Albania off-road paradise Filip Weber,2012-01-01 Do you know how to say “shovel” in Albanian? “Lopata”! Even if you don’t know how to say it in Albanian, be sure to throw one in the car when you go, or better yet take two and make sure they’re really solid ones. Albania has changed dramatically since my first visit in 1999. The towns have been renovated and new main roads, new bridges as well as a new highway to the north have been built. You can catch a mobile phone signal almost everywhere and the stores are full of goods. Only the mountains have remained the same – or maybe they have become even more desolate as time goes by. Young people are moving to the towns, mountain villages are depopulating and no one maintains the mountain roads. Illegal lumberjacks use IFA trucks to haul wood and the condition of the roads is getting worse and worse. Deep ruts, which are impassable with a regular off-road vehicle, are common. Roads are often washed away by water or covered by landslides. Each year after winter, more and more mountain roads are impassable. But there are still many beautiful, passable routes that lead to the most beautiful places in the mountains. The viewpoints of magnificent mountain lakes and majestic rock formations take your breath away. I would like this guide to lead you through the most beautiful places in Albania, places that I have fallen in love with and that I like to visit again and again. Don’t believe ugly stories that people in Central Europe tell to scare each other. Forget the legends about bloody vendettas and hold-ups. All the same, you can never be too careful and you’ll be wise to camp close to residential areas and greet and chat with the locals when you arrive. You might even bring them a small gift, like beer, a knife, an axe or cigarettes for adults and chocolate, coloured pencils, colouring books or English children’s books for kids. Albanians are very hospitable; I have always been polite and respectful to them and they have been very kind in return.

Computerized Human Factors Task Data Handling Techniques Sue E. Reardon,1968 Instructions are presented for the operation of an experimental computerized data handling system. These instructions were developed as part of the overall research into a user-oriented computerized system to store, retrieve, and process human factors task data. These instructions are intended as a model for future operating guides. (Author).

Fracture Mechanics of Nonhomogeneous Materials Licheng Guo,Yu Hongjun,Wu Linzhi,2023-03-21 This book perfects the theoretical system of fracture mechanics of nonhomogeneous materials through the establishment of the piecewise exponential model and expands the fracture research scope to nonhomogeneous materials containing complex interfaces through proposing the domain-independent interaction integral concept. The piecewise exponential model has overcome the problem of fracture mechanics of nonhomogeneous materials and clarified the doubt of traditional exponential models in recent 30 years. The domain-independent interaction integral method is not affected by material nonhomogeneity and discontinuity, which greatly facilitates its numerical implementation in the investigation of fracture behaviors of nonhomogeneous materials with complex interfaces.

Deuterium and Shift Calculation ,2012-12-06 In 1931 Vrey, Brickwedde, and Murphy discovered the hydrogen isotope deuterium. The isotopic enrichment was found to arise from the fact that the electrolysis of light water is faster than of heavy water [1,2]. This success showed that although different isotopes of an element behave identically from a chemical standpoint the different isotopic masses nevertheless lead to both isotope effects on equilibrium as well as on rate constants of chemical reactions. Soon, ratios of equilibrium constants of isotopic reactions were called equilibrium isotope effects (EIE),

ratios of isotopic rate constants kinetic isotope effects (KIE). Isotope effects have been found to be especially large for those elements which are directly involved in bond breaking and bond formation during the reaction studied [3]. Such effects are, therefore, referred to as primary. Isotopic substitution in atomic sites which maintain all chemical bonds with their neighbors during the reaction of interest leads then only to smaller secondary isotope effects. Because of the unique mass relation between the different hydrogen isotopes hydrogen/deuterium isotope effects are particularly large and have attracted most attention. The largest contributions to these effects arise from changes in the vibrational frequencies of the reactants. The theory of equilibrium isotope effects has been founded by Vrey [4] and Bigeleisen [5,6] and has widely been accepted [3].

Physics of Massive Neutrinos Felix Boehm, Petr Vogel, 1992-06-26 Neutrinos play a decisive part in nuclear and elementary particle physics, as well as in astrophysics and cosmology. Some of their most basic properties, such as their mass and charge conjugation symmetry, are largely unknown. This book focuses on what we know and may hope to know about the mass of the neutrino and its particle-antiparticle symmetry. Topics include neutrino mixing, neutrino decay, neutrino oscillations, double beta decay, solar neutrinos, supernova neutrinos and related issues. The authors stress the physical concepts, and discuss both theoretical and experimental techniques. This updated second edition differs from the first in that it contains an expanded coverage of experimental results and theoretical advances. Since publication of the first edition, many issues that were at that time unresolved, such as tritium beta decay and reactor neutrino oscillations, have been clarified and are discussed here. Also included is an expanded coverage of solar and supernova neutrinos. This book deals with one of the most intriguing issues in modern physics, and will be of value to researchers, graduate students and advanced undergraduates specializing in experimental and theoretical particle physics and nuclear physics.

An International Annotated Bibliography of Strindberg Studies 1870-2005: The plays Michael Robinson, 2008 This copiously annotated bibliography documents and examines the whole range of commentary on Strindberg's works and activity in many fields besides the plays for which he is internationally best known. These include his prose fiction and poetry, his work as an historian and natural historian, and his relationship to the other arts, most notably his painting. It is concerned with both lasting works of literary and dramatic criticism, as well as reviews of his books and plays in the theatre, and some more ephemeral material, all of this in several languages. Organised generically and by subject and individual work, the bibliography enables the reader to trace the changing impact of Strindberg and his works in various countries and during different periods. It is thus very much a study in reception as well as a bibliographical record of published material. It traces the developing image of Strindberg and his writing both during his lifetime and in subsequent years, and with frequent cross reference offers a comprehensive overview of a

literary and existential project that has rarely been matched for its multifaceted diversity. The bibliography is published in three parts. Volume 1, General Studies (978-0-947623-81-4) and Volume 3, Prose, Poetry, Miscellaneous (978-0-947623-83-8) are also now available. Michael Robinson is Emeritus Professor of Drama and Scandinavian Studies at the University of East Anglia, Norwich.

Cochlear Implants - an Update Takeshi Kubo,Y. Takahashi,T. Iwaki,2002-04

Introduction On behalf of the Organizing Committee of the Third Congress of Asia Pacific Symposium on Cochlear Implant and Related Sciences (3rd APSCI), I would like to extend my heartfelt thanks to all the attendants at the meeting, as well as to the contributors to these Proceedings. As most of you will have realized, the meeting was a great success both from a scientific as well as a social point of view. Almost four hundred attendants from 25 countries gathered in the Osaka Convention Hall. The program consisted of three parallel workshops spanning one and a half days, and three full days of scientific sessions. The weather was ideal, and our guests were able to see the cherry trees in full blossom and to enjoy their fill of Japanese culture. We have great pleasure in sending you your copy of the Proceedings of the 3rd APSCI, which contains all the updated information and state-of-the-art knowledge on cochlear implants and implantable hearing devices. As is indicated in the title of the meeting, this book covers many areas that are of scientific interest to us. The articles cover subjects ranging from surgical issues with regard to cochlear implantation, to basic studies on the auditory system, developmental studies in children, communication skills, speech, and education, etc. In addition, the reader will observe that some of the articles are related to implantable middle ear devices, a subject which was not covered in the proceedings of the 1st and 2nd APSCI meetings. The editors sincerely hope that this book will contribute to the development of cochlear implants and middle ear devices. Takeshi Kubo, MD President, 3rd APSCI
