On Earth We're Briefly Gorgeous Ocean Vuong, 2021-06-01 The instant New York Times Bestseller • Nominated for the 2019 National Book Award for Fiction "A lyrical work of self-discovery that's shockingly intimate and insistently universal...Not so much briefly gorgeous as permanently stunning." –Ron Charles, The Washington Post Ocean Vuong's debut novel is a shattering portrait of a family, a first love, and the redemptive power of storytelling On Earth We're Briefly Gorgeous is a letter from a son to a mother who cannot read. Written when the speaker, Little Dog, is in his late twenties, the letter unearths a family's history that began before he was born – a history whose epicenter is rooted in Vietnam – and serves as a doorway into parts of his life his mother has never known, all of it leading to an unforgettable revelation. At once a witness to the fraught yet undeniable love between a single mother and her son, it is also a brutally honest exploration of race, class, and masculinity. Asking questions central to our American moment, immersed as we are in addiction, violence, and trauma, but undergirded by compassion and tenderness, On Earth We're Briefly Gorgeous is as much about the power of telling one's own story as it is about the obliterating silence of not being heard. With stunning urgency and grace, Ocean Vuong writes of people caught between disparate worlds, and asks how we heal and rescue one another without forsaking who we are. The question of how to survive, and how to make of it a kind of joy, powers the most important debut novel of many years. Named a Best Book of the Year by: GQ, Kirkus Reviews, Booklist, Library Journal, TIME, Esquire, The Washington Post, Apple, Good Housekeeping, The New Yorker, The New York Public Library, Elle.com, The Guardian, The A.V. Club, NPR, Lithub, Entertainment Weekly, Vogue.com, The San Francisco Chronicle, Mother Jones, Vanity Fair, The Wall Street Journal Magazine and more!

What on Earth Happened? Christopher Lloyd, 2012 In What on Earth Happened?, Christopher Lloyd tells our story from the very beginning of time to the present day, taking giant narrative leaps across millennia and continents. Along the way, he explains exactly how Muslim conquest gave Spain its paella, how the Earth's collision with another young planet created the moon, how dragonflies the size of seagulls emerged out of the prehistoric waters, and how the Big Bang can be detected in your television. Accessible and endlessly entertaining, this massive book draws on disciplines as wide-ranging as astrophysics and anthropology and will appeal to experts, amateur enthusiasts and the simply curious alike. Completed by 250 colourful photographs, maps, historic paintings, engravings and specially commissioned illustrations, What on Earth Happened? takes an entertaining and informed sideways look at the last 13.7 billion years in the life of our universe.

Hurricane Watch Jack Williams, Bob Sheets, 2002-02-05 The ultimate guide to the ultimate storms, Hurricane Watch is a fascinating blend of science and history from one of the world's foremost meteorologists and an award-winning science journalist. This in-depth look at these awe-inspiring acts of nature covers everything from the earliest efforts by seafarers at predicting storms to the way satellite imaging is revolutionizing hurricane forecasting. It reveals the latest information on hurricanes: their effects on ocean waves, the causes of the variable wind speeds in different parts of the storm, and the origins of the super-cooled shafts of water that vent at high altitudes. Hurricane Watch is a compelling history of man's relationship with the deadliest storms on earth. Includes: - The story of the nineteenth-century Cuban Jesuit whose success at predicting the great cyclones was considered almost mystical. - A new look at Isaac Cline, whose infamous failure to predict the Galveston Hurricane left him obsessed with the devastating effects of storm surge. - The story of the Hurricane Hunters, including the first man ever to deliberately fly into a hurricane. - A complete account of how computer modeling has changed hurricane tracking. - A history of Project Stormfury: the only significant, organized effort to reduce the damaging strength of severe hurricanes. - A unique firsthand account of Hurricane Andrew by both authors, who were at the National Hurricane Center when Andrew struck. - A listing of the deadliest storms in history.

Flat Earth Clues Mark Sargent, 2023-12-04 The Flat Earth Clues book gives you 14 compelling reasons why you should rethink the globe model that you have been taught. Before you were born, before your parents, your grandparents, before you even had a family line... there was the illusion, the trick, the lie... That you lived on a small spinning rock, flying through space. What if, after centuries of preaching the globe as a religious icon, the powers that be found out that it was actually not a sphere, but instead something much different? Would they risk unravelling 500 years of science doctrine by informing the public? Could a government still retain it's authority if there were actually proof of a higher power? It's about proving the Flat Earth, but more importantly, it's about disproving the globe, and that shouldn't be possible, but there are several big questions which science has a difficult time with. Why was there only one blue marble image used for 43 years? Where are the videos of the earth rotating from space? Astronauts can't turn around in space with the camera running? Not even by accident? Are the Van Allen radiation belts dangerous? Why does the Orion Trial by Fire video exist? Why was the space shuttle program cancelled? Why does the Mars mission keep getting postponed? Why are they closing down the ISS? Why is Psalm 19:1 on Werner Von Braun's headstone? Why is the moon generating a light that is sometimes 12 degrees colder than the moon shade? How is that possible if it's reflecting the sun's rays? And if the moon is generating it's own light source, then what was that dark grey thing we landed on? We can beam back crystal clear photos of Pluto, but the Global Positioning System doesn't track planes in the Southern oceans? And why does this topic, compared to ANY other, conspiracy or not, make people excited, angry, or scared? Some of you are getting anxious just listening! Why? Because it's the greatest trick of all, and we all fell for it. You should be excited, because it's going to change the world. You should be angry, because you were fooled your entire life, and you should be a little scared, because this is uncharted territory. This is the Flat Earth theory, that the world is easy to understand, more intimate, and very deliberate. It didn't just happen, it was built, and more importantly built for you. Open your eyes and smile. You have never been alone. Published by Booglez Limited, UK - Flat Earth Clues is digestible nuggets of information broken down in a very reader-friendly way. Author Mark Sargent is located in the USA. He features in the Netflix documentary Behind The Curve (2018). Mark runs a regular radio show

on Truth Frequency Radio where you can phone in and discuss the topic.

The Watchers Vincent P. Grupi,2010-07-20 Imagine we are not alone in the universe. Then imagine we were told this over two thousand years ago. The ancient Book of Enoch portrayed devils from heaven lusting after earth's women. Suppressed for centuries, whom did they love and what were the results? Read this unorthodox account of the very archangels who populate our Bibles and our imaginations.
