineer! ... Good advice for preserving America's beaches from a knowledgeable coastal engineer who has done his homework and provided the documentation to support his prescription!" Robert G Dean Professor University of Florida, USA "Saving American's Beaches is a publication that covers the what, how and why's of the coastal experience that can be understood and enjoyed from ages 8 to 80." Gregory Woodell President American Shore and Beach Preservation Association "Saving America's Beaches fills the void for a layman's guide to processes that shape beaches, causes of beach erosion, and solutions to beach erosion problems. The book will find a ready audience among those who enjoy the most popular of American pastimes and among local, state, and federal government officials who must make decisions to protect what is a valuable esthetic, economic, and environmental resource."
