*The Elephant in the Temple* John Lockwood Kipling, 2017-08-05 From military camels and hunting cheetahs, to herding dogs and talking mynahs, animals have been living, working, playing and performing with humans in India for centuries. In this intimate book, John Lockwood Kipling writes about animals in daily Indian life, bringing alive the sights, sounds and smells of the nineteenth century. In these tales, forty restless elephants are hoisted into a steam ship and nearly sink it; a guilty goat gets the thrashing of its life; a cheetah-keeper wakes up every night to a feline bedfellow; and a dog follows a king to heaven. Kipling describes the animal kingdom with the authority of a naturalist, paired with a sympathetic engagement with Indian culture. He narrates religious myths, traditional folktales and incidents from day-to-day life with relish, peppered with local sayings--'The Indian lover can pay his sweetheart no higher compliment than to say that she runs like a partridge.' Lavishly illustrated with Kipling's own pen-and-ink drawings, and enhanced by his son, Rudyard Kipling's verse, *The Elephant in the Temple* offers a fascinating glimpse of a time when birds and animals used to 'come and go at their own pleasure, and rub shoulders with humanity.' This wittily written book is a delight for aficionados of Indian history and animal lovers everywhere.

**Temples and Elephants; the Narrative of a Journey of Exploration Through Upper Siam and Lao** Carl Bock, 2013-09 This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1884 edition. Excerpt: ...of ritual, reminded me very much of that of the Roman Catholic priests. Instead of the figures of the Virgin there are figures of Buddha. The tall candles of the Roman Catholic Churches are replaced by the wax tapers<sup>1</sup> which the priest or suppliant places reverently before the image, or in a receptacle provided for the purpose. Incense is as freely used in a Buddhist Wat as in a Catholic cathedral, and fast-days are common to both religions. The Latin prayers which the Romish priests recite before the crucifix may be likened to the Pali liturgy which the Buddhist priest mutters before the figure of Buddha--both alike being in a dead language. Even in the ornamentation of the places of worship there is a parallel, the beautiful frescoes illustrative of the life of Christ being replaced by rude frescoes representing events in the life of Buddha, which ornament the walls of every Wat; while the entrancing music of the Italian churches has a distant analogy in the dull gongs and drums of the Buddhist temple. <sup>1</sup> The quantity of wax burnt in the worship of Buddha is enormous. In some temples tapers are kept constantly burning. The supply of the native forests is not sufficient for local use, and large quantities of wax are imported from Yunnan. On the subject of the devotional offerings made to the figures of Buddha, it is interesting to note that, according to Captain Forbes' *British Burma*, the Burmese, the neighbours of the Laosians, do not worship Gaudama, while the Lao people say that Buddha left word that, when they worshipped these figures, they worshipped him. When they pray, the Laosians pray to the spirits of their ancestors, beginning with Mung Hai, who lived about 600 years ago. Now the Burmese, according to Captain Forbes, ...

And when Tua meets Pohn-Pohn, it's clear this elephant needs her help. Together, the unusual team sets off on a remarkable journey to escape from Pohn-Pohn's vile captors. *Gold Coins of the World - 9th edition* Arthur L. Friedberg, Ira S. Friedberg, Robert Friedberg, 2017-01-05 A unique and indispensable reference work Unsurpassed in content and scope When the first edition of *Gold Coins of the World* made its debut in 1958, it forever changed the way gold coins were collected, cataloged, traded, and priced. For the first time, one book provided a reliable guide for a subject which previously required an often expensive investment in multiple volumes of literature, some of it rare and antique, and much of it badly out-of-date. With the publication of this pioneering work, Robert Friedberg (1912-1963) established himself as an international icon in the field of numismatic literature. This book, and the 'Friedberg Numbering System' he developed became then, and is still today, the internationally-recognized standard for systematically identifying any gold coin ever made. From just 384 pages in 1958, *Gold Coins of the World* has expanded to the extent that it now contains more than triple the information of its ancestor. It still stands alone as the first and only book to describe, catalog and price two millennia of gold, platinum, and palladium coin issues from across the globe. From the first coins of the ancient Greeks to the most recently-issued modern commemoratives, they are all here, an astonishing compilation of more than 21,000 individual coin listings accompanied by over 8,000 actual-size photographs. The prices have been completely updated, for the most part raised substantially, to reflect the current market. Entire sections have been expanded, many illustrations have been added or improved, and hundreds of new discoveries and recent issues have been included for the first time. Arthur Friedberg, president of the International Association of Professional Numismatists from 2001 to 2007 and now its Honorary President, and Ira Friedberg, have completely revised and expanded their late father's work. They have had the valuable assistance and cooperation of a who's who of the leading numismatists on every continent in bringing this edition to fruition. For the numismatist, banker, economist, historian, institution of higher learning, or a fancier of the noble metal in all its forms, *Gold Coins of the World* is a book for every library, public and private.

*Science in the Metropolis* Mitchell G. Ash, 2020-10-26 This book presents new research on spaces for science and processes of interurban and transnational knowledge transfer and exchange in the imperial metropolis of Vienna in the late nineteenth and early twentieth centuries. Chapters discuss Habsburg science policy, metropolitan natural history museums, large technical projects including the Ringstrasse and water pipelines from the Alps, urban geology, geography, public reports on polar exploration, exchanges of ethnographic objects, popular scientific societies and scientifically oriented adult education. The infrastructures and knowledge spaces described here were preconditions for the explosion of creativity known as 'Vienna 1900.'
