The period fostered an emerging sense of individualism across European cultures. This sense was

expressed through a fascination with materiality and the natural world, and a growing attachment to things. The 6 volume set of the Cultural History of Objects examines how objects have been created, used, interpreted and set loose in the world over the last 2500 years. Over this time, the West has developed particular attitudes to the material world, at the centre of which is the idea of the object. The themes covered in each volume are objecthood; technology; economic objects; everyday objects; art; architecture; bodily objects; object worlds. James Symonds is Professor at the University of Amsterdam, The Netherlands. Volume 3 in the Cultural History of Objects set. General Editors: Dan Hicks and William Whyte
