Complex Systems Design & Management Daniel Krob,Lefei Li,Junchen Yao,Hongjun Zhang,Xinguo Zhang,2021-04-09 This book contains all refereed papers accepted during the fourth asia-pacific edition & twelve edition – which were merged this year – of the CSD&M conference that took place in Beijing, People’s Republic of China by 2021. Mastering complex systems requires an integrated understanding of industrial practices as well as sophisticated theoretical techniques and tools. This explains the creation of an annual go-between European and Asian forum dedicated to academic researchers & industrial actors working on complex industrial systems architecting, modeling & engineering. These proceedings cover the most recent trends in the emerging field of complex systems, both from an academic and professional perspective. A special focus was put this year on “Digital Transformation in Complex Systems Engineering”. CESAM Community The CSD&M series of conferences are organized under the guidance of CESAM Community, managed by CESAMES. CESAM Community aims in organizing the sharing of good practices in systems architecting and model-based systems engineering (MBSE) and certifying the level of knowledge and proficiency in this field through the CESAM certification. The CESAM systems architecting & model-based systems engineering (MBSE) certification is especially currently the most disseminated professional certification in the world in this domain through more than 1,000 real complex system development projects on which it was operationally deployed and around 10,000 engineers who were trained on the CESAM framework at international level.

Proceedings of the 6th China Aeronautical Science and Technology Conference Chinese Aeronautical Society,2024-01-03 This book contains the original peer-reviewed research papers presented at the 6th China Aeronautical Science and Technology Conference held in Wuzhen, Zhejiang Province, China, in September 2023. Topics covered include but are not limited to Navigation/Guidance and Control Technology, Aircraft Design and Overall Optimisation of Key Technologies, Aviation Testing Technology, Airborne Systems/Electromechanical Technology, Structural Design, Aerodynamics and Flight Mechanics, Advanced Aviation Materials and Manufacturing Technology, Advanced Aviation Propulsion Technology, and Civil Aviation Transportation. The papers presented here share the latest findings in aviation science and technology, making the book a valuable resource for researchers, engineers and students in related fields.

Indian Defence Review Jul-Sep 2014 (Vol 29.3) Lt Gen JS Bajwa,Maj Gen Mrinal Suman,Air Chief Marshal PV Naik,Air Marshal Dhiraj Kukreja,Lt Gen Gautam Banerjee,Claude Arpi,Maj Gen Sheru Thapliyal,2014-08-22 In the latest issue of Indian Defense Review, Lt General Bajwa positions the fundamental necessities of India’s armed forces to the new government to ensure territorial integrity and national peace. Major General Mrinal Suman highlights the shortcomings in current FDI and discusses the bold steps needed to attract foreign investments in defence. Furthermore, Mr Claude Arpi interviews Air Chief Marshal Denis Mercier, French Air Force Chief of Staff, on the joint exercises “Garuda V” and on why “Rafale is the best fighter plane in the world.” Whereas rest of the sections focus on the latest requirements to modernize the DEFENCE equipment in Navy, Army, and Air Force. Brigadier Deepak Sinha argues for further employment of Special Forces in conflict areas dues to nuclearization of the sub-continent. Air Chief Marshal PV Naik, proposes employment of armed forces against Naxals as one solution to quickly diffuse the situation. There is an interesting debate shaping on geopolitical and military shortcomings to deal with China. Claude Arpi argues for a geopolitical resolution, while Dr Anil Singh proposes investments in Navy infrastructure. Capt AK Sachdev analyzes the faults in indigenous Chinese helicopters and implication on Sino-Indian conflict in case the US relents over the arms embargo.

The Concept of Abuse in EU Competition Law Pinar Akman,2012-02-03 The objective(s) of Article 102 TFEU, what exactly makes a practice abusive and the standard of harm under Article 102 TFEU have not yet been settled. This lack of clarity creates uncertainty for businesses and, coupled with the current state of economics in this area, raises an important question of legitimacy. Using law and economic approaches, this book inquires into the possible objectives of Article 102 TFEU and proposes a modern approach to interpreting 'abuse'. In doing so, this book establishes an overarching concept of 'abuse' that conforms to the historical roots of the provision, to the text of the provision itself, and to modern economic thinking on unilateral conduct. This book therefore inquires into what Article 102 TFEU is about, what it can be about and what it should be about regarding both objectives and scope. The book demonstrates that the separation of exploitative abuse from exclusionary abuse is artificial and unsound. It examines the roots of Article 102 TFEU and the historical context of the adoption of the Treaty, the case law, policy and literature on exploitative abuses and, where relevant, on exclusionary abuses. The book investigates potential objectives, such as fairness and welfare, as well as the potential conflict between such objectives. Finally, it critically assesses the European Commission's modernisation of Article 102 TFEU, before proposing a reformed approach to 'abuse' which is centred on three necessary and sufficient conditions: exploitation, exclusion and a lack of an increase in efficiency.

