Innovation @ ENEL Henry William Chesbrough, 2016 Enel is an innovative Italian energy utility that is undergoing rapid change. Technically the company has enthusiastically embraced renewable energy under its new CEO, Francesco Starace. The company is also shifting its business model away from the traditional cost plus regulatory model, towards a model built around a variety of value-add services. Open innovation is an important part of this transformation. There are internal barriers to overcome, and new organizational structures required, to manage this change.

Complexity Perspectives in Innovation and Social Change
David Lane, Denise Pumain, Sander Ernst van der Leeuw, Geoffrey West, 2009-02-13 Innovation is nowadays a question of life and death for many of the economies of the western world. Yet, due to our generally reductionist scientific paradigm, invention and innovation are rarely studied scientifically. Most work prefers to study its context and its consequences. As a result, we are as a

society, lacking the scientific tools to understand, improve or otherwise impact on the processes of invention and innovation. This book delves deeply into that topic, taking the position that the complex systems approach, with its emphasis on 'emergence', is better suited than our traditional approach to the phenomenon. In a collection of very coherent papers, which are the result of an EU-funded four year international research team's effort, it addresses various aspect of the topic from different disciplinary angles. One of the main emphases is the need, in the social sciences, to move away from neo-darwinist 'population thinking' to 'organization thinking' if we want to understand social evolution. Another main emphasis is on developing a generative approach to invention and innovation, looking in detail at the contexts within which invention and innovation occur, and how these contexts impact on the chances for success or failure. Throughout, the book is infused with interesting new insights, but also presents several well-elaborated case studies that connect the ideas with a substantive body of 'real world' information.

Competitive Strategy Benoit Chevalier-Roignant, Lenos Trigeorgis,2014-08-29 A new paradigm for balancing flexibility and commitment in management strategy through the amalgamation of real options and game theory. Corporate managers who face both strategic uncertainty and market uncertainty confront a classic trade-off between commitment and flexibility. They can stake a claim by making a large capital investment today, influencing their rivals' behavior, or they can take a "wait and see" approach to avoid adverse market consequences tomorrow. In *Competitive Strategy*, Benoît Chevalier-Roignant and Lenos Trigeorgis describe an emerging paradigm that can quantify and balance commitment and flexibility, "option games," by which the

decision-making approaches of real options and game theory can be combined. The authors first discuss prerequisite concepts and tools from basic game theory, industrial organization, and real options analysis, and then present the new approach in discrete time and later in continuous time. Their presentation of continuous-time option games is the first systematic coverage of the topic and fills a significant gap in the existing literature. Competitive Strategy provides a rigorous yet pragmatic and intuitive approach to strategy formulation. It synthesizes research in the areas of strategy, economics, and finance in a way that is accessible to readers not necessarily expert in the various fields involved.

Reappraising State-owned Enterprise Franco

Amatori, Robert Millward, Pierangelo Maria Toninelli, 2011 This volume compares the role played by State intervention in the economy in the United Kingdom and Italy. In both nations, the State played an important role as Entrepreneur in the 20th century but with different aims in each country. The crisis of 2008/2009 compels us to reconsider State intervention in the economy as a tool that cannot be undervalued.

The Role of Coal in a Sustainable Energy Mix for India

Mritunjy Mohanty, Runa Sarkar, 2023-09-13 As India switches away from a coal-based to a more sustainable energy use pattern, which pathway will it adopt? What is the nature of challenges that it will face, and who will be affected? Who will gain? This volume offers insights into the steps and challenges involved in this transition and addresses some urgent questions about the possible pathways for India's renewable energy generation. Including contributions from researchers, policymakers, and practitioners, it draws on different disciplines, ranging from science and technology to economics and sociology, and situates the issue of low carbon transition within an interdisciplinary framework. India has committed to gradual decarbonisation of its economy. This book takes this as its starting point and uses a wide-angle lens,

incorporating macro as well as micro views, to understand the possible next steps as well as trade-offs that will inevitably be posed. It incorporates the perspectives of all stakeholders ranging from central and state governments, public and private sector firms, on the one hand, to individuals and local communities, on the other, to explore their role in the transition, their interests, and how these will change and evolve. This timely volume will be of interest to students and researchers of environmental studies, development studies, environmental economics, political studies, and Asian studies. It will also be useful to academics, practitioners, and policymakers working on issues related to climate change, sustainable development, energy policy and economics, and public policy.

Corporate Sustainability in the 21st Century Rafael

Sardá, Stefano Pogutz, 2018-12-07 Corporate sustainability needs a rethink. We have entered the human-influenced Anthropocene age, and we are witnessing accelerating changes in earth system processes. Businesses' current initiatives, such as product innovation and pollution reduction, are not enough to combat the intensifying social-ecological challenges that face us. *Corporate Sustainability in the 21st Century* is an innovative new textbook which provides a fresh conceptual framework for understanding and engaging with sustainability, now and in the future – Business In Nature. This book critically discusses key concepts and topics related to corporate sustainability, with a focus on corporate sustainability strategies and corporate value chains. Setting itself apart from existing books, it introduces ideas from global ecology and the natural sciences to provide readers with a new language for discussing business and sustainability. This book maintains an international perspective throughout, with a wealth of examples, case studies and discussion questions. It will be a valuable text for students of corporate sustainability; business, nature and society; and environmental studies, and will also be useful for managers seeking a new perspective on how being green can fit with

business goals.

