Powered by Honda Dave Nelson, Patricia E. Moody, Rick Mayo, 1998-04-03 BP has revolutionized the way Honda and other companies increase market share and raise performance levels, and it can be applied to virtually any type of organization - including yours. To illustrate how you can effectively integrate BP into your business structure, Powered by Honda presents a detailed blueprint of all its tools and techniques, taking you step by step through a typical 13-week BP project.

Biodiversity Bilge Sener, 2012-12-06 Proceedings of the 3rd IUPAC International Conference on Biodiversity (ICOB-3), November 3-8, 2001, Antalya, Turkey. This book discusses the value of bioresources and the need for their conservation in terms of the biomolecular chemistry of naturally occurring molecular systems. The development of pharmaceutical, agricultural and industrial products from bioresources can be used to promote incentives for conservation by providing an economic return to sustainable use of those sources. The 54 chapters inform readers on the search for insight into the species and documents how much of life remains to be scientifically identified. They also explore identification strategies and methods along with the implications for protecting biodiversity. In summary, biomolecular aspects of biodiversity and innovative utilization of bioresources are discussed from very diverse points of view ranging from their botanical, zoological, taxonomic and genomic expressions to their biomolecular, structural, mechanistic and functional aspects.

Medicinal and Aromatic Plants of Turkey Ákos Máthé, Kenan Turgut, 2023-11-01 This is meant to be the 10th volume of the series Medicinal and Aromatic Plants of the World. Similarly, to the previous volumes, the work will deal - in a monographic form - with MAPs characteristic/famous or simply known of Turkey, a large country that is connecting Europe with Asia. Turkey has extremely rich and varied topographic/ecologic conditions. As a result, the flora of Turkey abounds in an astonishingly great number of endemic MAP species. Traditional, present and possible prospective uses will be discussed. Scientific and technological achievements will be equally presented. Briefly, the volume is aimed to look carefully at our present knowledge of this vast interdisciplinary domain of medicinal and aromatic plants with a focus on Turkey. In the era of global climate change and Covid-pandemics, building on the huge Turkish traditions, the proposed volume of the series is expected to make an important contribution to the better knowledge and understanding of the MAP wealth of the World.

Convergent Wrestling CarrieLynn D. Reinhard, Christopher J. Olson, 2019-03-04 This book examines how the current era of convergence has affected, and is reflected in, the world of professional wrestling, which combines several different genres, including drama, action, comedy, horror, science fiction, and even romance. Professional wrestling's business practices exist at the intersection of bottom-up fan-centric strategies and strict top-down corporate control. Meanwhile, the wrestlers themselves combine aspects of carnival hucksters, actors/actresses, comedians, superheroes, martial artists, or stuntmen, and the narratives consist of everything from social critique to geopolitical allegories, and from soap opera melodramas to stereotyped exploitation. Bringing together the latest scholarship in the field, Convergent Wrestling analyzes various texts, business practices, and fan activities to explore the commonalities that define professional wrestling and consider how it exists in today's new media ecology. In addition, the book considers the professional wrestling industry from several different angles, from massive multinational conglomerate World Wrestling Entertainment (WWE) to local indie federations. As such, it will appeal to scholars with interests in popular culture, media and cultural studies, and fan practices.

Toxicology of Metals, Volume I Louis W. Chang, 2023-07-28 This volume offers the most comprehensive presentation available on metal toxicology. It discusses not only metals but also the toxic endpoints, such as neurotoxicity, renal toxicity, and cancer induction. Chapters are written by experts in their respective fields, focusing on carcinogenesis and human exposures and highlighting the major aspects and issues of toxicity in general.