Understanding Planned Obsolescence Kamila Pope,2017-01-03 Planned obsolescence is a strategy used to make products obsolete, leading to their premature replacement. The result is the over-exploitation of natural resources, increased waste and detrimental social impacts. It is a known practice in consumer electronics and affects other industries as they put profit before consequence. A ground-breaking new book, Understanding Planned Obsolescence looks at the causes, cost and impact of planned obsolescence. It considers the legal and economic frameworks to overcome the practice and how to mitigate its effects. It also unearths new patterns of production and consumption highlighting more sustainable development models. Including a wide range of case studies from Europe, USA and South America, Understanding Planned Obsolescence is a vital step forward for the future of business and academia alike. Online resources now available include chapter-by-chapter lecturer slides.

Ready for Takeoff Roger Cliff,Chad J. R. Ohlandt,David Yang,2011 This monograph assesses China's aerospace capabilities and the extent to which China's participation in commercial aerospace markets and supply chains is contributing to the improvement of those capabilities. It examines China's commercial aviation manufacturing capabilities, its commercial and military capabilities in space, Chinese government efforts to encourage foreign participation in the development of China's aerospace industry, transfers of foreign aerospace technology to China, the extent to which U.S. and other foreign aerospace firms depend on supplies from China, and the implications of these issues for U.S. security interests. China's aerospace industry has advanced at an impressive rate over the past decade, partly due to the increasing participation of its aerospace industry in the global commercial aerospace market and the supply chains of the world's leading aerospace firms. China's current ability to meet demand with indigenous aircraft is limited, however, and much of the demand will be filled by imported aircraft. China's space capabilities have improved rapidly, on the other hand, and it has developed and deployed an increasingly wide range of satellites. China's growing civilian aerospace capabilities are unquestionably contributing to the development of its military aerospace capabilities, but whether the United States could significantly improve its security through alterations of its policy toward civil aerospace cooperation with

China without having a significant negative effect on its own economic interests is unclear.

The Valhalla Prophecy (Wilde/Chase 9) Andy McDermott,2014-01-16 The ultimate duo - Nina Wilde and Eddie Chase - return in their ninth action-packed adventure. Secrets from the past emerge to threaten archaeologist Nina Wilde and her husband, former SAS soldier Eddie Chase, when a Viking runestone is stolen by a murderous gang of raiders. The stone holds the key to an ancient evil concealed in one of Norse mythology's holiest places: Valhalla. Travelling to Sweden, Eddie and Nina find themselves in a race against time to locate the legendary hall of the Viking warriors - before rival powers claim its deadly contents for themselves. It is a quest that will force Eddie to revisit a dark chapter from his mercenary days that he has kept hidden from everyone...including his wife. Only Nina and Eddie can prevent the unleashing of a primordial terror from the depths of the earth. But even if they succeed, will the cost be greater than either of them could have ever imagined...

Technology Security and National Power Stephen D. Bryen,2017-07-05 In Technology Security and National Power, Stephen D. Bryen shows how the United States has squandered its technological leadership through unwise policies. Starting from biblical times, he shows how technology has either increased national power or led to military and political catastrophe. He goes on to show how the US has eroded its technological advantages, endangering its own security.The scope ofTechnology Security and National Power extends across 3,000 years of history, from an induced plague in Athens to chemical weapons at Ypres to an atomic bomb on Hiroshima to the nuclear balance of terror. It describes new weapons systems and stealth jets, cyber attacks on national infrastructure, the looting of America's Defense secrets, and much more. The core thesis is supported by unique insight and new documentation that reaches into today's conflicted world.More than a litany of recent failures and historical errors, this book is a wake-up call for political actors and government officials who seem unable to understand the threat. Technology Security and National Power proposes that the United States can again become a winner in today's globalized environment.

The Pillars of Destiny Bob Butalia,2015-11-25 The Pillars of Destiny is an action packed slickly crafted thriller with a stunning climax. It is a gripping sequel to In the Shadows of Destiny where Durga emerges as prime minister of India, following the biggest terror strike the world has ever seen. Widespread skepticism of Durgas ascension seems justified as India reels under blows from Chinas Peoples Liberation Army and Pakistans Inter-Services Intelligence. The Indian aircraft carrier Vikramaditya is crippled by a highly innovative strike by Major Dingbang even as Chinese and Pakistan instigated insurgent attacks overwhelm India. The top Indian military leadership is killed by a cruise missile attack and the narrow Siliguri Corridor is almost severed by a PLA attack. Durga takes tough decisions to fan Uyghur resistance in Xinjiang, orders launch of a armor strike against terror bases in Pakistan, gets a giant Chinese oil tanker captured by Somali pirates and authorizes a Special Forces drop to cut the Western Highway joining Tibet and Xinjiang. As the conflict escalates a high tech Indian air attack against a tunnel in the perma frost zone cripples the Lhasa-Golmud high altitude railway line. In sync with instigating widespread internal sabotage and communal riots in India, also abetted by Pakistan, China launches an offensive to cut off north east India through Bhutan.
