Interventions E. Castelli, J. Jakobsen, 2004-11-26 This collection brings together top scholars to discuss the significance of violence from a global perspective and the intersections between the global structures of violence and more localized and intimate forms of violence. Activists and academics consider questions such as; are there situations in which violence should be politically supported? Are non-violent or anti-war movements in the US able to effectively respond to violence? Do we need to rethink our understanding of both 'religion' and 'secularism' in light of the current world situation? Have new paradigms been developed in response to violence? The essays in this collection offer inclusive analysis of particular situations and creative alternatives to the omnipresence of violence.

Beyond BIM Danelle Briscoe, 2015-10-14 Beyond BIM explores the vast and under-explored design potential undertaken by information modeling. Through a series of investigations grounded in the analysis of built work, interviews with leading practitioners, and speculative projects, the author catalogs the practical advantages and theoretical implications of exploiting BIM as a primary tool for design innovation. Organized by information type, such as geographic data, local code, or materials, each chapter suggests a realm of knowledge that can be harvested and imported into BIM to give meaningful specificity to architectural form and space. While highly sustainable, the work documented and envisioned in this book moves well beyond 'normalization,' to reveal inventive takes on contemporary practice. Beyond BIM serves as a primary resource for professional architects from practice, researchers and designers engaged in information related spatial design processes, as well as students and faculties of architecture schools in search of BIM design inspiration. Likewise, those highly attuned to computation and unconventional ways of creating form and space, particularly built outcomes that utilize BIM, will find this book meaningful and essential.

Bigfoot Singularity Ronald C. Meyer, Mark Reeder, 2019-10-25 The most common explanation for the Bigfoot phenomena is that they are artificial life forms brought to Earth tens of thousands of years ago by aliens, designed to evolve and learn about the nature of the earth and its inhabitants. In Ron Meyer and Mark Reeder's gripping story, thousands of Bigfoot are poised to combine their knowledge and merge with the first genuine, human-made AGI machine. Over three days, in the primordial forest of Michigan's Upper Peninsula, the Bigfoot take an evolutionary leap...

The Fifth Revenge Carl Burcham, 2000-12 A modern-day Sioux warrior is "on the warpath," avenging five of his most famous ancestors by killing contemporary white leaders. When the pinto-riding Indian "Avenger" brutally murders the Secretary of the Interior before thousands of onlookers at a Native American gathering on the Washington Mall, President Elizabeth Chamberlain decides to intervene. But, instead of relying on federal authorities, she turns to local D.C. detective Quinn Shannon, a Harley-riding, beer-swilling, over-the-hill cop with retirement on his mind. To track the assassin, Shannon relies on one of the Indian's own--an old Sioux Sundancer named Ben Soaring Eagle. It's a race against time as Shannon and Soaring Eagle try to stop the Sioux assassin before he completes the fifth revenge.

Gendering Security and Insecurity Navtej K. Purewal, Sophia Dingli, 2020-06-05 Security studies and international relations have conventionally relegated gendered analysis to the margins of academic concern, most commonly through the 'women in' or 'women and' politics and IR discourse. This comprehensive volume contributes to debates which seek to move feminist scholarship away from the reification of the war/peace and security/economy divides. By foregrounding the empirical reality of the breakdown of these traditional divisions, the authors pay particular attention to frameworks which query their very existence. In doing so, the collection as a whole troubles the ubiquitous concept and practices of '(in)security' and their effects on differentially positioned subjects. By gendering (in)securities in 'states of exception' and other paradigms of government related to it, especially in postcolonial and

neocolonial contexts, the book provides an approach that allows us to study the complex and interrelated security logics, which constitute the messy realities of different – and particularly vulnerable – subjects’ lives. In other words, it suggests that these frameworks are ripe for feminist interventions and analysis of the logics and production of (in)securities as well as of resistance and hybridisation. This book was originally published as an online special issue of the journal Third World Thematics.
