Nieuport 11/16 Bébé vs Fokker Eindecker Jon

Guttman,2014-04-20 The appearance in July 1915 of the Fokker E I heralded a reign of terror over the Western Front that the Allies called the 'Fokker Scourge'. The French Nieuport 11 was one type desperately thrown into action to counter the Fokkers. The swirling dogfights between this fighter – and its more powerful but more unwieldy stablemate, the Nieuport 16 – and a succession of improved Fokkers, the E II, E III and E IV, came to symbolise air combat in World War I. This book gives a detailed look at the developmental history of the fighters, contrasting the interrupter gear-equipped Fokker with the more improvised solution incorporated in the Nieuport – a machine gun fitted to the upper wing to avoid the propeller entirely. The Germans went on to abandon the monoplane in favour of a new and deadly generation of biplane fighters, based on the lessons learned from these vicious engagements and influenced by the success of the French Nieuport.

Fokker Eindecker in Action D. Edgar Brannon,1996-01

Beskrivelse af de første, Fokker jagerflytyper

Sharks Among Minnows Norman L. R. Franks, 2001

Various ingenious schemes on the part of both sides to gain superiority in the air, most of which had limited success, were suddenly over-shadowed by the arrival at the front in the summer of 1915 of the Fokker Eindecker, which had a synchronized machine gun firing through the whirling blades of the propeller. Spread amongst German two-seater reconnaissance units in ones and twos, those flying these first single-seater fighting aeroplanes, if they were successful, soon became famous and the first aces of this new form of aerial warfare. Names such as Boelcke, Immelmann, Wintgens, Parschau, Mulzer, Hohndorf, Frankl and von Althaus quickly became heroes to the German public and the first winners of the coveted Pour le Merite - the famed Blue max.

Early German Aces of World War I Greg

VanWyngarden, 2006-10-31 One of the top picks for specialized military holdings - California Bookwatch The Fokker Eindecker (monoplane) can truly be said to have begun the age of fighter aviation. With the development of its revolutionary synchronised system that enabled the machine gun to fire through the propeller, Fokker E I pilots caused consternation in the Allied air services as they began to reap a harvest of victims in the summer of 1915. While the first victory with a Fokker E-type is now believed to have been earned by Kurt Wintgens on 1 July 1915, it was the exploits of Max Immelmann and Oswald Boelcke that made the machine legendary. These men, along with others such as Parschau and Hohndorf, received the adulation of the German public along with such honors as the first awards of the coveted Blue Max. They created the tactics and principles of German fighter aviation as they did so, developing doctrine that is still relevant to today's

fighter pilots. However, by the end of 1916, the glory days of the lone hunter and his Fokker Eindecker were over. They were replaced by a succeeding generation of biplane fighters which would be flown in new formations - the Jagdstaffeln or 'hunting groups'. The story of these first Fokker and Halberstadt biplane fighters and their pilots concludes this volume. Nieuport 11/16 Bébé vs Fokker Eindecker Jon

Guttman, 2014-04-22 The Nieuport 11 boasts an important place in the technology race against German aircraft in World War I aerial warfare. It eventually led Nieuport to produce the first plane flown in large numbers in aerial combat by the United States. The appearance in July 1915 of Germany's Fokker E I, armed with interrupter gear that allowed its machine gun to fire forward without striking the propeller, heralded a reign of terror over the Western Front that the Allies called the Fokker Scourge. Among several alternative means for countering the Fokkers, until the Allies introduced practical synchronisation mechanisms of their own, was the French Nieuport - 11 a single-seat version of the Nieuport 10 sesquiplane (one-and-a-half wing) mounting a Lewis machine gun above the upper wing, firing over the airscrew. Nicknamed the Bébé because of its comparatively small size, the Nieuport 11 was, though less robust than true biplanes, superior in structure and overall performance to the German monoplane. During 1916 the Nieuport 11, and its more powerful but more difficult to control stablemate, the Nieuport 16, battled a succession of improved Fokkers, the E II, E III and E IV, until the Germans abandoned the monoplane in favour of a new and deadly generation of biplane fighters. Even so, the Bébé's early

successes also influenced the Germans to adopt sesquiplane designs of their own - most notably the Albatros D III and D V - while Nieuport also held on to the sesquiplane format longer than it should have. Fully illustrated with specially commissioned full-colour artwork, this is the absorbing story of the clash between these two innovative fighters at the height of World War I.

European Powers in the First World War Spencer Tucker, 2018-12-07 First published in 1996. The First World War was the single most important event of the twentieth century. This volume concentrates on non-U.S. aspects of the conflict. Organized alphabetically, its more than 600 detailed entries offer information and insight on such subjects as the causes of the conflict, major battles and campaigns, weapons systems (including military aviation, chemical warfare, the submarine, and the tank), and the terms of the peace. There are also biographies of individuals who were shaped by the war, such as Charles De Gaulle, Adolf Hitler, Benito Mussolini, and Joseph Stalin; essays on each of the countries involved in the conflict; new appraisals of such subjects as military medicine and artillery tactics; and essays on such diverse subjects as art, literature, and music in the war. Each entry has references for additional reading, and a subject index provides easy access. The volume is an excellent reference source for scholar and neophyte alike.

The Dream of Civilized Warfare Linda Raine Robertson, 2003 In *The Dream of Civilized Warfare*, Robertson presents the compelling, story of the creation of

the first American air force--and how, through the propaganda of the flying ace, a vision of clean or civilized combat was sold to politicians and the public. She traces the long history of the American desire to exert the nation's will throughout the world without having to risk the lives of ground soldiers--a theme that continues to reverberate in public discussions, media portrayals, and policy decisions today.

Addressing weapons as crude as the club used by primitive man to the high-tech weapons of today such as unmanned drones, *Instruments of War: Weapons and Technologies That Have Changed History* offers nearly 270 profusely illustrated entries that examine the key roles played by specific weapons and identify their success and failures. The book begins with an introductory essay that frames the subject matter of the work and discusses the history of weapons as a whole. The text is concise and accessible to general readers without extensive backgrounds in military history yet provides the detailed information necessary to convey the complexity of the evolution of warfare through technological change.