OECD Reviews of Regulatory Reform: Regulatory Reform in Italy 2001 OECD,2001-04-04 OECD's 2001 review of regulatory reform in Italy.

I-Bytes Utilities Industry IT-Shades,2020-09-15 This document brings together a set of latest data points and publicly available information relevant for Utilities Industry. We are very excited to share this content and believe that readers will benefit from this periodic publication immensely.

The Italian Utilities Industry Andrea Gilardoni,2020-01-21 This book addresses the fundamental changes that the Italian public utilities sector has undergone in the last two decades. Since the late 1990s, liberalisation and privatisation have replaced state-owned monopolies at both the national and local level, new technologies have created a broad range of new opportunities for power generation and distribution, and a redesigned public policy agenda has brought to the fore a whole set of new priorities. In this fast-changing environment, firms have redrawn their strategies, redesigned their business architectures and models, invested in infrastructure and R&D, taken advantage of growth opportunities at home and abroad, opened up their ownership structure, revised their offerings, and developed a new approach to customers. As a result, a radically altered market structure has emerged. As the sector tackles the overriding challenge of sustainability and energy transition, the book takes stock of such past and ongoing developments through the direct testimonies of various stakeholders: the companies in the energy, water, and waste management sectors that are at the forefront of this sweeping transformation; regulators; financial partners; and management consulting firms. The diversity of perspectives and wealth of information presented make this book a valuable

resource for anyone wanting to grasp the direction, intensity and causes of change, as well as the nature of the challenges that lie ahead. This work has been prepared as part of the research activities of the Observatory on Alliances and Strategies in the Pan-European Utility Market, one of Agici's Research and Advisory units.

The Interaction of Competition Law and Sector Regulation Pier L. Parcu, Giorgio Monti, Marco Botta, 2022-11-04 This insightful book discusses the interaction of sector-specific regulation and competition policy. In particular, it identifies emerging trends and reflects on the nature of network regulation in the energy and telecom industries.

Fourth E.C. Photovoltaic Solar Energy Conference W.H. Bloss, G. Grassi, 2012-12-06 This paper is written in the belief that people are important and that equipment is to serve the needs of the people and therefore should be designed to meet their specific needs and environment. This is particularly important in the case of a developing country when a professional engineer accepts the responsibility to formulate policies evaluate equipment implement projects and train national people. 1. Government, geography and climate Papua New Guinea, an independent and self governing state since 1975, is located directly North of Australia above the North Eastern State of Queensland. The country extends from 141° east longitude, at the border with Indonesia (Irian Jaya) to 160° east longitude and between latitudes 1° and 12° south (see figure 1). Papua New Guinea is a parliamentary democracy, with a single legislature known as the National Parliament (1). The State is divided into 19 provinces plus the National Capital District (Port Moresby) with decentralized Government established in each province. Before independence the country comprised the Australian territory of Papua in the southern regions and the United Nations Trust Territory of New Guinea in the North (1). Land area is 462,840 square kilometres This includes the mainland, the three large islands of New Britain, New Ireland and Bougainville

plus 600 small islands and archipelagos. Approximate direct distances from the capital city of Port Moresby to some of the other centres are : Vanim 990 km, Rabaul 500 km, Arawa 990 km and Lorengau 525 km.

Natural Gas and Geopolitics David G. Victor, Amy M. Jaffe, Mark H. Hayes, 2006-06-29 Global consumption of natural gas is generally expected to double by 2030. However, in the areas of highest-expected demand, the consumption of gas is expected to far outstrip indigenous supplies. This book explores the political challenges which may accompany a shift to a gas-fed world.

State Aid and the Energy Sector Leigh Hancher, Adrien de Hauteclocque, Francesco Maria Salerno, 2018-02-22 This important new work offers a comprehensive and compelling account of State aid law and policy and its application to the energy sector. Clearly structured and offering meticulous detail and robust analysis, it is required reading for all practitioners in the field. The volume explores general questions from the definition of State aid to its application in Member States by national courts. It also examines questions of procedure, questions of compatibility, and State aid and the EEA. It is an invaluable tool for lawyers, policymakers and tax professionals specialising in State aid law and energy law, written by a team of leading practitioners and academics in the field.

Corporate Reputation and the News Media Craig Carroll, 2010-09-01 This volume examines agenda-setting theory as it applies to the news media's influence on corporate reputation. It presents interdisciplinary, international, and empirical investigations examining the relationship between corporate reputation and the news media throughout the world. Providing coverage of more than twenty-five countries, contributors write about their local media and business communities, representing developed, emerging, and frontier markets – including Argentina, Brazil, Chile, China, Germany, Greece, Japan, Nigeria, Spain, and Turkey, among others. The

chapters present primary and secondary research on various geopolitical issues, the nature of the news media, the practice of public relations, and the role of public relations agencies in each of the various countries. Each chapter is structured to consider two to three hypotheses in the country under discussion, including: the impact of media visibility on organizational prominence, top-of-mind awareness and brand-name recognition the impact of media favorability on the public's organizational images of these firms how media coverage of specific public issues and news topics relates to the associations people form of specific firms. Contributors contextualize their findings in light of the geopolitical environment of their home countries, the nature of their media systems, and the relationship between business and the news media within their countries' borders. Incorporating scholarship from a broad range of disciplines, including advertising, strategic management, business, political communication, and sociology, this volume has much to offer scholars and students examining business and the news media.
