Shaping Air Transport in Asia Pacific Tae Hoon Oum, Chunyan Yu, 2019-06-04 This title was first published in 2000: A comprehensive assessment of the markets and outlook for the air transport industry in the Asia-Pacific region. The book examines options for improvement of the regulatory system and industry structure, drawing on experience within and outside of the region. It includes the short- and long-term effects of the current economic crisis on Asian airlines and air transport markets and differs from other works due to its description and analysis of all major aspects of the Asian air transport industry and airlines.

Hong Kong Takes Flight John D. Wong, 2023-11-20 Commercial aviation took shape in Hong Kong as the city developed into a powerful economy. Rather than accepting air travel as an inevitability in the era of global mobility, John Wong argues that Hong Kong's development into a regional and global

airline hub was not preordained. By underscoring the shifting process through which this hub emerged, *Hong Kong Takes Flight* aims to describe globalization and global networks in the making. Viewing the globalization of the city through the prism of its airline industry, Wong examines how policymakers and businesses asserted themselves against international partners and competitors in a bid to accrue socioeconomic benefits, negotiated their interests in Hong Kong's economic success, and articulated their expressions of modernity.

Hong Kong Management ,1996 Until recently, very few case books are written about Hong Kong business situations. Most case books have drawn their materials from North America and Europe. There are very few which reflect the local situation familiar to readers in Hong Kong. To remedy this situation, the Case Clearing House of Hong Kong has encouraged local authors to write cases based on true-to-life Hong Kong situations. Managers will find the situations presented in the book similar to those they face in their work and will be able to learn from the discussions of the cases presented. Students will find the cases a useful means of enhancing their understanding of marketing practice in Hong Kong. The book is also serviceable to marketing professionals, who, from studying the cases, will be able to improve their marketing skills.

Lockheed TriStar Graham M. Simons, 2021-11-30 “A thoughtful, well-organized overview from the beginning to the twilight days of this iconic airliner” by the highly regarded aviation historian (Large Scale Planes). In April 1972, after six grueling years of design and development, the then Lockheed California Company (now Lockheed Martin) delivered the most technologically advanced commercial jet of its era, the L-1011 TriStar, to its first client, Eastern Airlines. To mark the moment, Lockheed decided to make an impressive statement about the capabilities of its new medium-to-long-range, wide-body trijet airliner. It did so in spectacular fashion. Overseen by two test pilots, a total of 115 crew members, VIPs, Lockheed employees, and selected reporters boarded a TriStar at Lockheed’s Palmdale plant in California. The subsequent 4-hour, 13-minute flight to Washington Dulles Airport was achieved with virtually no input from the two pilots in the cockpit, the TriStar’s Automatic Flight Control System being “engaged from takeoff roll to landing.” It was, Lockheed proudly claimed, “the first cross-country flight without the need for human hands on the controls.” On the way to the L-1011’s

inaugural flight, Lockheed battled through design challenges, financial difficulties, and even international allegations of bribery, with the result that the TriStar, famed for its large, curved nose, low-set wings, and graceful swept tail, remained in production until 1984, by when 250 examples had been built. The toll on Lockheed, however, was too great and after the TriStar it withdrew from the commercial aircraft business. In this revealing insight into the L-1011, the renowned aviation historian Graham M. Simons reveals the full story of this airliner's design, development and service over the decades since 1970.

Air Cargo in Mainland China and Hong Kong Anming Zhang,George W.L. Hui,Lawrence C.

Leung,Waiman Cheung,2017-09-29 Air traffic and the aviation industry have grown rapidly on the Chinese mainland in the two and a half decades since China's open door policy. Accession to the WTO will further stimulate trade and foreign direct investment (FDI), intensifying the demand for air

cargo services. It will also open up the Chinese economy to foreign participation in the transportation and logistics sectors, making these sectors more competitive and efficient. This book provides a systematic and comprehensive study of China's air cargo industry as well as its policy evolution. It covers the sources and destinations of air cargo in mainland China and Hong Kong: whence it comes and where it goes to. The major hubs of the transportation network - Beijing, Shanghai, Hong Kong, and Guangzhou - are discussed one by one. The virtual aspects of the network at these hubs in terms of IT applications, preparedness, and needs are examined and compared. Though the subject matter of this book is air cargo, there is considerable coverage of the aviation industry and policy on the mainland and Hong Kong. Changes have been happening so fast there are few books and publications that cover them systematically and comprehensively. Readership includes business executives in airfreight companies, airports and airlines, logistics specialists, aviation university lecturers and students.

Y K Pao Anna Pao Sohmen, 2014-03-01 Sir Y. K. Pao (Pao Yue-kong, 1918–1991), rose from

modest origins to become, by late 1979, the world's largest private shipowner. His Hong Kong-based company World-Wide Shipping diversified into property, hotels, retail, media, telecommunications, airlines and banking – a hugely influential business empire at a time of rapid regional growth. A philanthropist with extensive international connections, Pao became an unofficial Chinese ambassador at large, forging a strong relationship with the architect of China's reform, Deng Xiaoping, at the dawn of China's economic transformation and during the discussions about Hong Kong's future. Anna Pao Sohmen was at her father's side during important events and key meetings with leaders around the world. In this affectionate yet unsentimental account, she recounts the pivotal role played by her father at a key historical juncture and the balance he struck between Chinese and British allegiance, between business and politics, and between capitalism and socialism. "Sir Y. K. Pao made many selfless contributions to China's modernization, in diplomacy, education, and politics....He specially emphasized the need to sustain foreign investment and prevent the outflow of capital and talent regarding the return of Hong Kong to China, in order to maintain social stability....Sir Y. K. Pao indeed played a

unique role during Hong Kong's handover to China. He helped facilitate communication between the PRC and British governments in the negotiations of Hong Kong's sovereignty by utilizing his special relationship with senior British and Chinese officials. Sir Y. K. Pao deserves to be called "the Unofficial Ambassador" between China and the United Kingdom." – Lu Ping, former Director of the Hong Kong and Macao Affairs Office of the State Council of the People's Republic of China "Only one other person outside of mainland China, Y. K. Pao, and no other political leader had bonded with Deng the way Lee (Kuan Yew) did . . . From Deng's perspective, what made Lee and Y. K. Pao attractive was their extraordinary success in dealing with practical issues, their first-hand contacts with world leaders, their knowledge of world affairs, their grasp of long-term trends, and their readiness to face facts and speak the truth as they saw it." – Ezra F. Vogel in *Deng Xiaoping and the Transformation of China*
